1 Introduction

1.1 Background

This Transport Statement has been commissioned by Maxika Homes Ltd to accompany a planning application submission to Reading Borough Council in support of a planning application for a redevelopment of the former DVSA Driving Test Centre at 220 – 222 Elgar Road, Reading. The proposal seeks to demolish the existing building and to replace this with 18 apartments and associated car parking. The Location of the site is shown below.

- 1.2 A pre-application submission was made to Reading Borough Council under reference 201146/PREAPP for a development of 22 apartments.
- 1.3 The submission provided limited information on highways and transportation, therefore generic comments were given by the highway officer. These can be summarised below.
 - The site is located in Zone 2 of the Primary Core Area of the Revised Parking Standards and Design SPD. This zone directly surrounds the Central Core and extends to walking distances of 2km from the centre of Reading. This zone is well served by public transport, with buses continuing either into or out of the Central Core Area via this Zone. In accordance with the adopted Parking SPD, the development would be required to provide 1 on site parking space per 1- 2 bedroom unit.

- In addition, 1 space per 10 dwellings will also be required for visitor parking. Should the developer require fewer spaces than are proposed then there would be a need to demonstrate to the highway authority's satisfaction that there would be no detriment to highway safety as a result.
- No site plan has been submitted illustrating any access points. It should be noted that access points into the site would need to be a minimum of 4.1m wide to enable vehicles to enter and exit the site. Visibility splays of 2.4m by 43.0m will need to be illustrated should a planning application be submitted.
- Any future application will require a tracking diagram to demonstrate that suitable turning can be undertaken for delivery vehicles to pass one another while entering and exiting the site.
- With regards to bin storage, it should be noted that these should not be located further than 15m from where the vehicles can wait to undertake collection.

1.4 This Transport Statement seeks to address the highway implications of the development and will demonstrate that the proposals are acceptable from a highway perspective.

2 Site Location and Existing Conditions

- 2.1 The site is located on Elgar Road South, a public highway which accommodates both residential and commercial property. The road is of conventional design having a wide carriageway with both controlled and uncontrolled on-street car parking. There is a wide continuous pedestrian footway on the western side of the road whilst a footway and grass exists on the eastern side. The road also benefits from street lighting.
- 2.2 To the south-east Elgar Road forms a junction with the B3031 which connects to the A33 Basingstoke Road to the south and the A327 / A329 to the north.
- 2.3 To the immediate north of the site, Elgar Road is stopped up to vehicular traffic and is effectively a cul de sac with a turning head formed with Park View.
- 2.4 Elgar Road continues beyond a set of bollards which allows for pedestrian and cycle access, where it meets Kitesgrove Lane and Reading Town Centre.
- 2.5 The nearest bus stops to the site are 700m north in Kitesgrove Lane. These stops serve the Reading Buses 11 Bronze Service. Additional stops are also 800m to the south of the site on Basingstoke Road which serve the 6 Emerald and 7 Tiger services.
- 2.6 The site currently has a lawful planning use as a DVSA Driving Test Centre with an access to the north on the site which takes the form of a Bell Mouth Junction. This serves a car parking area to the rear of the site which historically accommodated 21 car parking spaces.

3 Development Proposals

- 3.1 It is proposed to demolish the existing building on site and to replace this with a purpose built 3.5 storey building which will accommodate a total of 18 flats.
- 3.2 The apartments will consist of 9 number one bed and 8 number two bed units together with 1 three bed unit. A total of 12 car parking spaces will also be provided, including a disabled space, accessed from the existing junction onto Elgar Road.

4 Sustainable Transport Accessibility

- 4.1 A key part of the national, regional and local policy is to ensure that new developments are located in areas where sustainable travel modes are available. It is important to ensure that developments are not isolated, but are sited close to complementary land uses. This supports the aims of integrating planning and transport, providing more sustainable transport choices, and reducing overall travel and car use.
- 4.2 The accessibility of the proposed development is considered in this context for the following modes of travel:
 - Pedestrian accessibility
 - Accessibility by Cycle; and
 - Accessibility by Public Transport
- 4.3 **Pedestrian Accessibility** – Research has shown that acceptable walking distances depend on a number of factors, including the quality of the development, the type of amenity offered, the surrounding area, and other local facilities and services.
- 4.4 The Chartered Institute of Highways and Transportation (CIHT) document entitled **Providing for Journeys on Foot** suggests walking distances which are relevant to this proposal. These are demonstrated below.

