EXECUTIVE SUMMARY

The site is currently occupied by a four storey Victorian building with a single retail unit on the ground floor and office space on the upper levels. The site is approximately 0.02 hectares (ha) and is bounded by retail units to the north, west and east, with Oxford Road and further retail units to the south.

The office building is to be converted to a residential end use under a prior approval application under permitted development rights. The internal layout of the building will change, as the alterations will be required to accommodate the proposed residential use. The retail unit on the ground floor is to be retained.

This Preliminary Risk Assessment (PRA) has been undertaken to develop a preliminary conceptual site model identifying potential ground contamination risks, to evaluate the likely significant risks.

It should be noted that this executive summary does not form a standalone document and should be read in conjunction with the WSP Preliminary Risk Assessment (Ref: 70072085-PRA).

ENVIRONMENTAL SETTING

The ground profile at the site is likely to comprise the Taplow Gravels overlying the White Chalk Subgroup. In addition, Made Ground associated with historical building structures is likely to be encountered on-site.

The Taplow Gravels are classified as a Secondary (A) Aquifer and the White Chalk Subgroup as a Principal Aquifer.

Groundwater is expected to be encountered within the fractures in the White Chalk Subgroup. It is anticipated that groundwater flow is generally in an easterly direction.

An unnamed surface water feature is located 339m south east of the site. The River Kennet, a tributary of the River Thames, is also located approximately 454m south east of the site.

POTENTIAL FOR GROUND CONTAMINATION

Potential on-site sources of contamination have been identified at the current site associated with the historical and current office buildings located on-site.

Potential off-site sources of contamination include historical petrol filling stations and surrounding current and historical industrial land uses.

Plausible contaminant linkages have been identified with respect to human health predominantly relating to potential inhalation of asbestos fibres and inhalation of/contact with ground gas/vapours. During and following the redevelopment of the site receptors would include construction/maintenance workers and future site users (residents). As no ground will be broken as a result of the

proposed works, dermal contact, inhalation or ingestion of soils and dust is not considered to be a plausible contaminant linkage, therefore this risk is avoided. The risk of contact with asbestos within the building remains.

Plausible contaminant linkages identified to controlled waters include the possibility of leaching of contaminants from the unsaturated zone, lateral migration of contaminants in surface water on to, and off of the site and lateral migration of contaminated groundwater from up gradient off-site sources on to the site.

Under the proposed development, potential receptors were identified as:

- Current and future site users;
- Neighbouring site users;
- Construction and maintenance workers;
- Groundwater in the Taplow Gravels (Secondary (A) Aquifer) and the White Chalk Subgroup (Principal Aquifer);
- Unnamed surface water feature and the River Kennet, a tributary of the River Thames;
- Site structures, particularly foundations, of existing buildings; and
- Water supply pipes.

WSP considers that the main contamination risk at the site arises from the presence of potential asbestos within the building fabric. There is limited potential for contamination arising from Made Ground associated with the former and current on-site structures (office buildings). However, as no ground will be broken as a result of the proposed works, this risk is avoided.

In conclusion, the preliminary risk assessment indicates generally a **low** risk to human health, apart from a **moderate** risk to construction workers during the building refurbishment due to the likely presence of asbestos. There is a **low** risk to controlled waters and site structures.

RECOMMENDATIONS

WSP recommends the following is undertaken as part of the redevelopment process:

- Undertake a management asbestos survey to allow the creation of an Asbestos Management Plan; and,
- Prior to refurbishment of the building, a Refurbishment and Demolition Asbestos survey would also be required.

During the refurbishment works if ground is broken, WSP recommends that appropriate measures are undertaken by the contractor to mitigate the risk of contact with potentially contaminated ground.

It should be noted that this assessment has been carried out assuming that none, or very limited, intrusive groundworks are intended at this site. If the proposed refurbishment changes significantly in scope, this assessment should be reviewed and updated.

1 INTRODUCTION AND OBJECTIVES

1.1 AUTHORISATION AND PURPOSE OF ASSESSMENT

WSP was instructed by Aston Rose (“the client”) to undertake a Preliminary Risk Assessment (PRA) at 40 Oxford Road, Reading, RG1 7LA (“the site”) as shown **Figure 1**, in **Appendix A.1**, **Figure 2**, **Appendix A.2** and **Figure 3** **Appendix A.3**.

1.2 PROPOSED DEVELOPMENT

The site is currently occupied by a four storey Victorian building with a single retail unit on the ground floor and office space on the upper levels. The site is approximately 0.02 hectares (ha) in plan area and is bounded by retail units to the north, west and east, with Oxford Road and further retail units to the south.

The office building is to be converted to a residential end use under a prior approval application under permitted development rights. The internal layout of the building will change, as the alterations will be required to accommodate the proposed residential use. The retail unit on the ground floor is to be retained. A copy of the masterplan is included in **Appendix A.4**.

