

Volume Calculation, Roof Extension, 53 PEPARD ROAD, CAVERSHAM

$$2.2\text{M} \times 2.2\text{M} \times 6.7\text{M} \times .5 \\ = 16.2\text{M}^3$$

$$\text{Total Volume} = 32\text{M}^3$$

$$1.8\text{M} \times 1.8\text{M} \times 4.8\text{M} \times .5 \\ = 7.78 \text{ per gable} \\ \therefore 2 \text{ gables} = 15.6\text{M}^3$$
