Appendix B: Proposed Site Layout

1. INTRODUCTION

Preamble

- 1.1 Markides Associates (MA) have been instructed by Reading Central Jamme Mosque (the Applicant) to prepare a Travel Plan (TP), which seeks to encourage a reduction in the number of single-occupancy car journeys accessing their existing site located a 18a Waylen Street, RG1 7UR. A site location plan is attached as **Figure 1.1**.
- 1.2 The site is located within the authoritative boundary of Reading Brough Council (RBC), which is both the relevant planning and highway authority.
- 1.3 The TP also seeks to encourage an increase in sustainable modes of travel and to divert car parking demand to locations away from the site, thereby reducing the impact on adjacent residential properties.
- 1.4 The site is currently operational, with an established level of impact and reliance on the immediate local highway network. The successful implementation of this TP will, therefore, result in a betterment in the operation of the local network.
- 1.5 The requirement for the site to be supported by a TP has been established following discussions between the Applicant and RBC in relation to development at the site for which the Applicant is seeking retrospective planning permission. It is understood that any planning approval for this application will have a restriction attached that will likely limit the maximum attendance at any one time to 200 attendees and the TP has been produced on that basis.
- 1.6 Despite the established level of impact, RBC highways development control officer's require the implementation of the Travel Plan to result in a scale of impact and parking demand that reflects the lawful level of maximum occupation at any one time, estimated at 100 visitors.
- 1.7 The preparation of this document has been informed by the guidance document, '*Have Faith in Travel Planning*,' which is a specialist guide for TPs at faith sites, produced by WESTTRANS, accessed here:

[http://travelplans.westtrans.org/wla/westtrans.nsf/Files/WT-42/\\$FILE/WestTrans_HaveFaithInTravelPlanningBooklet_2010%20-%20compressed1.pdf](http://travelplans.westtrans.org/wla/westtrans.nsf/Files/WT-42/$FILE/WestTrans_HaveFaithInTravelPlanningBooklet_2010%20-%20compressed1.pdf)

Statement of Commitment

- 1.8 The TP has been prepared in consultation with the Applicant, who acknowledge their responsibilities in relation to the ongoing management and implementation of the TP, including the undertaking of travel surveys and the reporting of results to RBC.
- 1.9 The implementation of the TP and measures included within will become an inherent part of the culture of the Central Jamme Mosque.

Securing the Travel Plan

- 1.10 The obligation to implement the TP can be secured via a S106 Agreement, which the Applicant will agree to.

Roles and Responsibilities

- 1.11 The Applicant will act as the Travel Plan Coordinator, assisted by MA for the first year of implementation following planning approval. Contact details are as follows:

<u>Central Jamme Mosque</u>	<u>Markides Associates</u>
Mustak Mohammed	Alex Scarratt
mohammedmustak@hotmail.co.uk	alex@markidesassociates.co.uk

Travel Plan Local Policy

- 1.12 At a local level, RBC's adopted Core Strategy (2015) policy CS23: *Sustainable Travel and Travel Plans*, sets out that development proposals need to be supported by a commitment to implement measures to promote and improve sustainable transport through agreed TPs. The supporting narrative to the policy details that measures will vary from scheme to scheme and innovative solutions will be encouraged and that there should be ongoing monitoring and reporting.

- 1.13 The implementation of this TP will fulfil this policy requirement.

