1100 Litre Wheelie Bin

Consisting of four wheels, and capable of holding large volumes of waste, the 1100L Wheelie Bin is the perfect waste solution for environments such as residential blocks, restaurants, cafes, and commercial or industrial settings. Constructed from HDPE, it conforms to both European Standard EN 840 Parts 2, 5, 6, and RAL quality mark 951/1

Features and Benefits

Manufactured using compact injection moulding

Formed using durable and hard wearing HDPE for product longevity

Resistant to the effects of UV, frost, heat and chemicals

Designed to fit both DIN and comb-lift devices

Lifting trunnions, reinforced with steel, provide extra stability and durability throughout the emptying process

Fitted with four 20cm quiet running, solid rubber casters that are capable of swivelling through 360°

Fitted, as standard, with two foot brakes

Zinc-plating on all metal components resists corrosion

Ergonomically located handles on all sides of container enable easy manoeuvrability and user comfort

Water drain in base of container prevents build-up of unwanted fluid

Adheres to directive 2000/14/EC and displays CE mark as well as appropriate noise level

Flat lid prevents water ingress and can be easily changed if required