1.3 OBJECTIVES

The key objectives of this assessment are to:

- Develop a preliminary conceptual site model (pCSM) to identify potential ground contamination risks associated with the site; and
- Evaluate the likely significance of risks associated with potential ground contamination through a contaminant linkage assessment for the proposed residential end use

1.4 SCOPE OF WORKS

The scope of works undertaken in this assessment comprises:

- A request for all service plan information and the location/integrity of drainage, interceptors, tanks and other site uses such as storage of raw materials and the presence of substations, etc.;
- A review of documentation provided by the client containing information on the current land use and site setting;
- Provision and review of a Landmark Envirocheck Report;
- Review of regulatory databases and the local council planning website and informal enquiries with the Environment Agency (EA) and Contaminated Land Officer (CLO);
- Review of relevant publicly available information relating to hydrological features, hydrogeology, neighbouring land use, ecologically sensitive uses and geology in order to establish the environmental setting of the site and sensitivity of the location;
- Development of a preliminary Conceptual Site Model (CSM) via the source-pathway-receptor contaminant linkage approach; and
- An outline assessment of environmental risks with respect to ground, groundwater and ground gas conditions associated with the proposed change of use of the site.
- An outline of environmental risks with respect to ground, groundwater and ground gas conditions, which may potentially arise as liabilities or constraints.

This report has been prepared in general accordance with:

- Part 2A, Environmental Protection Act 1990;
- Environment Agency 'Model Procedures for the Management of Land Contamination', CLR11. 2004; and
- The National Planning Policy Framework.

The report contains British Geological Survey (BGS) and EA information.

1.5 LIMITATIONS

This report is addressed to and may be relied upon by the client (Aston Rose). It may not be relied upon or transferred to any other parties without the express agreement of WSP in writing. The report should be read and used in full. No responsibility will be accepted where this report is used, either in its entirety or in part, by any other party. WSP cannot be held liable for third party information. The limitations of the assessment are attached in **Appendix B**.

This assessment has been carried out assuming that no intrusive groundworks are intended at this site. If the proposed refurbishment changes significantly in scope this assessment should be reviewed and updated to reflect the latest development proposals.

2 SITE RECONNAISSANCE

2.1 SITE DESCRIPTION

The site location is provided as **Figure 1 (Appendix A.1)** and a site layout plan as **Figure 2 (Appendix A.2)**. Due to the ongoing Covid-19 situation, a site visit was not possible due to health and safety restrictions. Therefore, site details were provided by the client, and are included in **Table 1** below.

Table 1 - Site Information provides information relating to the site obtained from a review of Ordnance Survey (OS) mapping, online aerial photography, and relevant regulatory information contained within the Envirocheck Report.

Table 1 - Site Information

Details	Description
Name and address of site	40 Oxford Road, Reading, RG1 7LA
Grid reference	471150, 173440
Size	0.02 Ha
Site description and current use	The site comprises a four storey Victorian built brick building. The ground floor is a commercial unit, currently a Pizza delivery store, Red Planet Pizza. This commercial unit will remain unaltered during the redevelopment. The first, second and third floors are occupied by offices with associated WCs. It is assumed that kitchens units are present within the offices. The offices are accessed via a staircase on the eastern side of the building. Currently the building has no heating system, therefore there are no sub stations, generators or plant rooms on site. No fuel or above and below ground tanks are present on site. There are also no records of historic spills.
Ground cover	The majority of the site is covered by the office building footprint. Hardstanding is present over the remaining area of the site, including the access route from Thorn Street in the northern section of the site.
Trees and invasive species	No invasive species have been noted.
Topography	The site is generally flat and level.

Bulk material storage	Currently the building has no heating system, therefore there is no bulk material storage on site.
Polychlorinated biphenyls (PCBs)	No substations are present on site.
Waste storage	Waste, anticipated to be from the commercial unit is stored in an informal area in the rear yard, located in the northern section of the site.
Asbestos containing materials (ACMs)	Currently the site does not have an asbestos management plan. However, as the building was constructed pre 2000, it is assumed that asbestos is present in some form within the building matrix.
Nearby features	North: Retail buildings. East: Retail building and Cheapside Road. West: Retail units including M&M Barbers and Beadle Crome Interiors. South: Oxford Road, leading to more retail units and adjacent car park.

3 HISTORICAL POTENTIALLY CONTAMINATIVE LAND USES

3.1 SITE HISTORY

The history of the site and local environs has been reviewed and determined with reference to Ordnance Survey maps contained within the Envirocheck Report (Ref: 24062340_1_1). A study has been undertaken to identify potentially contaminative former land uses. The following section provides a summary of this information and the Envirocheck Report is attached as **Appendix C**.

ON-SITE

Table 2 - On-site historical map review

Date of Mapping	Scale	Feature
1878	1:2,500	The site comprised a residential building, potentially with the current external building layout.
1879	1:500	No apparent change.
1883	1:10,560	No apparent change.
1899	1:2,500	No apparent change.
1900	1:10,560	No apparent change.
1901	1:10,560	No apparent change.
1911	1:2,500	No apparent change, however the northern section of the site was part of the adjacent building, the Palace Theatre.
1913	1:10,560	No apparent change.
1931	1:2,500	No apparent change.
1932	1:20,560	No apparent change.
1938	1:10,560	No apparent change.
1948	1:10,560	No apparent change.
1956	1:1,250	No apparent change.
1961	1:10,000	No apparent change.
1962	1:1,250	No apparent change, however the site is now numbered as 40.
1968	1:1,250	No apparent change.
1973	1:1,250	No apparent change.
1977	1:1,250	No apparent change.
1980	1:1,250	No apparent change.

Date of Mapping	Scale	Feature
1990	1:10,000	No apparent change.
1993	11,250	No apparent change.
1995	1:10,000	No apparent change.
1999	Aerial Photograph	No apparent change.
2003	1:10,000	No apparent change.
2009	1:10,000	No apparent change.
2013	1:10,000	No apparent change.
2020	1:10,000	No apparent change.
2020	Aerial Photograph	No apparent change.