Aims, Objectives and Benefits

- 1.14 TPs are long-term management strategies that an organisation will implement that seek to encourage behaviour change which will lead to the use of more sustainable travel modes and/or reduce overall travel to and from the site through action. The action strategies are articulated in a document that is regularly reviewed.
- 1.15 A TP involves identifying an appropriate package of measures aimed at promoting the most sustainable forms of travel, with an emphasis on reducing reliance on single-occupancy car journeys.
- 1.16 The aim of this TP is to ensure management strategies and infrastructure is in place to support sustainable travel choices for both existing attendees and any new attendees that may be attracted to the Mosque in the future.
- 1.17 The TP will also aim to ensure that regular attendees are aware of the travel options available to them to access the site so that they can make informed travel choices.
- 1.18 The TP will also seek to displace parking demand generated by the site from the immediate local highway network to more appropriate locations such as publicly accessible car parking.
- 1.19 The headline aims and objectives of this TP can therefore be summarised as follows:
- Support a decrease in single occupancy vehicle travel across all attendees;
 - Encourage an increase in pedestrian, cycling, public transport and car sharing trips;
 - Ensure regular attendees are aware of the range of sustainable travel options that are available to access the site;
 - Investigate alternative parking locations away from the site; and
 - Engage with local businesses and organisations to partake in events relating to sustainable travel.

- 1.20 The success of the TP will be measured against modal split proportions, established via travel surveys. The results of these surveys are typically reported to a local planning authority over an agreed time period, for example 5 years. In this case, to ensure the promotion of sustainable travel becomes an inherent part of the culture of the organisation, the surveys will be undertaken and reported on an annual basis in perpetuity.
- 1.21 The implementation of the TP will help to deliver a number of benefits, including:
- Availability of an improved range of travel choices;
 - Health benefits for attendees walking and cycling more;
 - Improving the green credentials of the organisation by reducing car use; and
 - Improving relations with neighbours and adjacent land uses.

TP Structure

- 1.22 Following this introduction section, the TP is structured as follows:
- **Section 2** details the baseline existing transport infrastructure that will be available from the site, which will influence the measures that will be adopted in the TP strategy;
 - **Section 3** summarises the results of the questionnaire surveys that were undertaken in September 2018 to establish existing travel patterns, from which modal shift targets have been established;
 - **Section 4** details the TP Strategy, including responsibilities, implementation, marketing, monitoring and reporting and funding;
 - **Section 5** details the proposed measures that will be implemented to support sustainable travel; and
 - **Section 6** details targets and performance indicators against which the success of the TP will be measured.

2. EXISTING SITUATION

Site Location

- 2.1 The site is located to the west of Reading town centre, at 18a Waylen Street, RG1 7UR. Waylen Street, in a location that is predominantly residential in nature. To the north of the site, on Oxford Road, a range of commercial and retail properties are located. Furthermore, Broad Street and its associated shopping and leisure facilities is only around a 6-minute walk from the site, with the remainder of Reading town centre's facilities also within a walking distance of approximately 10-minutes. It is therefore conceivable that some of the trips made to the site could be linked with visits to the town centre.

Pedestrian and Cycle Infrastructure

- 2.2 Waylen Street benefits from 2m wide footways extending in both directions from the site entrance, with street-lighting. Wayfinding signage to the site is located at the Waylen Street junction with Oxford Road.
- 2.3 Severance caused by the volume of traffic on Oxford Road is mitigated by an informal pedestrian crossing to the east, supported by a pedestrian refuge and build out. To the west, there is a pedestrian crossing facility incorporated within all arms of the Oxford Road signalised junction with Bedford Road.
- 2.4 In terms of cycle infrastructure, RBC's 'Getting There' cycling guide outlines that Reading's cycle network connects all the town's major public facilities, employment and leisure areas with almost 37 miles of principle routes, of which 17 miles are segregated from general traffic. While Waylen Street does not feature on this cycling network, Oxford Road forms part of Route 5, the West Reading route, connecting the town centre with Tilehurst. The R5 route also directly connects with the R50 route, which extends from Tilehurst to Prospect Park, while all other routes on the Reading Cycling Network can be accessed via the town centre routes. Whilst Oxford Road past Waylen Street does not accommodate any formal cycle lanes, cyclists are able to continue east from the signalised junction with Oxford Road, with general traffic otherwise forced northbound.
- 2.5 The existing building currently accommodates no cycle parking facilities.

Local Bus Services

- 2.6 Reflecting the town centre location, the site is situated within close proximity of a number of established bus routes that provide access to locations across Reading.
- 2.7 The closest paired stops to the site are located on Oxford Road, less than 100m walk distance north of the site. In both directions, the stops accommodate bus shelters with seating and timetable information, as well as live departure times.
- 2.8 **Table 2.1** below sets out the routes, service frequencies and stops available within walking distance of the site, which are also indicated on **Figure 1.1**.

