CLEAN AS YOU GO POLICY

INSPIRED DECORATORS

Inspired Decorators Ltd has implemented a Clean As You Go Policy that has its employees minimizing waste and improving the efficiency of waste removal in their day to day activities. What this means is that, before beginning a specific task, an assessment is made to ensure all resources necessary for waste removal are available on the spot. Additionally, access routes are planned beforehand and exclusion zones are set up and maintained as necessary.

The Company will take steps to reduce the amount of waste being created by cutting out any wastage of materials and arranging to recycle those materials that, for practical reasons, cannot be reused directly.

All Company employees are made aware of this Policy and expected to implement it at all times by taking every opportunity to recycle materials and to minimize waste creation.

In those situations where waste creation is inevitable, employees are trained to place the waste in secured storage receptacles of suitable capacity, making sure not to load them to excess.

Inspired Decorators Ltd will take all necessary steps to ensure compliance with the Safety Plans existing on site and with the Company's Waste Management Policy.

Inspired Decorators Ltd will ensure, either directly or through a contractor, that sufficient waste containers exist on site to properly dispose of all waste created.

Waste collection points will be properly maintained through good housekeeping practices, on a daily basis, to ensure they remain clean and easily accessible.