	Town Centres (m)	Commuting / School / Sightseeing (m)	Elsewhere / Local Services (m)
Desirable	200	500	400
Acceptable	400	1000	800
Preferred Maximum	800	2000	1200

- 4.5 The site benefits from excellent local pedestrian infrastructure and many of the typical facilities and services that may be required by future residents are within an acceptable walking distance as demonstrated in the table below.

Destination	Distance (m)	Walking Time	Cycling Time
Convenience Store	500	6 mins	3 mins
Primary School	550	6 mins	3 mins

Hospital	1900	21 mins	10 mins
Railway Station	1900	21 mins	10 mins

- 4.6 **Cycle Accessibility** – Readings cycle network connects all the towns major public facilities, employment and leisure areas with almost 37 miles of principle routes, of which 17 miles are segregated from general traffic.
- 4.7 The National Cycle Route Network 4 is the Sustrans cycle route that connects Reading to Basingstoke. It runs along the banks of the Thames to the north and connects with NCN5 which runs to the west. Route 4 then runs south along Elgar Road, just north of the site, along the banks of the Kennet and Avon Canal where it heads west to Newbury.
- 4.8 NCN also connects with NCN 23 which runs through to Basingstoke and Winchester.
- 4.9 More locally, Readings Cycle Route 10 runs along Elgar Road past the site where it connects with NCN 4 to the north. An extract of the cycle route network in relation to the site is shown below, whilst the Reading Cycle Route Map is included as [Appendix 1](#) to this report.

4.10 **Accessibility to Public Transport** – The nearest bus stops to the site are 700m north in Kitesgrove Lane. These stops serves the Reading Buses 11 Bronze Service. Additional stops are also 800m to the south of the site on Basingstoke Road which serve the 6 Emerald and 7 Tiger services.

4.11 The details of the operators, destinations and frequency of services is shown below whilst the Bus Timetables are included as [Appendix 2](#).

4.12 **Rail Services** – The nearest railway station to the site is Reading Station, a 1.9 km, 21 minute walk to the north. The Station benefits from secure cycle lockers and cycle stands, protected with CCTV. Car parking is also available.

4.13 Services are run by Great Western Railways, Cross Country, Network Rail and Chiltern Rail with frequent services throughout the day and night, 7 days a week. These are listed below and the Trains timetables are included as [Appendix 3](#).

- 4.14 From the above it can be surmised that along with short walking distances to facilities and services, good cycling connections to local and national cycle routes, the site has excellent levels and frequencies of bus connectivity and train services.

5 Traffic Impact

- 5.1 This section looks at the likely traffic arising from the proposed use of 18 residential apartments and compares this with the previous permitted use as a DVSA Driving Test Centre.
- 5.2 The Test Centre was operational through to 2019 when the Driver Vehicle Standards Agency kept a record of the number of tests carried out at each testing centre in the country, together with the number of passes and failures. This information can be found at the following link
<https://www.gov.uk/government/statistical-data-sets/car-driving-test-data-by-test-centre>
- 5.3 From the data, it can be seen that in the year 2019 – 2020, the Test Centre undertook a total of 12192 tests which based on a 5 day week, equated to an average of 49 tests per day.
- 5.4 Learner drivers would drive to the test centre, where they would wait for their examiner to check their licenses before taking each learner on their driving test on the surrounding streets. Once the tests was complete, the learner driver would return to the Test Centre where they would be informed of their result. On receiving the result, the tested driver would depart.
- 5.5 The process of a learner driver taking a test would therefore result in 4 vehicular movements (2 in and 2 out) per test. Based on an average of 49 tests per day, the Test Centre would have generated a daily average of (4 x 49) 196 traffic movements. This does not include any allowance for traffic movements associated with the Driving Test Examiners.

- 5.6 In order to determine the likely vehicular traffic that the proposed residential development would generate, the TRICS database has been interrogated. Sites of between 20 and 40 privately owned flats were selected within town centre locations, excluding Central London. The TRICS data is shown below.

