RE: PLANNING PERMISSION REF: 200343 - CONDITION 7 LITTER STRATEGY.

Condition 7: Prior to the first occupation of any Class A5 use hereby permitted, details of a litter strategy shall be submitted to and approved in writing by the Local Planning Authority. The approved measures within the strategy shall be implemented prior to the first occupation of the Class A5 use and be permanently retained and maintained thereafter.

Litter Strategy:

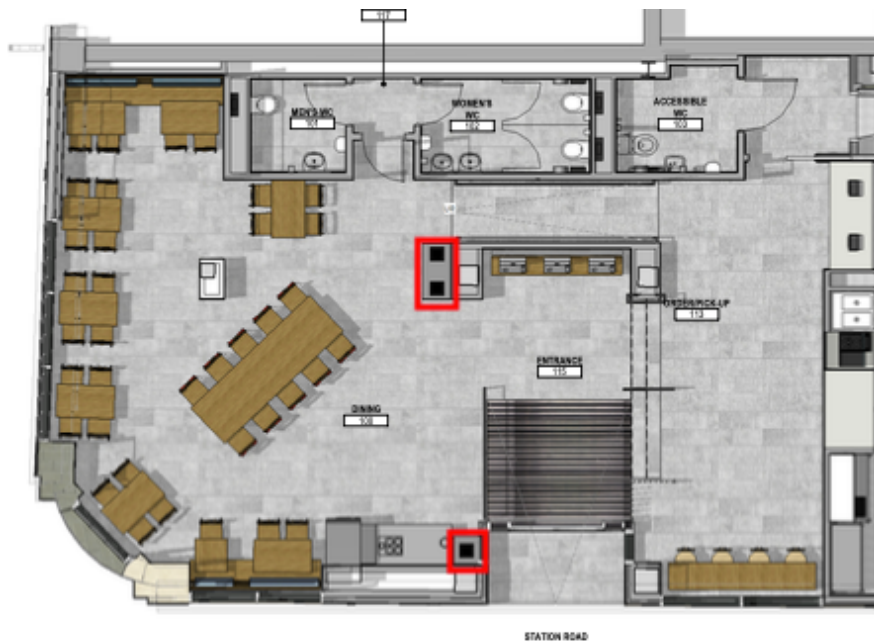

The restaurant provides seating for customers to consume their food and drink purchase, with a number of waste and recycling points located at key locations within the restaurant - please refer to drawing A1.15-B.

Our standard operational guidelines require staff to check for litter within the restaurant throughout the day.

- During operational day, staff will complete a minimum of four external litter patrols per day: outside restaurant opening,
- prior to lunch 'rush',
- prior to dinner 'rush' and
- restaurant close.

covering the immediate area outside the premises to a maximum radius of 100 metres.

Full details as to both the location of litter bins within the premises and also the placement of signage visible to customers leaving the premises requesting that they dispose of their rubbish responsibly will be provided within the premises.

Note: The impacts of COVID-19 in terms of changing consumer demand in the food and beverage market are unknown, we suspect the majority of A5 use will be in the form of aggregator delivery (i.e. Deliveroo, Uber Eats), rather than consumers collecting and eating off-premises