OFF-SITE

Table 3 - Off-site historical features within 250m

Name	Direction	Approx. Distance (m)	Years feature observed
Residential properties and adjoining roads	E & W	0	1878 to Present
Residential properties	N	0	1878 to 1911
Road (named Oxford Road from 1956)	S	0	1878 to Present
Palace Theatre (renamed Northern Rock in 1968 and Liverpool Victoria House in 1993)	N	0	1911 to Present
Club	W	0	1962 to 1993
Cheapside Road	E	8	1911 to Present
Tramway	S	10	1911 to 1932
Odeon Cinema	N	24	1956 to Present
Arcade	E	24	1968 to Present
Car Park	S	39	1956 to 1977
Hotel	SW	42	1977 to Present
Reading Union Office	N	44	1878 to 1956
Steam Saw Mills	S	45	1878 to 1956

Name	Direction	Approx. Distance (m)	Years feature observed
Car Park	N	53	1956 to 1999
Church	N	56	1931 to 1956
Register Office	N	60	1956 to 1962
West Street Hall	NE	64	1878 to 1956
Roundabout	NW	64	1977 to Present
Broad Street Mall and Car Park	S	70	1977 to Present
Timber Yard	SE	78	1911 to 1931
Garage	S	81	1956 to 1973
West Street	E	110	1878 to 1899
Car Park	N	118	1956 to 1968
Greyfriars School	N	126	1878 to Present
Greyfriars Church	NE	139	1878 to Present
Fire Station	SE	146	1899 to 1956
Multi-storey car park	W	152	1962 to Present
Bus Depot	NW	161	1956 to 1988
St Mary's School	SE	169	1878 to 1968
Providence Chapel	SW	187	1878 to Present
Chapel	SE	191	1878 to 1956
Civic Centre	SW	193	1990 to Present
Augustine Chapel	E	212	1878 to 1956
Sub Station	SW	216	1993 to Present
Warehouse	W	220	1956 to 1993

A number of public houses and inns were also present between 1899 and 1956, within 250m of the site to the south-west, south-east, north and east. Also, a number of halls were present between 1913 and 1962 to the north-east of the site and three garages to the north-west between 1956 and 1968.

4 ENVIRONMENTAL SETTING

4.1 GEOLOGY AND HYDROGEOLOGY

The BGS Map Sheet 1268 – Reading (1:50,000, 2000) has been reviewed and the underlying geology is present in **Table 4** together with EA aquifer designations for the relevant geological units.

Table 4 - Geological Mapping Summary

Geological unit	Location on-site	Description	Aquifer designation
Taplow Gravel	Entire site	Sand and gravel, locally with lenses of silt, clay or peat	Secondary (A) Aquifer
White Chalk Subgroup	Entire site	Chalk, white, nodular and soft with flint seams.	Principal Aquifer

Eight historical BGS boreholes are located within 100m and have been reviewed below. These boreholes generally confirm the expected on-site sequence. The depth and thickness of the strata encountered are summarised in **Table 5** and, the locations are presented on **Figure 3 – Appendix A.3** and the logs are attached in **Appendix D**.

Table 5 - BGS Borehole Summaries

Borehole	Location	Strata encountered	From – to depth (m bgl)	Water Strike (m)
SU77SW47	47m north east	Terrace gravel Upper chalk, much flint	0 – 1.1 1.1 - 44	5
SU77SW864	35m south	Fill (brick rubble, loose gravel and brown clay) Soft brown silty CLAY Loose to dense medium to large flint GRAVEL Angular CHALK fragments in a matrix of clayey chalk Very fissured white CHALK, rather hard and fine grained, becoming less fissured with depth	0 – 1.8 1.8 – 2.4 2.4 - 5.1 5.1 – 9.1 9.1- 15	None Recorded

Borehole	Location	Strata encountered	From – to depth (m bgl)	Water Strike (m)
SU77SW866	40m south east	Fill (asphalt and brick rubble to 2ft 6inches black topsoil to 5ft Firm brown CLAY Medium dense to very dense small flint GRAVEL, becoming larger below 15ft 6inches Angular chalk fragments in a matrix of clayey chalk (solifluction chalk) passing gradually into very fissured but in-situ chalk with depth.	0 – 1.5 1.5 – 2 2 – 2.4 2.4 – 9.1	4.6
SU77SW690	57m south	Firm concrete bricks and stones Brown Clay and stones Gravel Brown Clay and stones Chalk and flint	0 – 0.8 0.8 – 2.0 2.0 – 3.0 3.0 – 4.9 4.9 – 18.2	11.0
SU77SW867	74m south east	Fill (asphalt over brick rubble) Medium dense to very dense, medium and large flint GRAVEL. Angular CHALK fragments in a matrix of clayey chalk (solifluction chalk) passing gradually into very fissured but in-situ CHALK with depth.	0 – 1.5 1.5 – 5.5 5.5 – 9.1	7.6
SU77SW865	77m south	Light grey clayey CHALK. Light grey clayey CHALK with flint. Coarse broken FLINT. Angular fragments and CHALK and FLINT in matrix of clayey CHALK (solifluction chalk)	0 – 1.4 1.4 – 1.9 1.9 – 3.4 3.4 – 5.3	None Recorded

Borehole	Location	Strata encountered	From – to depth (m bgl)	Water Strike (m)
		passing gradually to fissured chalk (possibly in-situ).		
SU77SW871	90 south east	Concrete	0 – 0.1	5.1
		Fill (soil, bricks and rubble).	0.1 – 1.5	
		Fine to medium flint GRAVEL with sandy silty CLAY.	1.5 – 2.3	
		Medium dense to very dense sandy GRAVEL.	2.3 – 5.1	
		CHALK and FLINT fragments in a matrix of clayey chalk (solifluction chalk).	5.1 – 9.3	
SU77SW668	99m east	No details	0 – 8.5	None Recorded

There is one groundwater extraction point within 500m of the site. The extraction point located 68m from the site is operated by Primark Stores Limited for use for retail: drinking, cooking, sanitary, washing (small garden).