TRICS Trip Rate Flats (Privately Owned)			
	Arrivals	Departures	Two-way Total
AM Peak Hour	0.058	0.151	0.209
PM Peak Hour	0.173	0.158	0.331
Daily Traffic	0.858	0.930	1.788
TRICS Vehicle Trip Generation based 18 Units			
AM Peak Hour	1.044 (1)	2.718 (3)	4
PM Peak Hour	3.114 (3)	2.7 (13)	4
Daily Traffic	15.444 (15)	16.74 (17)	32

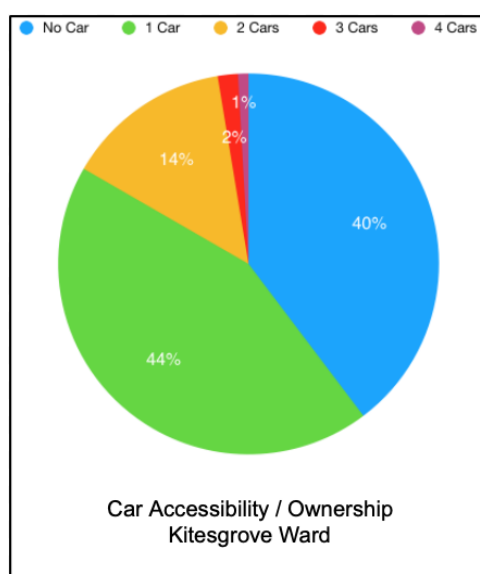

- 5.7 From the above, it can be seen that the proposed residential development is likely to generate just 4 vehicular movement in the AM peak, 4 in the PM peak and 32 daily traffic movements.
- 5.8 The central location to the Town Centre results in a minimal number of traffic movements that will not lead to any detrimental impact to the surrounding highway network or its existing users.
- 5.9 Comparing the likely traffic that the Driving Test Centre would have generated with that in the above table clearly demonstrates that if permitted, the 18 apartments would have a significant decrease in traffic on the surrounding highway network. The TRICSC data is included as [Appendix 4](#) to this report.

6 Car and Cycle Parking

- 6.1 The requirements for car and cycle parking in the Reading borough are set out in Revised Parking Standards and Design Supplementary Planning Document 2011. This document is based on an accessibility zonal approach and this site falls within Zone 2, Primary Core Area.
- 6.2 The parking standards within the SPD are given as maximum standards and, in this case, a maximum parking standard of 1 space per unit would be permissible, which based on 18 units would allow 18 parking spaces. This development seeks to provide 12 parking spaces, including one disabled space.
- 6.3 RBC recognise that in certain situations, parking can be provided on a more flexible basis where alternative transport measures adequacy serve the site. The Parking SPD says “*should a developer require fewer spaces than are set out here then there would need to be a demonstration, to the highway authority’s satisfaction, that there would be no detriment to highway safety as a result.*”
- 6.4 As set out in Section 4 above, the site is located within a highly accessible part of Reading which benefits from excellent access to:
- A high frequency local bus network;
 - The second busiest railway station in the country that provides direct connections to Central London and other principal Thames Valley towns;

- The Reading Cycle Network, which connects the site with the town centre and key local employment areas, and;
- A range of employment, leisure, retail, educational and health facilities within recognised walking / cycling distance.

6.5 The site lies within the Kitesgrove ward of Reading and in order to establish the level of vehicular ownership in this ward, the 2011 Census Data has been researched. The chart below shows ownership or accessibility to a car or van within the Kitesgrove Ward.

- 6.6 From the above, it can be seen that within the Kitesgrove ward, 84% of residents have accessibility to just 1 or no vehicles.
- 6.7 On street car parking is available but is restricted to 1 hour between the hours of 0800 and 1830 hrs Monday to Saturday. Outside of these hours, parking is unrestricted. It is therefore considered that the availability of the on street parking can adequately accommodate the parking needs of any visitors to the site.
- 6.8 Given the above, it is considered that the number of parking spaces now provided is acceptable given the highly accessible nature of the site, the reduction in traffic movements that the proposed development will now generate and the car ownership data for the Kitesgrove ward.
- 6.9 Secure undercover cycle parking is also being provided in the form of an integral store within the new building.

7 Access and Servicing

- 7.1 Access to the site is to be from the existing access to the north which takes the form of a bell mouth junction. Historically this access has accommodated an average of some 200 traffic movements on a daily basis, however it has been demonstrated that the number of traffic movements associated with this development would see a significant decrease.

- 7.2 Advice on visibility at accesses is given within the document Manual for Streets. In this case, given the 30mph speed limit that is imposed on Elgar Road, visibility splays of 2.4m by 43.0m would be required. On site observations have shown that given the site location to the end of the cul de sac, traffic speeds are extremely low. Notwithstanding this, there is a 3.0m wide footway that fronts the site which easily accommodates the visibility requirements of MfS and this is demonstrated below.

