

Figure 1. Schematic representation of the structure of the *h*HLA-B*07:01 gene. The gene is shown as a horizontal bar with the exons numbered 1 to 8. The introns are indicated by lines with arrows showing the direction of transcription. The gene is flanked by the HLA-B*07:01 promoter and the 3' UTR. The gene is located on the short arm of chromosome 6.
