

TPO number not known/ref woodland TPO

Ref Specification of works, reasons for works based on arboricultural advice from Neil Wilson

Is the tree/s owned by our client? No

Specification

T.1 partially failed Poplar

Remove 4 branches/stems which extend/have dropped over playing field.

T.2 Leaning Sycamore

Fell to just above ground level in safe and controlled manner.

Reasons for the proposed works are listed and numbered below

T.1

1. The tree has clearing started to fail, it is leaning on and damaging the fence.
2. The trees branches need to be removed before they fall in the playing fields.
3. The largest section of the tree clearly has significant decay, see photo, that will undermine the growth above.
4. The location of the tree means it is exposed to significant wind stresses which could lead to branch failure.
5. The target area should the tree or a portion of it fail is heavily used by children and therefore the risk needs to be removed.

T.2

1. The tree need to be removed before it fails and fall into the playing fields.
2. The main stem clearly has significant damage, see photo that will undermine the growth above.
3. The location of the tree means it is exposed to significant wind stresses which could lead to branch failure.
4. The target area should the tree or a portion of it fail is heavily used by children and therefore the risk needs to be removed.