Existing Access looking North

Existing Access looking South

- 7.3 Access to the site therefore fully complies with the requirements of Manual for Streets.
- 7.4 With regards to servicing of the site, it is expected that the most frequent deliveries will be made by Transit type vehicles. It is likely that given the available parking to the front of the site, most deliveries will take place from Elgar Road, however it is recognised that some vehicles will be brought onto the site.
- 7.5 Drawing numbered NJC-002 is therefore attached as [Appendix 5](#) which demonstrates the ability of such a vehicle to be driven into the site, turn and leave in forward gear. A dedicated turning area is provided within the parking area which will be adequately signed as a turning area, to avoid this being used for car parking.
- 7.6 An integral refuse store is also included within the new building and this is located adjacent to the 5.0m wide access road. Given the physical constraints of the site, it is not possible for a refuse vehicle to be driven in and turned, so as to enter and leave the highway in forward gear.
- 7.7 The layout of this scheme allows for a refuse vehicle to reverse into the site, up to the refuse storage area where bins can be emptied clear of the public highway. The refuse vehicle is then able to drive out in forward gear, and this is demonstrated on drawing numbered NJC-001 included as [Appendix 6](#) to this report.
- 7.8 It is therefore considered that adequate provision has been made for the likely servicing needs of the development.

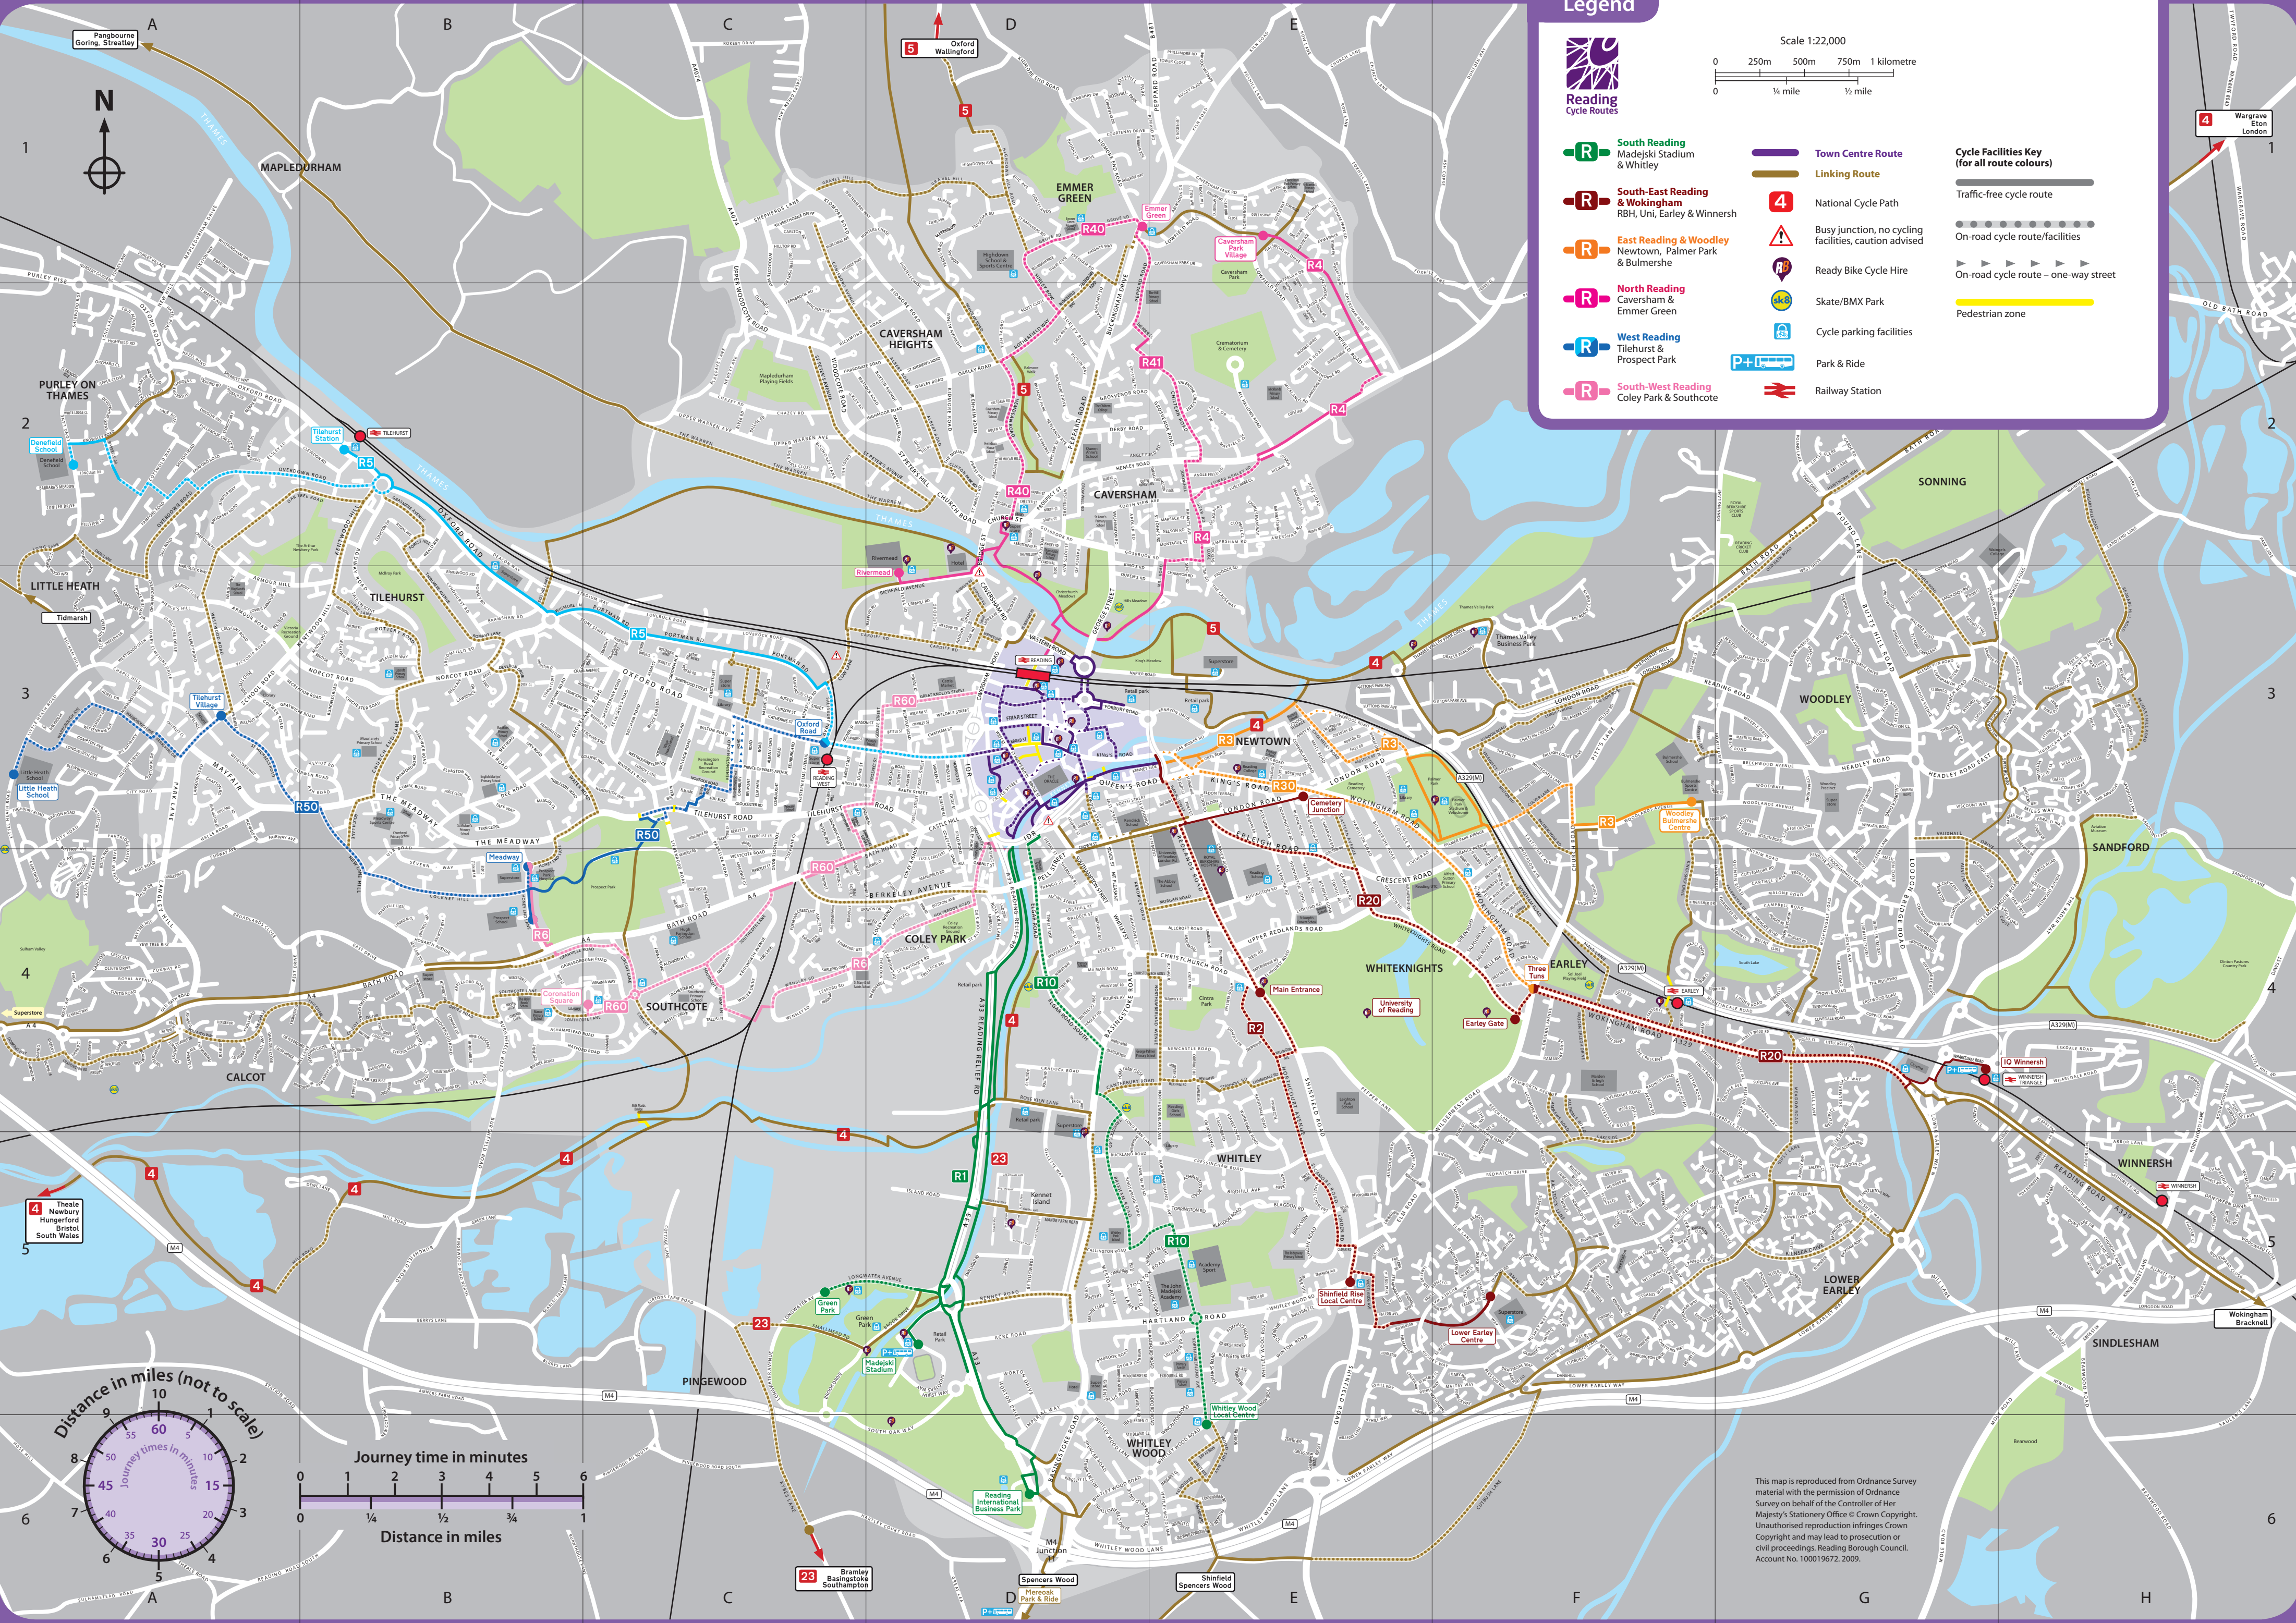

8 Summary and Conclusions

- 8.1 This Transport Statement has been commissioned to accompany a planning application submission in support of a redevelopment of the former DVSA Driving Test Centre at 220 – 222 Elgar Road, Reading.
