Hi David,

I hope you had a pleasant Christmas. I now have the details regarding coverage of the proposed CCTV cameras.

The two internal cameras are four way, so they all take in a 360 degree view, with a range of up to 7 metres. As such, in combination, the cameras cover the entirety of the shop. The spec sheet sent over previously applies here.

The camera on the façade is a Vari-Focal camera with a 2.8mm – 12mm manual zoom lens. These can reach a distance of 30 metres with night vision.

Sorry this isn't illustrated on a drawing; I trust these details are sufficient, but please do let me know if you would benefit from anything else.

Thanks in advance,
Alex

Hi David,

Thanks for your email, and apologies for the delay coming back to you. I've been meaning to let you know I still don't have the requested drawing. The design chap at the shop fitters has been off sick, so it just hasn't been produced yet.

Please let's agree a further extension of time - I'm hoping to have the drawing on Monday, so perhaps we can talk then?

Thank again, and wishing you a good weekend,
Alex