4.2 HYDROLOGY

The nearest surface water feature is located 339m south east of the site. The River Kennet, a tributary of the River Thames, is also located approximately 454m south east of the site.

The site is not considered at risk from surface water flooding. However, a number of low risk (Flood Zone 1, 1 in 1000 year) areas are located in close proximity to the site, the closest being approximately 5m south. Areas of medium risk (Flood Zone 2, 1 in 100 year) area is located approximately 32m south-west and south-east, and 78m north-east of the site. Areas of high risk (Flood Zone 3, 1 in 30 year) of surface water flooding are located approximately 66m north-west and west, and 90m north-east of the site.

BGS groundwater flooding susceptibility model indicates the site has the potential for groundwater flooding to occur at the surface.

The site is not located within or within the vicinity (<500m) of an EA Source Protection Zone (SPZ).

4.3 PRELIMINARY HYDROGEOLOGICAL MODEL

The ground profile at the site is likely to comprise Taplow Gravels underlying the White Chalk Subgroup. The Taplow Gravels are classified as Secondary Aquifer (A) and the White Chalk Subgroup is classified as a Principal Aquifer. Made Ground is also anticipated on site.

The site is not located in a groundwater source protection zone.

Groundwater has been encountered in five of the eight BGS boreholes reviewed located on-site, at depths between 4.60m bgl and 11.00m bgl within the White Chalk Subgroup. It is anticipated that groundwater would also be encountered within the White Chalk Subgroup beneath the site.

According to the groundwater map provided by the BGS (Sheet 7: Hydrogeological Map of the South West Chilterns and the Berkshire and Marlborough Downs (1:100,000) – 1978), groundwater is anticipated to flow in an easterly direction.

No current surface water abstractions are located within 500m of the site.

4.4 LANDFILLING AND MINERAL EXTRACTION

There are no recorded current or historical landfills on-site, or within 500m of the site. One area of potentially infilled land (water) is located within 500m of the site. This area located 333m north east of the site was used as unknown Filled Ground (Pond, marsh, river, stream, dock etc).

Five mineral extraction sites are located within 500m of the site. All of the sites have ceased operation and were part of Reading Chalk Mine, which sourced Seaford Chalk Formation Deposits.

4.5 RADON

The BGS indicates that the site is in a lower probability radon area as less than 1% of homes are above the Action Level. No radon protection measures are necessary in the construction of new dwellings or extensions.

5 REGULATORY CONSULTATION

5.1 REGULATORY INFORMATION

Information relating to various regulatory controls has been taken from the Envirocheck Report, which is presented in **Appendix C**. The potential for hazardous materials to impact upon the ground conditions, surface or groundwater on-site are summarised below within **Table 6**.

Table 6 – Regulatory Information

Environmental Data	Distance from site (within 500m)	Details	Potential risk
Contaminated land register entries and notices	N/A	No entries recorded within 500m of the site.	No
Discharge Consents	450m south	Thames Water Utilities Ltd, discharge of sewage discharges, pumping station, water company into a freshwater stream/river.	No
	451m south	Thames Water Utilities Ltd, discharge of sewage discharges, pumping station, water company into freshwater stream/river.	No
	463m east	Geoffrey Osbourne Building Ltd, unknown discharge type into a freshwater stream/river.	No
	500m south-east	H&G Simmonds Ltd, The Brewery, Reading, Berks, trade discharges, cooling water, into a freshwater stream/river.	No
Local Authority Pollution Prevention and Controls	208m west	Hobbs of Reading, PG46 Dry cleaning.	No
Integrated Pollution Prevention and Controls	N/A	No entries were recorded within 500m of the site	No

Environmental Data	Distance from site (within 500m)	Details	Potential risk
Pollution Incidents to Controlled Waters	334m south-east	1991, Category 3 – Minor Incident, Oils – unknown spilt into an unknown receiving water.	No
	388m south-east	1998, Category 3 – Minor Incident, general pollutant into an unknown receiving water.	No
	409m south east	1994, Category 3 – Minor Incident, unknown oils into an unknown receiving water.	No
	413m south east	1997, Category 3 – Minor Incident, unknown oils into an unknown receiving water.	No
	427m north east	1993, Category 3 – Minor Incidents, unknown oils into an unknown receiving water.	No
	427m south	1997, Category 3 – Minor Incidents, unknown oils into an unknown receiving water.	No
	456m south east	1994, Category 3 – Minor Incidents, unknown oils into an unknown receiving water.	No
	458m south east	1994, Category 3 – Minor Incidents, unknown oils into an unknown receiving water.	No
	441m south east	1991, Category 3 – Minor Incidents, unknown oils into an unknown receiving water.	No
	446m south	1997, Category 3 – Minor Incidents, unknown chemicals into an unknown receiving water.	No
	447m south	1999, Category 3 – Minor Incidents, unknown chemicals into an unknown receiving water.	No

