Reading Green Park Station

Dear Neil,

With regards the above new station being constructed within the Reading area I can confirm that I, along with other colleagues previously, have been consulted throughout the design and build phases of the station. This has included comment on the security systems in place, including the CCTV design across the station. Comment has also been provided on the layout of the station to include such things as entrances and exits including emergency access routes.

As it stands I am content that security measures designed in are commensurate with the requirements of a station of the size and location of Reading Green Park

Should you require any further information I am happy to provide it as required.

Yours faithfully,

PE Bennett