- 8.2 The site benefits from short walking distances to facilities and services, good cycling connections to local and national cycle routes and has excellent levels and frequencies of bus connectivity and train services.
- 8.3 It has been demonstrated through the use of historical DVSA data and TRICS data that the redevelopment of the site as a Residential use will result in a significant decrease in vehicular traffic on a daily basis.
- 8.4 The number of car and cycle parking spaces provided is considered to be appropriate given the highly sustainable location of the site and the likely demand for car ownership.
- 8.5 Adequate provision has been made for the service vehicle requirements of the site, likely to be generated on a daily basis.
- 8.6 The development is therefore considered to be fully in accordance with National, Regional and Local Planning policies and will not result in any demonstrable harm to the safe operation of the adjoining public highway.

Seat reservations on GWR services

 **(Shown on our Intercity Express Trains)**

When you try and buy a ticket, we will allocate you a seat if one is available. However, if all the seats are already reserved, you won't be able to buy a ticket online for that service.

We leave some space for those with walk-up tickets, or who may have been disrupted.

If you buy a ticket on the day of travel, we may allocate you a space instead of a specific seat. Sit in any unreserved seat in your class of travel, social distancing as best you can.

 **(Shown on our other trains)**

We will reserve you space on board, rather than a specific seat. Sit in any unreserved seat in your class of travel, social distancing as best you can.

Our seat guarantee