Environmental Data	Distance from site (within 500m)	Details	Potential risk
	450m south	1996, Category 3 – Minor Incidents, unknown oils into an unknown receiving water.	No
	452m south	1993, Category 3 – Minor Incidents, unknown oils into an unknown receiving water.	No
	455m south	1996, Category 3 – Minor Incident, miscellaneous pollutants into an unknown receiving water.	No
	457m south	1995, Category 3 – Minor Incident, miscellaneous – urban runoff, into an unknown receiving water.	No
	463m east	1993, Category 3 – Minor Incidents, unknown oils into an unknown receiving water.	No
	476m south-east	1993, Category 3 – Minor Incidents, unknown oils into an unknown receiving water.	No
	490m south-east	1992, Category 3 – Minor Incidents, unknown oils into an unknown receiving water.	No
	493m south-east	1999, Category 3 – Minor Incident, storm sewage into an unknown receiving water.	No
Substantiated Pollution Incident Register	N/A	No entries were recorded within 500m of the site.	No
Trade Directory Entries	0-100m Active	Cash Registers & Check-Out Equipment	Yes
	0-100m Inactive	Photographic Processors, Copying & Duplicating Services.	Yes
	100-250m Active	Jewellery Manufacturers & Repairers, Dry Cleaners, Printers and Perfume Suppliers.	Yes

Environmental Data	Distance from site (within 500m)	Details	Potential risk
	100-250m Inactive	Numerous entries typically including Electrical Goods, Dry Cleaners, Bags, Belts & Accessories - Manufacturers & Suppliers, Meat Wholesale, Hardware, Printers, Joinery Manufacturers, Tyre Dealers and Office Furniture & Equipment.	No
	250-500m Active	Printers, Garage Services, Water Coolers, Mot Testing Centres and Concrete Reinforcements.	Yes
	250-500m Inactive	Numerous entries typically including Car & Tyre Dealers, Garage Services, MOT Testing, Carpet, Upholstery Cleaners, Cable & Wire Manufacturers, Telecommunications Equipment & Systems, Commercial & Domestic Cleaning Services, Printers, Sheet Metal Work, Furniture Manufacturers, Rubbish & Waste Disposal, Meat Wholesale, Water Softeners, Photographic Processors, Glass Designers & Producers, Medical Equipment Maintenance, Pest & Vermin Control, Engineering Services including general and electrical, Railways, Oil & Gas Exploration, Supplies & Distribution Services, Transformer Manufacturers, Timber Preservation Services, Jewellery Manufacturer, Millinery Manufacturers, Clocks & Watches Manufacturers, Bus & Coach Operators & Station and Perfume and Toiletries Suppliers.	No

Environmental Data	Distance from site (within 500m)	Details	Potential risk
Control of major accident hazards sites (COMAH)	N/A	No entries recorded within 500m of the site.	No
Registered radioactive substances	N/A	No entries recorded within 500m of the site.	No
Notification of installations handling hazardous substances	N/A	No entries recorded within 500m of the site.	No
Fuel station entries	125m west Obsolete	Welldale Service Station	Yes

5.2 CORRESPONDENCE

CONTAMINATED LAND OFFICER (CLO)

The Contaminated Land Officer at Reading Borough Council were contacted on 08 April 2020. No response has yet been received. If pertinent information is found this report will be updated or the information will be sent as an addendum.

ENVIRONMENT AGENCY

The Environment Agency was contacted on 08 April 2020 and a response was received on 19 May 2020. Information from the response are detailed below:

- No authorised or historic landfill sites are present within 500m of the site;
- No records of pollution incidents to controlled waters were identified within 1km of the site. However minor pollution incidents were recorded within 1km of the site, with all of these incidents recorded as minor category 3 or 4 incidents; and,
- One groundwater abstraction license is located within 500m of the site. This license was held by Primark Stores Limited located on Cheapside Road, Reading, and was used to abstract groundwater for retail use e.g. drinking, cooking and washing.

The response from the Environment Agency is included in **Appendix E**.

6 CONCEPTUAL SITE MODEL (CSM)

6.1 INTRODUCTION

The preliminary CSM is based upon the environmental conditions of the Site as described in the previous sections.

The methods used within this assessment follow a risk-based approach; with the potential environmental risk assessed qualitatively using the 'source-pathway-receptor' contaminant linkage concept introduced in the guidance documents (principally the EA's CLR11) on the practical implementation of the Environmental Protection Act 1990.

Environmental risk can be defined as the combination of the consequence of a harmful effect and the probability of its occurrence. The existence of a contaminant linkage is primarily dependant on site usage and environmental conditions.

The environmental risk assessment has been carried out by identifying and evaluating the significance of the following:

- Potential Sources of Contamination: these include any actual or potentially contaminating materials and activities, located either on or in the vicinity of the Site;
- Potential Pathways for Contamination Migration: these are the routes or mechanisms by which contaminants may migrate from the source to the receptor; and
- Potential Receptors of Contamination: these include present or future land users, activities or persons at the Site.

The preliminary CSM was developed based on the proposed industrial/commercial end use at the Site. A summary of the applicable legislative and planning framework for the assessment is presented in **Appendix F**.

Table 7 provides a key to the potential pathways and receptors identified at the Site. The on-site preliminary CSM is presented in **Table 8**, and the off-site CSM in **Table 9**.

