Letter of Support

On behalf of the Atrium Health Club, we are happy to write this letter of support in recognition of the pre-application by Simply Padel LTD to build a Padel Tennis facility on our site.

The proposed plans are to bring back to life an area of our site that was previously used as netball courts in addition to tennis courts. The area has since been used solely as an overflow carpark and while this has been helpful, we have identified alternative car park options on our site that will be more than capable of coping with the traffic and footfall through our site. After exploring the options available to us, we believe that Simply Padel will be a great addition not only to our site, but also to the local community and surrounding areas. The offerings and emergence of the game is exciting, particularly due to the accessibility of the sport to all.

After many conversations between Pete and the consultants he has introduced us to during our early engagements, we have no objection against the proposed plan. We welcome any conversation and offer our full support as Simply Padel approach and access the planning phases of the project.

Yours sincerely,

Josh Baines