If you have a reservation on a GWR service and have to stand, you are entitled to compensation. Find out more at [GWR.com](#)

Seat reservations on GWR services

 **(Shown on our Intercity Express Trains)**

When you try and buy a ticket, we will allocate you a seat if one is available. However, if all the seats are already reserved, you won't be able to buy a ticket online for that service.

We leave some space for those with walk-up tickets, or who may have been disrupted.

If you buy a ticket on the day of travel, we may allocate you a space instead of a specific seat. Sit in any unreserved seat in your class of travel, social distancing as best you can.

 **(Shown on our other trains)**

We will reserve you space on board, rather than a specific seat. Sit in any unreserved seat in your class of travel, social distancing as best you can.

Our seat guarantee

If you have a reservation on a GWR service and have to stand, you are entitled to compensation. Find out more at **GWR.com**

Seat reservations on GWR services

 **(Shown on our Intercity Express Trains)**

When you try and buy a ticket, we will allocate you a seat if one is available. However, if all the seats are already reserved, you won't be able to buy a ticket online for that service.

We leave some space for those with walk-up tickets, or who may have been disrupted.

If you buy a ticket on the day of travel, we may allocate you a space instead of a specific seat. Sit in any unreserved seat in your class of travel, social distancing as best you can.

 **(Shown on our other trains)**

We will reserve you space on board, rather than a specific seat. Sit in any unreserved seat in your class of travel, social distancing as best you can.

Our seat guarantee