Table 7 – Potential Pathways

Receptor Type	Receptors	Potential Pathways			
		On-site contaminant source	On-site ID	Off-site contaminant source	Off-site ID
Human Health	Site users (current and future) and maintenance workers	Dermal contact with contaminated soils and waters Inhalation of contaminated soils, waters and vapours/ ground gas Ingestion of contaminated soils and waters	1	Inhalation of contaminated soils, waters and ground /landfill gas Ingestion of contaminated soils in airborne dust	6

Receptor Type	Receptors	Potential Pathways			
		On-site contaminant source	On-site ID	Off-site contaminant source	Off-site ID
	Neighbouring site users	Inhalation of contaminated soils, waters and ground gas Ingestion of contaminated soils in airborne dust	2	Not relevant	NA
Groundwater	White Chalk Subgroup (Principal Aquifer)	Leaching of contaminants from soils Migration of contamination in groundwater Migration of immiscible contaminants Infiltration of contaminated surface water	3	Migration of contaminated groundwater, surface water or immiscible contaminants	7
Surface Water	Unnamed surface water feature and the River Kennet	Runoff of contaminated surface water Migration of immiscible contaminants	4	Migration of contaminated groundwater, surface water or immiscible contaminants	8
Building Structures	Buried concrete and water supply pipes	Direct contact with contaminated soils, groundwater or immiscible contaminants	5	Migration of contaminated groundwater, surface water or immiscible contaminants	9

Table 8 – On-site conceptual site model

Location	Source	Potential Contaminants	Pathway ID (Table 9)	Comment on Hazard Realisation	Risk Rating
Site wide	Buildings	Asbestos	1 and 2	- The site does not currently have an asbestos management plan. - Considering the age of the building, it is likely asbestos has been used in some form within the building. - Possibility of inhalation of asbestos fibres during current site use or future construction or maintenance works as removal works are not thought to have occurred.	MODERATE
Site wide	Made Ground associated with current and previous use as residential and office buildings.	A range of potential contaminants depending on the source of material but may include, Metals, TPH, BTEX, PAHs, PCBs, VOCs and SVOCs. There is the potential for ground gas generation from the Made Ground	1-5	- No former phases of construction are known to have occurred on the site; - However, Made Ground is likely to be associated with the former and current on-site structures (office buildings). - It is unknown if any Made Ground is buried on site. - The proposed change of use in the building is not thought to require excavation. - No ground will be broken as a result of the proposed works.	LOW
Site wide	Current and historical use as residential and office buildings.	A range of potential contaminants depending on the source of material but may include, Metals, TPH, BTEX, PAHs, PCBs, VOCs, SVOCs.	1-5	- The proposed change of use in the building is not thought to require excavation or any change to the exterior of the building. - No ground will be broken as a result of the proposed works.	LOW

Table 9 – Off-site conceptual site model

Location	Source	Potential Contaminants	Pathway ID (Table 9)	Comment on Hazard Realisation	Risk Rating
125m west	Historical petrol filling stations	Metals, TPH, BTEX, PAHs, VOCs and SVOCs.	6-9	- Leaks and spillages are likely to have occurred. - It is unlikely that the site will be impacted by any potential contaminated groundwater as no ground will be broken as a result of the proposed works.	LOW
0-500m surrounding the site	Surrounding current and historical industrial land uses as outlined in Table 3 and 6.	A wide range of potential contaminants, depending on the source of material, but may include metals, cyanide, TPH, PAH, VOCs, SVOCs, PCBs and pathogens.	6-9	- It is unlikely that the site will be impacted by any contaminated groundwater as no ground will be broken as a result of the proposed works. - No ground will be broken as a result of the proposed works. - It is unknown whether any remediation has been undertaken on surrounding sites. - Leaks and spillages are likely to have occurred, at the garages and engineering works. - The 19 recorded pollution incidents generally occurred over 20 years ago and were all located hydraulically downgradient of the site	LOW

7 CONCLUSIONS AND RECOMMENDATIONS

Based on the findings of this preliminary assessment, WSP makes the following conclusions in the context of the proposed development of the site to residential end use.

7.1 ENVIRONMENTAL SETTING

The ground profile at the site is likely to comprise the Taplow Gravels overlying the White Chalk Subgroup. In addition, Made Ground associated with historical building structures is likely to be encountered on-site.

The Taplow Gravels are classified as a Secondary (A) Aquifer and the White Chalk Subgroup as a Principal Aquifer.

Groundwater is expected to be encountered within the fractures in the White Chalk Subgroup. It is anticipated that the hydraulic gradient of the underlying groundwater is generally in an eastern direction.

An unnamed surface water feature is located 339m south east of the site. The River Kennet, a tributary of the River Thames, is also located approximately 454m south east of the site.

7.2 POTENTIAL FOR GROUND CONTAMINATION

Potential on-site sources of contamination have been identified at the current site associated with the historical and current office buildings located on-site.

Potential off-site sources of contamination include historical petrol filling stations and surrounding current and historical industrial land uses.

Plausible contaminant linkages have been identified with respect to human health predominantly relating to potential inhalation of asbestos fibres and inhalation of/contact with ground gas/vapours. During and following the redevelopment of the site receptors would include construction/ maintenance workers and future site users (residents). As no ground will be broken as a result of the proposed works, dermal contact, inhalation or ingestion of soils and dust is not considered to be a plausible contaminant linkage, therefore this risk is avoided. The risk of contact with asbestos within the building remains.

Plausible contaminant linkages identified to controlled waters include the possibility of leaching of contaminants from the unsaturated zone, lateral migration of contaminants in surface water on to, and off of the site and lateral migration of contaminated groundwater from up gradient off-site sources on to the site.

