

Step 1: Remove & replant Trees/shrubs

Step 2: Erect Hoarding/Fence for Mastclimber

Step 3: Install Site Compound (power up and connect Water/Sanitation)

Step 3: Install Mastclimber within fenced-off Compound

Step 3a: extend of Site setup and Mastclimber on North-Tower:

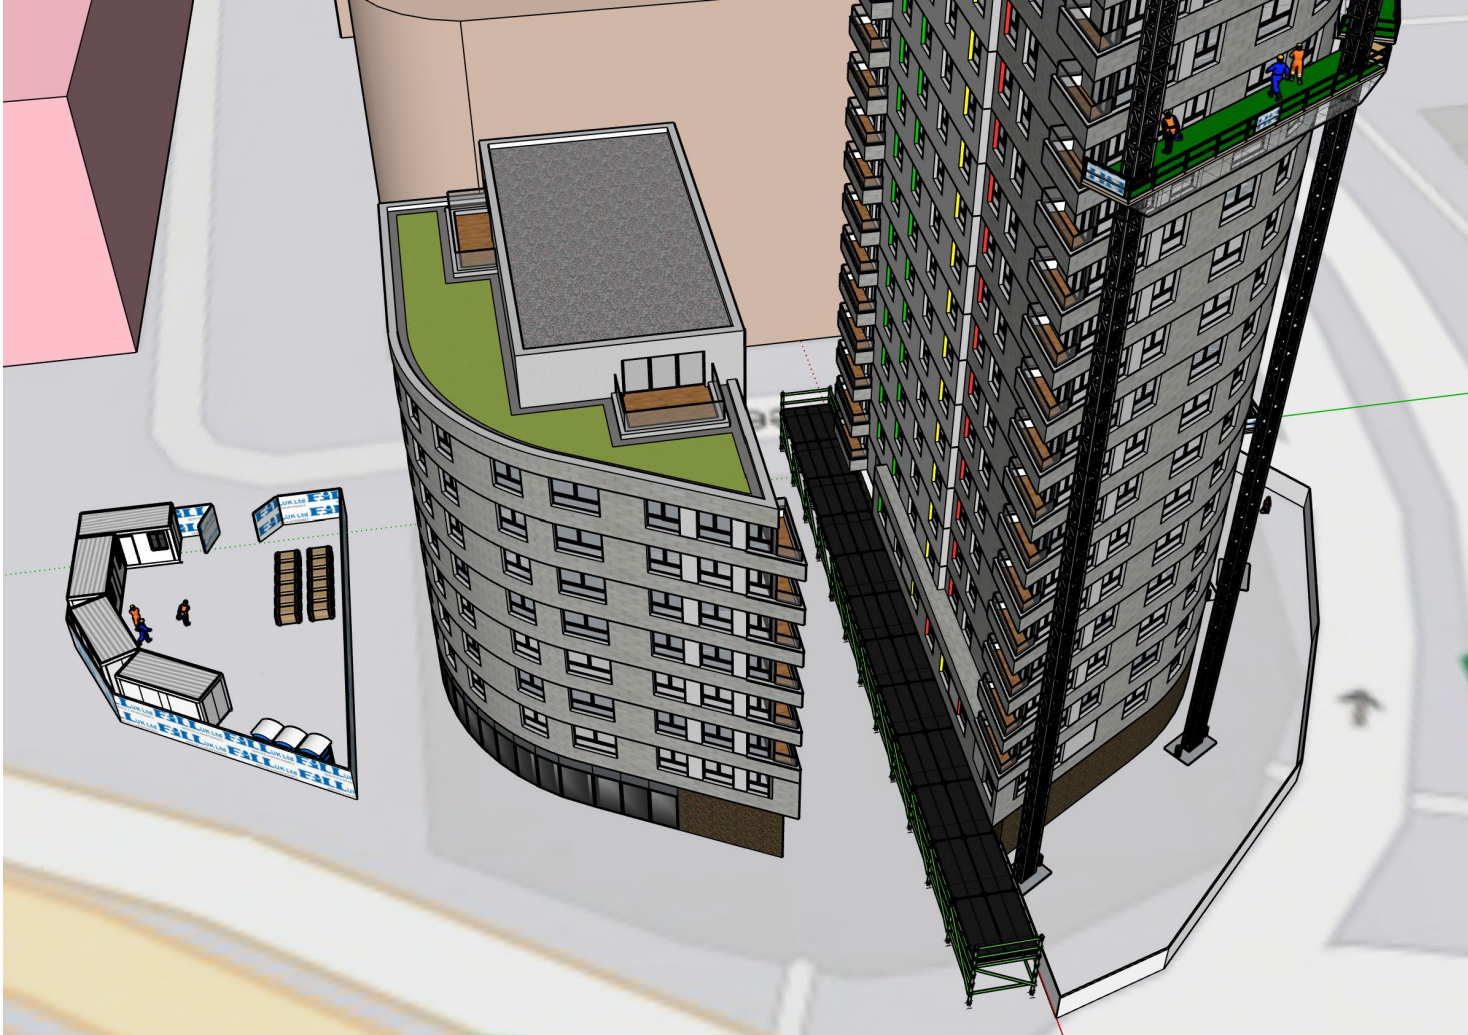

Please Note:

At this point there is NO activity on South Tower (and is not intended until South Tower repairs are complete and Access is transferred)

This is to allow Residents maximum time without obstruction (visually and mechanically)

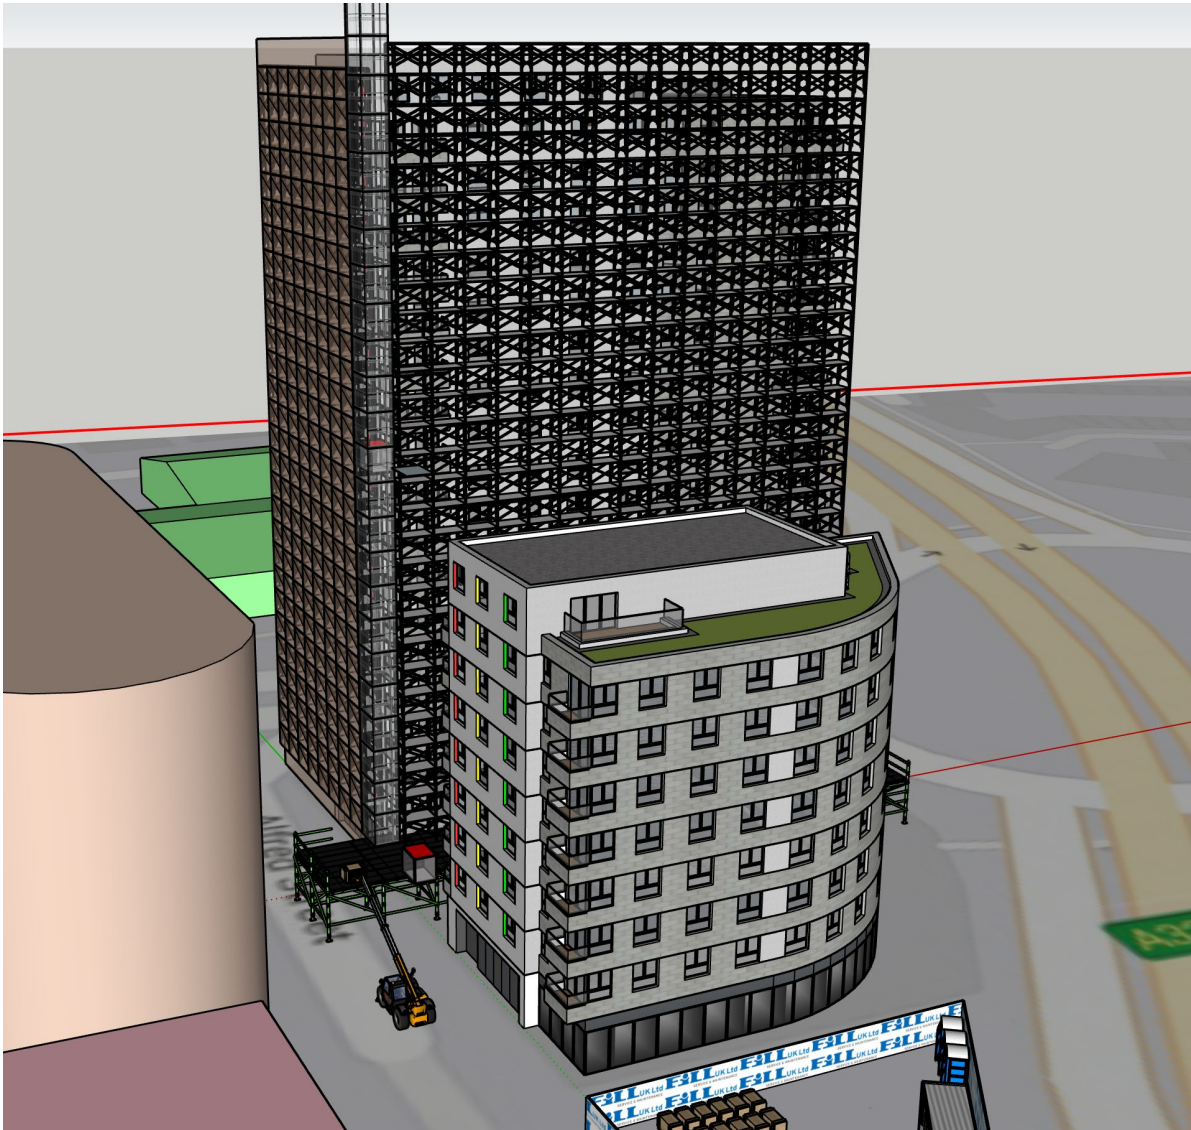

Step 4: erect Crashdeck in Courtyard and Alfred Street (ready to receive full height Scaffold)

Please Note:

At this point there is NO activity on South Tower (and is not intended until South Tower repairs are complete and Access is transferred)
This is to allow Residents maximum time without obstruction (visually and mechanically)

Step 4: erect Crashdeck in Courtyard and Alfred Street (ready to receive full height Scaffold)

Please Note:

Scaffold dismantled from North Tower to be used to provide full Scaffold access on South Tower (All Elevations!!)

Please Note:

Sequence for repairs are now repeated in the same sequence as outlined for North Tower