If you have a reservation on a GWR service and have to stand, you are entitled to compensation. Find out more at **GWR.com**

Seat reservations on GWR services
 **(Shown on our Intercity Express Trains)**
When you try and buy a ticket, we will allocate you a seat if one is available. However, if all the seats are already reserved, you won't be able to buy a ticket online for that service.
We leave some space for those with walk-up tickets, or who may have been disrupted.
If you buy a ticket on the day of travel, we may allocate you a space instead of a specific seat. Sit in any unreserved seat in your class of travel, social distancing as best you can.

 **(Shown on our other trains)**
We will reserve you space on board, rather than a specific seat. Sit in any unreserved seat in your class of travel, social distancing as best you can.

Our seat guarantee
If you have a reservation on a GWR service and have to stand, you are entitled to compensation. Find out more at [GWR.com](#)

Seat reservations on GWR services
 **(Shown on our Intercity Express Trains)**
When you try and buy a ticket, we will allocate you a seat if one is available. However, if all the seats are already reserved, you won't be able to buy a ticket online for that service.

We leave some space for those with walk-up tickets, or who may have been disrupted.

If you buy a ticket on the day of travel, we may allocate you a space instead of a specific seat. Sit in any unreserved seat in your class of travel, social distancing as best you can.

Weekend timetables

Train times are often changed at weekends to enable maintenance work to be carried out. The times shown in this timetable are a guide to our services, and you should confirm your train times online prior to travelling: [GWR.com/Check](https://www.gwr.com/Check)

Travelling after midnight?