Under the proposed change development potential receptors were identified as:

- Current and future site users;
- Neighbouring site users;
- Construction and maintenance workers;
- Groundwater in the Taplow Gravel (Secondary (A) Aquifer) and the White Chalk Subgroup (Principal Aquifer);

- Unnamed surface water feature and the River Kennet, a tributary of the River Thames;
- Site structures, particularly foundations, of existing buildings; and
- Water supply pipes.

WSP considers that the main contamination risk at the site arises from the presence of potential asbestos within the building fabric. There is limited potential for contamination arising from Made Ground associated with the former and current on-site structures (office buildings). However, as no ground will be broken as a result of the proposed works, this risk is avoided.

In conclusion, the preliminary risk assessment indicates generally a **low** risk to human health, apart from a **moderate** risk to construction workers during the building refurbishment due to the likely presence of asbestos. There is a **low** risk to controlled waters and site structures.

7.3 RECOMMENDATIONS

WSP recommends the following is undertaken as part of the planning and design process for the site:

- Undertake a Management Asbestos survey to allow the creation of an Asbestos Management Plan; and,
- Prior to refurbishment of the building, a Refurbishment and Demolition Asbestos survey would be required.

During the refurbishment works if ground is broken, WSP recommend that appropriate measures are undertaken by the contractor to mitigate the risk of contact with potentially contaminated ground.

It should be noted that this assessment has been carried out assuming that no intrusive groundworks are intended at this site. If the proposed refurbishment changes significantly in scope this assessment should be reviewed and updated to reflect the latest development proposals.

LIMITATIONS

REPORT LIMITATIONS - GROUND RISK AND REMEDIATION

GENERAL

1. WSP UK Limited has prepared this report solely for the use of the Client and those parties with whom a warranty agreement has been executed, or with whom an assignment has been agreed and outlined in the body of the report.
2. Unless explicitly agreed otherwise, in writing, this report has been prepared under WSP UK Limited standard Terms and Conditions as included within our proposal to the Client.
3. Project specific appointment documents may be agreed at our discretion and a charge may be levied for both the time to review and finalise appointments documents and also for associated changes to the appointment terms. WSP UK Limited reserves the right to amend the fee should any changes to the appointment terms create an increase risk to WSP UK Limited.
4. The report needs to be considered in the light of the WSP UK Limited proposal and associated limitations of scope. The report needs to be read in full and isolated sections cannot be used without full reference to other elements of the report and any previous works referenced within the report.

PHASE 1 GEO ENVIRONMENTAL AND PRELIMINARY RISK ASSESSMENTS

Coverage: *This section covers reports with the following titles or combination of titles: phase 1; desk top study; geo environmental assessment; development appraisal; preliminary environmental risk assessment; constraints report; due diligence report; geotechnical development review; environmental statement; environmental chapter; project scope summary report (PSSR), program environmental impact report (PEIR), geotechnical development risk register; and, baseline environmental assessment.*

5. The works undertaken to prepare this report comprised a study of available and easily documented information from a variety of sources (including the Client), together with (where appropriate) a brief walk over inspection of the Site and correspondence with relevant authorities and other interested parties. Due to the short timescales associated with these projects responses may not have been received from all parties. WSP UK Limited cannot be held responsible for any disclosures that are provided post production of our report and will not automatically update our report.
6. The opinions given in this report have been dictated by the finite data on which they are based and are relevant only for the purpose for which the report was commissioned. The information reviewed should not be considered exhaustive and has been accepted in good faith as providing true and representative data pertaining to site conditions. Should additional information become available which may affect the opinions expressed in this report, WSP UK Limited reserves the right to review such information and, if warranted, to modify the opinions accordingly.
7. It should be noted that any risks identified in this report are perceived risks based on the information reviewed. Actual risks can only be assessed following intrusive investigations of the site.
8. WSP UK Limited does not warrant work / data undertaken / provided by others.

INTRUSIVE INVESTIGATION REPORTS

Coverage: *The following report titles (or combination) may cover this category of work: geo environmental site investigation; geotechnical assessment; GIR (Ground Investigation reports); preliminary environmental and geotechnical risk assessment; and, geotechnical risk register.*

