Dear Hoare

RE: Station Approach, Reading City Centre

In response to your notice of the above reference dated 8th September 2003, I can advise you that we do have **Regional** plant in this area.

Please find enclosed a copy of our plans with the location of our existing network marked on it. This information is intended as a general guide only in relation to any proposed works. Individual services to premises may not be shown but it should be assumed that they will be present.

Should any excavations occur within 600mm of our plant a safe digging practice is required. Trial excavations should be used to establish the exact location. If you suspect that you have damaged NTL plant call the NTL damage hotline 0870 0133630. Safe digging practice should be used at all times in accordance with Health & Safety series booklet HS(G)47 'Avoiding danger from underground services'.

It should be noted that our plant contains fibre optic cables, which, if damaged, may cause eye injury and can also be very expensive to repair. The responsibility for damage to our plant will remain with yourselves.

You are also advised that your enquiry was received from Emley Moor Huddersfield on 10th September 2003.

Please do not hesitate to contact me directly on 0118 954 4577 should you have any further queries relating to this matter.

Kind Regards

Stacy Carter