Additional services may be found at the start of the timetable

Amended timetables

Due to the impact of Covid-19, all train times are liable to change at short notice. In addition, we have removed connecting services as these cannot be guaranteed, and catering may not be available as advertised. If your journey is for essential work or other legally permitted reasons, please check your journey at [GWR.com/Check](https://www.gwr.com/Check) the day before you travel.

Contactless payment is valid at all stations on the direct line of route between London Paddington and Reading.

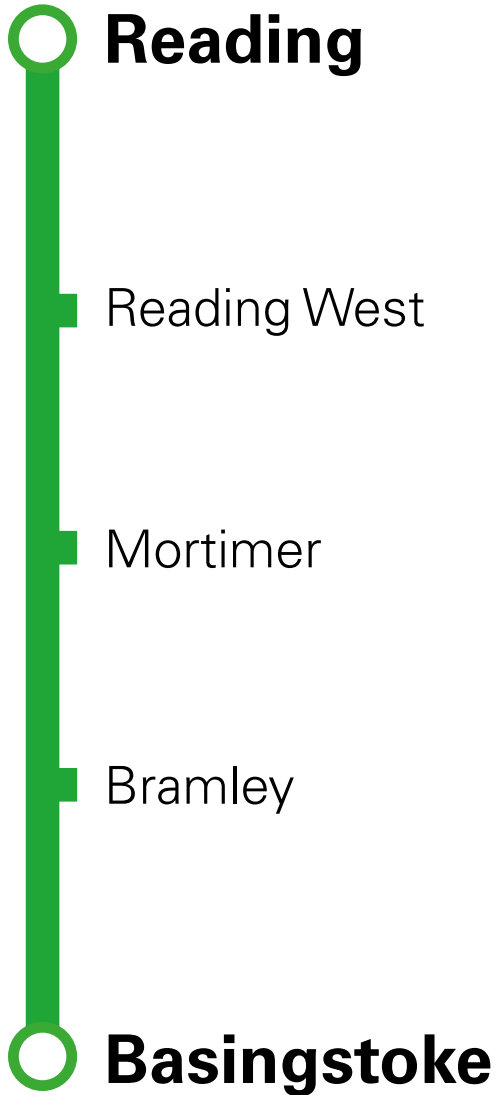

Contactless customers wishing to travel on the Henley-on-Thames, Marlow and Windsor branch lines, or beyond Reading, will need to 'tap in' or 'tap out' at the gateline of the mainline station and be in possession of a normal ticket for the rest of their journeys. Railcards or other discounts can't be used with Contactless payment.

Seat reservations on GWR services

 **(Shown on our Intercity Express Trains)**

When you try and buy a ticket, we will allocate you a seat if one is available. However, if all the seats are already reserved, you won't be able to buy a ticket online for that service.

We leave some space for those with walk-up tickets, or who may have been disrupted.

If you buy a ticket on the day of travel, we may allocate you a space instead of a specific seat. Sit in any unreserved seat in your class of travel, social distancing as best you can.

 **(Shown on our other trains)**

We will reserve you space on board, rather than a specific seat. Sit in any unreserved seat in your class of travel, social distancing as best you can.

Our seat guarantee

If you have a reservation on a GWR service and have to stand, you are entitled to compensation. Find out more at [GWR.com](#)

This section displays the trip rate results based on the selected set of surveys and the selected count type (shown just above the table). It is split by three main columns, representing arrivals trips, departures trips, and total trips (arrivals plus departures). Within each of these main columns are three sub-columns. These display the number of survey days where count data is included (per time period), the average value of the selected trip rate calculation parameter (per time period), and the trip rate result (per time period). Total trip rates (the sum of the column) are also displayed at the foot of the table.

To obtain a trip rate, the average (mean) trip rate parameter value (TRP) is first calculated for all selected survey days that have count data available for the stated time period. The average (mean) number of arrivals, departures or totals (whichever applies) is also calculated (COUNT) for all selected survey days that have count data available for the stated time period. Then, the average count is divided by the average trip rate parameter value, and multiplied by the stated calculation factor (shown just above the table and abbreviated here as FACT). So, the method is: $COUNT/TRP*FACT$. Trip rates are then rounded to 3 decimal places.

This section displays a quick summary of some of the data filtering selections made by the TRICS® user. The trip rate calculation parameter range of all selected surveys is displayed first, followed by the range of minimum and maximum survey dates selected by the user. Then, the total number of selected weekdays and weekend days in the selected set of surveys are shown. Finally, the number of survey days that have been manually removed from the selected set outside of the standard filtering procedure are displayed.