TABLE 2.1: LOCAL BUS SERVICES

Service	Route	Peak Frequency		
		Weekday	Saturday	Sunday
1	Newbury to Reading via Thatcham, Woolhampton, Theale	Every 30 Minutes	Every 30 Minutes	Every 60 Minutes
2 / 2a	Central Reading to Burghfield Common via Bath Road	Every 30 Minutes	Every 30 Minutes	Every 60 Minutes
15 / 15T / 15a	Central Reading to Calcot (IKEA) via Oxford Road, Dee Park, Tilehurst Triangle	Every 30 Minutes	Every 30 Minutes	Every 60 Minutes
16 / 16S	Central Reading to Purley via Oxford Road, Overdown Road, Knowsley Road	Every 15 Minutes	Every 20 Minutes	Every 30 Minutes
17	Wokingham Road (Three Tuns) to Tilehurst (Water Tower) via Cemetery Junction, Central Reading, Oxford Road	Every 8 Minutes	Every 8 Minutes	Every 10 Minutes
26 / 26L / 26T	Reading Station to Calcot (IKEA) via Southcote, Ford's Farm, Beansheaf	Every 12 Minutes	Every 12 Minutes	Every 20 Minutes
33	Central Reading to Turnham's Farm via Tilehurst Road, Corwen Road, Pierces Hill, Little Heath Road	Every 15 Minutes	Every 15 Minutes	Every 30 Minutes

- 2.9 **Table 2.1** confirms therefore that the site benefits from being accessible via a number of bus services with a good service frequency, providing access to established residential communities across Reading. This accessibility is reflected in the results of the baseline travel surveys described in subsequent sections.

Rail Services

- 2.10 Reading West Station is located around 800m to the west of the site, while Reading Station is located around 1.2km to the northeast of the site, which amount to less than 15 minutes walking time. From Reading West Station there are services to local settlements between

Basingstoke and Newbury. From Reading Station, which is fully accessible with step-free platform access, there are services to local settlements between Wokingham and Oxford.

Local Highway Network

- 2.11 Waylen Street, which is submitted to a 30mph speed limit, operates one-way southbound, forming simple priority junctions with Oxford Road in the north and Baker Street in the south.
- 2.12 Waylen Street, and the adjacent residential streets, are located within a Controlled Parking Zone (A1/08R) which operates 24 hours a day, 7 days a week. Between the hours of 08.00-20.00, non-permit holders are allowed to park for a maximum period of 2 hours, with no return within 2 hours.
- 2.13 Oxford Road acts as a distributor road connecting Reading town centre with Tilehurst. To the east of the site, the A329 dual-carriageway, which is grade-segregated from Oxford Road, acts as a bypass route to avoid Reading town centre and connects the north and south of the town. This road links with the A33 to the south of Reading, which in turn provides access to the M4, providing easy onward access to locations across the wider Thames Valley.
- 2.14 In terms of publicly accessible car parking off the public highway, an existing pay and display car park, operated by Q-Park, is located on Eaton Place, approximately 300m walk distance from the site.

Summary

- 2.15 In summary, the site is located within a highly accessible location, reflective of its proximity to Reading town centre, providing an opportunity to promote sustainable travel to attendees, ensuring that they do not all need to be reliant on travel by private car to access the site.

3. EXISTING TRAVEL PATTERNS

Travel Survey

- 3.1 In order to understand the travel patterns of existing attendees accessing the site, from which appropriate TP targets can be defined, a snap short questionnaire survey of visitors attending the Mosque was undertaken by the Applicant in September 2018.
- 3.2 The survey was intentionally brief, with the primary aim to establish existing modes of travel.
- 3.3 In total, 63 surveys were completed. Whilst the responses were spread across a number of days the significant majority of responses were collected during Friday afternoon (Jumu'ah), which is the peak period of demand.
- 3.4 The surveys did not establish the propensity for modal shift, which will be established via subsequent travel surveys.
- 3.5 The survey results are provided at **Appendix A**.

