

Oren Shiplap Triple Bin Store

Source: <https://www.sheds.co.uk/oren-shiplap-triple-bin-store.html?ref=1>

The Oren Shiplap Triple Bin Store is the ideal place to hide away your wheelie bins. Complete the look of your garden by concealing those necessary but unsightly recycling bins in a strong and secure surround. The innovative internal chain allows you to lift the bin store and wheelie bin lid together for ease of use. Accessing the bins is simple thanks to the simple but very effective latch allowing you to remove each wheelie bin at any time. The slatted lids allow air to circulate and vent which prevents trapping unpleasant smells inside the store. The bin store is also available in single and double sizes to suit your requirements.

Manufactured from high grade 12mm shiplap timber boards protected with our instantly recognisable red cedar water based treatment.

We are a key supporter of both the FSC and PEFC certifications and all of our timber suppliers are registered members of one or both of these schemes. This ensures that all timber used within the production of our buildings has been certified as being harvested from a legal and sustainable source.

This product comes with the Oren Garden Buildings 10 year guarantee included. Offering protection against general timber rot and decay – the guarantee does not cover the product against timber splits or warping which may occur naturally over time.

It is essential that the product is assembled in accordance with the instructions supplied on a firm and level base constructed from a suitably durable material. It should also be treated shortly after assembly and then annually thereafter with an appropriate high quality preservative.
