

Reading West Station NMA

Job No. 19111

15 June 2021

Application Reference 210938/NMA

Original Reference 201448

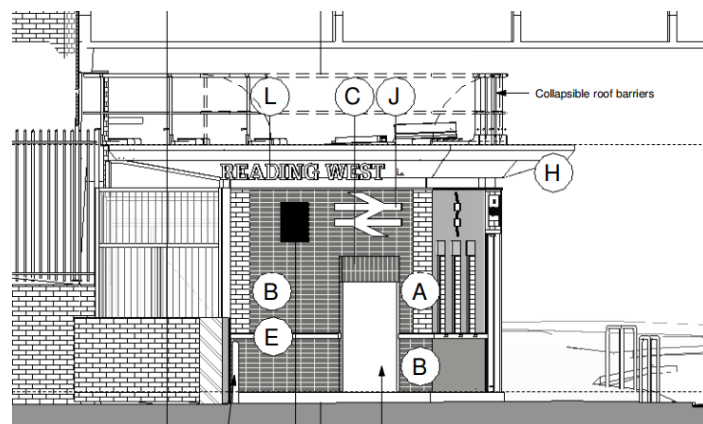

Outline of Proposed Elevational Changes

Minor amendment of the east and west elevations to increase the area of darker plinth bricks all the way to the roof line to better emphasise the street elevation viewed from along Oxford Road. This was guided by the Design Review Panel who felt a stronger emphasis was required to these key views of the station building. The signage has been similarly adapted to make it clear that this is a station building and a point of arrival.

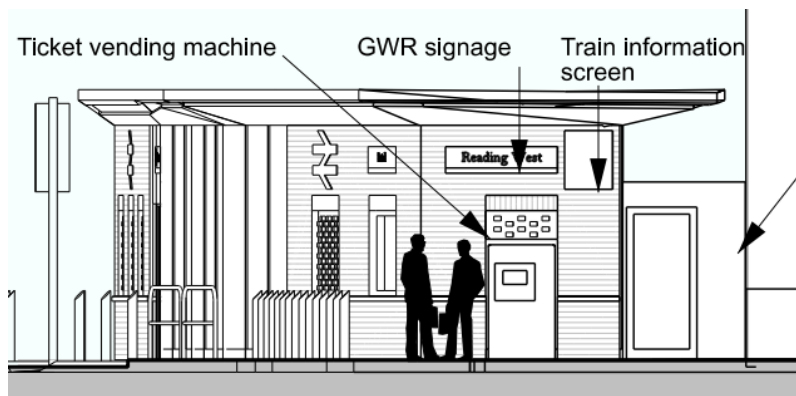

Note: the roof handrails will be folded flat against the roof when not in use for maintenance.

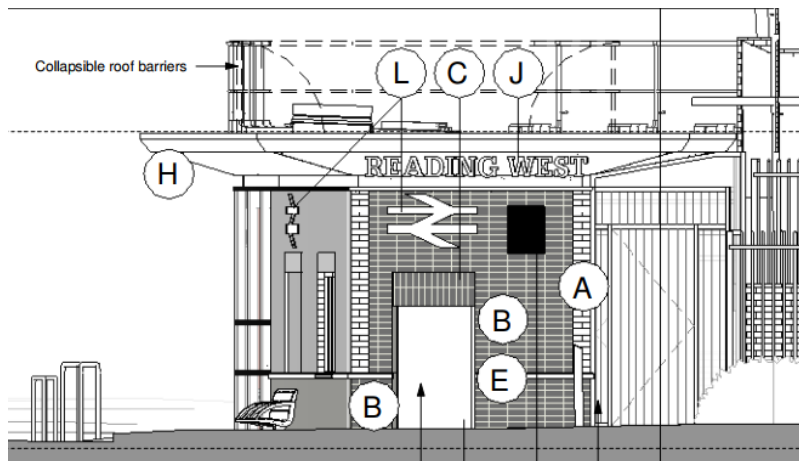

East Elevation: Extract from the approved drawing 2000

East Elevation: Extract from the proposed drawing 5006

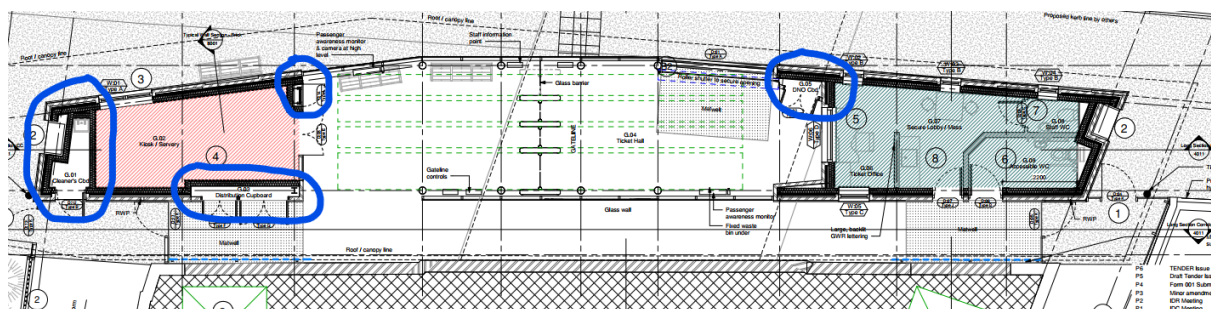

West Elevation: Extract from the approved drawing 2000

West Elevation: Extract from the proposed drawing 5006

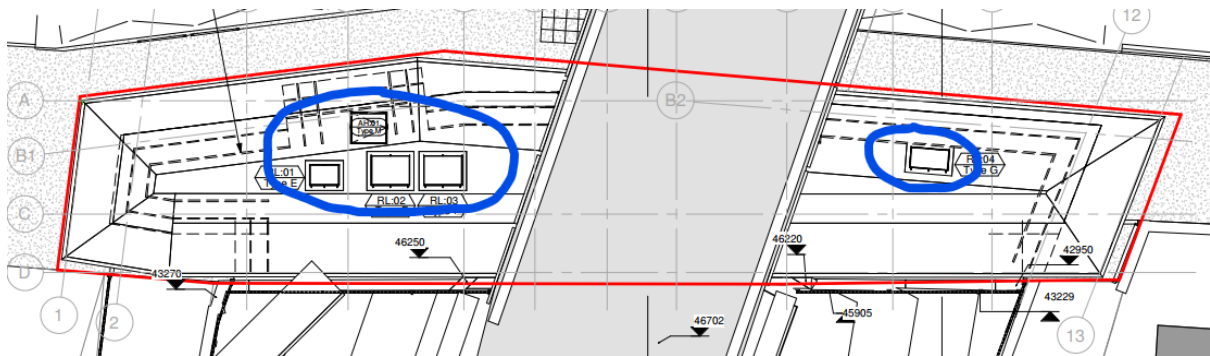

Summary of Proposed Internal Changes

These are to facilitate the servicing and maintenance of the building

- Cleaner's cupboard added on west end of the building
- Services cupboards added adjacent to the retail unit and ticket desk
- Roof access ladder added on the west wall of the ticket hall

Summary of Proposed Changes to the Roof plan

- Addition of 4 number rooflights for increased natural light inside the building
- 1 Roof access hatch to facilitate roof maintenance
