

sedum roof systems

A sedum roof is by far the most popular choice for an extensive green roof system that Sky Garden provides.

Whether it is a sedum blanket or sedum plug, our plants are lovingly nurtured at our UK nursery before being lifted and transported to site within 24 hours.

Sky Garden's sedum blanket is a pre-grown mat of mature sedum plants. There is a mix of species to provide a shade tolerant, drought tolerant blanket that colours beautifully throughout the seasons. If you are looking for an instant vegetation finish for your roof, this system is the one for you.

A sedum plug plant system is very similar to the blanket system, but with individual sedum plugs being planted across the roof rather than the pre-grown blanket. Over time, the sedum establishes and covers the roof, similar to the blanket system.

BUY A SEDUM ROOF SYSTEM ([HTTP://WWW.SKY-GARDEN.CO.UK/SHOP/FULL-SYSTEMS/SEDUM-BLANKET-SYSTEM.PHP](http://www.sky-garden.co.uk/shop/full-systems/sedum-blanket-system.php))

Sedum Blanket System

Sedum Blanket living roof systems offer an instant greening, low growing, low maintenance, attractive, light weight option to green roofing.

Sky Garden's sedum substrate is a blend of organic, free draining, clean and screened granular aggregates, to provide a low nutrient and moisture retentive growing medium.

The protection fleece adds an extra layer of defense to the waterproofing layer.
