The 20/20 roof tile is a modern take on the traditional plain tile, using a modern interlock we can provide greater flexibility and performance. Pressed from natural alluvial Humber clay, this premium material delivers improved longevity and natural beauty to any roof.

Data Sheet

Installation Guide

Features

- Pressed from natural alluvial Humber clay, this premium material delivers improved longevity and natural beauty.
- Clay's irregularity adds charm and texture to any roof.
- Colour fastness.
- Its innovative design means the 20/20 performs at pitches down to 15°.
- The 20/20 roof tile has a ground-breaking 'open gauge' design.
- The 20/20 saves 50% CO2 compared with traditional clay plain tiles.
- The 20/20 roof tiles cut the number of battens required per m2 of a roof area by 60%, further reducing the use of materials and lorry movements.
- The 20/20 roof tile provides the perfect solution for your low pitch extension roofing work
- The 20/20 only uses 20.5 tiles per m².
- Available in four colour options (Tuscan, Natural Red, Flanders and Antique Slate)

Specification

Sandtoft Guides & Articles

Roof slate prices

Roof slate prices vary greatly depending on what material of roof slate you choose. Man-made roof slate prices and natural roof slate prices have very different manufacturer processes and steps before they reach the customer. Man-made roof slates are constructed from materials in a factory whereas natural roof slate is taken from the land and

Price of roof tiles

The cost of a roof depends heavily on the cost of roof tiles that are chosen. The price of concrete roof tiles and the price of clay roof tiles all vary depending on colour, profile, size and occasionally popularity too. Use our table of contents below to jump to the brand and material of the

Double Roman roof tiles buyer's guide

Double Roman roof tiles offer a classic choice of roof covering. Their traditional appearance wins them points for aesthetics, and the tiles themselves are extremely robust. Roman roof tiles are largely flat, with Double Roman tiles featuring two rolls, distinguishing them from Single Roman which have just one roll. Double Roman roof tiles are available

Questions & Answers

Question: Can this tile be used in the vertical

Answer: The suppliers confirmed you can use these vertically if you want to, but as they are to mimic the look of a plain tile, it is just as easy to use the below.
<https://www.roofingsuperstore.co.uk/product/sandtoft-humber-plain-clay-roof-tile-flanders.html>

Question: Would this match an old clay tile roof. Building an extension but want tiles to match as best they can, but can't get much of a pitch, probably only 18 degrees. Could I send a photo of the existing tile so you could tell me if it would be a good match? Thanks,

Answer: These are designed to match the look of a plain tile roof, but when you need to go to a lower pitch so would be a good option.

Question: what are the recommended vertical tiles to be used with sandtoft 20/20 antique slate for use on a dormer

Answer: You could use any standard plain tile for hanging, but we do not currently sell and Sandtoft ones matching the colour I am afraid.