REPORT LIMITATIONS - GROUND RISK AND REMEDIATION

9. The investigation has been undertaken to provide information concerning either:
 - i. The type and degree of contamination present at the site in order to allow a generic quantitative risk assessment to be undertaken; or
 - ii. Information on the soil properties present at the site to allow for geotechnical development constraints to be considered.
10. The scope of the investigation was selected on the basis of the specific development and land use scenario proposed by the Client and may be inappropriate to another form of development or scheme. If the development layout was not known at the time of the investigation the report findings may need revisiting once the development layout is confirmed.
11. For contamination purposes, the objectives of the investigation are limited to establishing the risks associated with potential contamination sources with the potential to cause harm to human health, building materials, the environment (including adjacent land), or controlled waters.
12. For geotechnical investigations the purpose is to broadly consider potential development constraints associated with the physical property of the soils underlying the site within the context of the proposed future or continued use of the site, as stated within the report.
13. The amount of exploratory work, soil property testing and chemical testing undertaken has necessarily been restricted by various factors which may include accessibility, the presence of services; existing buildings; current site usage or short timescales. The exploratory holes completed assess only a small percentage of the area in relation to the overall size of the Site, and as such can only provide a general indication of conditions.
14. The number of sampling points and the methods of sampling and testing do not preclude the possible existence of contamination where concentrations may be significantly higher than those actually encountered or ground conditions that vary from those identified. In addition, there may be exceptional ground conditions elsewhere on the site which have not been disclosed by this investigation and which have therefore not been taken into account in this report.
15. The inspection, testing and monitoring records relate specifically to the investigation points and the timeframe that the works were undertaken. They will also be limited by the techniques employed. As part of this assessment, WSP UK Limited has used reasonable skill and care to extrapolate conditions between these points based upon assumptions to develop our interpretation and conclusions. The assumption made in forming our conclusions is that the ground and groundwater conditions (both chemically and physically) are the same as have been encountered during the works undertaken at the specific points of investigation. Conditions can change between investigation points and these interpretations should be considered indicative.
16. The risk assessment and opinions provided are based on currently available guidance relating to acceptable contamination concentrations; no liability can be accepted for the retrospective effects of any future changes or amendments to these values. Specific assumptions associated with the WSP UK Limited risk assessment process have been outlined within the body or associated appendix of the report.
17. Additional investigations may be required in order to satisfy relevant planning conditions or to resolve any engineering and environmental issues.
18. Where soil contamination concentrations recorded as part of this investigation are used for commentary on potential waste classification of soils for disposal purposes, these should be classed as indicative only. Due consideration should be given to the variability of contaminant concentrations taken from targeted samples versus bulk excavated soils and the potential variability of contaminant concentrations between sampling locations. Where major waste disposal operations are considered, targeted waste classification investigations should be designed.
19. The results of the asbestos testing are factually reported and interpretation given as to how this relates to the previous use of the site, the types of ground encountered and site conceptualisation. This does not however constitute a formal asbestos assessment. These results should be treated cautiously and should not be relied

REPORT LIMITATIONS - GROUND RISK AND REMEDIATION

upon to provide detailed and representative information on the delineation, type and extent of bulk ACMs and / or trace loose asbestos fibres within the soil matrix at the site.

20. If costs have been included in relation to additional site works, and / or site remediation works these must be considered as indicative only and must be confirmed by a qualified quantity surveyor.

EUROCODE 7: GEOTECHNICAL DESIGN

21. On 1st April 2010, BS EN 1997-1:2004 (Eurocode 7: Geotechnical Design – Part 1) became the mandatory baseline standard for geotechnical ground investigations.
22. In terms of geotechnical design for foundations, slopes, retaining walls and earthworks, EC7 sets guidance on design procedures including specific guidance on the numbers and spacings of boreholes for geotechnical design, there are limits to methods of ground investigation and the quality of data obtained and there are also prescriptive methods of assessing soil strengths and methods of design. Unless otherwise explicitly stated, the work has not been undertaken in accordance with EC7. A standard geotechnical interpretative report will not meet the requirements of the Geotechnical Design Report (GDR) under Eurocode 7. The GDR can only be prepared following confirmation of all structural loads and serviceability requirements. The report is likely to represent a Ground Investigation Report (GIR) under the Eurocode 7 guidance.

DETAILED QUANTITATIVE RISK ASSESSMENTS AND REMEDIAL STRATEGY REPORTS

23. These reports build upon previous report versions and associated notes. The scope of the investigation, further testing and monitoring and associated risk assessments were selected on the basis of the specific development and land use scenario proposed by the Client and may not be appropriate to another form of development or scheme layout. The risk assessment and opinions provided are based on currently available approaches in the generation of Site Specific Assessment Criteria relating to contamination concentrations and are not considered to represent a risk in a specific land use scenario to a specific receptor. No liability can be accepted for the retrospective effects of any future changes or amendments to these values, associated models or associated guidance.
24. The outputs of the Detailed Quantitative Risk Assessments are based upon WSP UK Limited manipulation of standard risk assessment models. These are our interpretation of the risk assessment criteria.
25. Prior to adoption on site they will need discussing and agreeing with the Regulatory Authorities prior to adoption on site. The regulatory discussion and engagement process may result in an alternative interpretation being determined and agreed. The process and timescales associated with the Regulatory Authority engagement are not within the control of WSP UK Limited. All costs and programmes presented as a result of this process should be validated by a quantity surveyor and should be presumed to be indicative.

GEOTECHNICAL DESIGN REPORT (GDR)

26. The GDR can only be prepared following confirmation of all structural loads and serviceability requirements. All the relevant information needs to be provided to allow for a GDR to be produced.

MONITORING (INCLUDING REMEDIATION MONITORING REPORTS)

27. These reports are factual in nature and comprise monitoring, normally groundwater and ground gas and data provided by contractors as part of an earthworks or remedial works.
28. The data is presented and will be compared with assessment criteria.

Introduction

The Environment Act 1995 has made site sensitivity a key issue, as the legislation pays as much attention to the pathways by which contamination could spread, and to the vulnerable targets of contamination, as it does the potential sources of contamination.

For this reason, Landmark's Site Sensitivity maps and Datasheet(s) place great emphasis on statutory data provided by the Environment Agency/Natural Resources Wales and the Scottish Environment Protection Agency; it also incorporates data from Natural England (and the Scottish and Welsh equivalents) and Local Authorities; and highlights hydrogeological features required by environmental and geotechnical consultants. It does not include any information concerning past uses of land. The datasheet is produced by querying the Landmark database to a distance defined by the client from a site boundary provided by the client.

In this datasheet the National Grid References (NGRs) are rounded to the nearest 10m in accordance with Landmark's agreements with a number of Data Suppliers.

Berkshire

Published 1883

Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas; these maps were used to update the 1:10,560 maps. The published date given therefore is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.