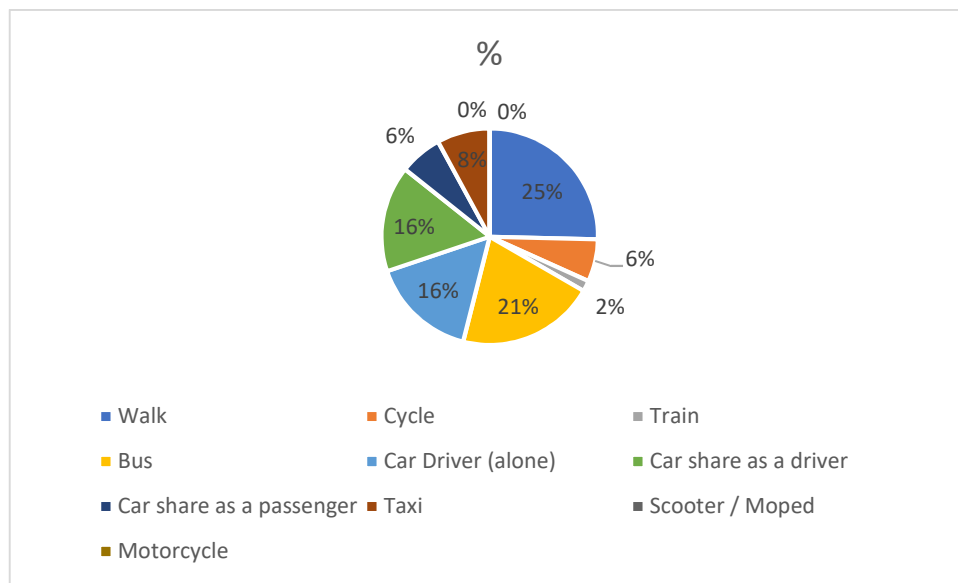

Travel Survey Results

Main Mode of Travel

- 3.6 In terms of main mode of travel to access the site, **Table 3.1** and **Chart 3.1** demonstrate the respondents' current means of travelling to the Mosque.

TABLE 3.1: EXISTING MODAL SPLIT

Mode	%
Walk	25%
Cycle	6%
Train	2%
Bus	21%
Car Driver (Alone)	16%
Car Share (Driver)	16%
Car Share (Passenger)	6%
Taxi	8%
Total:	100%

CHART 3.1: EXISTING MODE SPLIT

3.7 **Table 3.1** and **Chart 3.1** confirms trips to the site are generated using sustainable modes of travel, with pedestrian, cycling, public transport and car share modes amounting to 76% of all trips. Within this proportion, the dominant mode is walking (25%), which is closely followed by bus (21%). Encouragingly, the proportion of trips reliant on single-occupancy car use is only 16%, with an additional 16% being car drivers that share trips with passengers. It is pertinent to note that, despite the lack of formal cycle parking provision, a reasonable proportion of attendees cycle to the site, potentially using cycle parking facilities along Oxford Road.

3.8 These proportions have been applied to the site's restricted maximum attendance of 200 attendees, detailed below in **Table 3.2**, to demonstrate the number of trips per mode prior to the implementation of the TP.

TABLE 3.2: MODAL SPLIT OF MAXIMUM NUMBER OF ATTENDEES (200)

Mode	%	Trips
Walk	25%	51
Cycle	6%	13
Train	2%	3
Bus	21%	41
Car Driver (Alone)	16%	32
Car Share (Driver)	16%	32
Car Share (Passenger)	6%	13
Taxi	8%	16
Total:	100%	200

- 3.9 **Table 3.2** therefore indicates that, without intervention, an existing capacity event would generate 32 trips with a single-occupancy car as the main mode of travel, with an additional 32 car trips involving car sharers.
- 3.10 Total vehicular trip generation during a capacity event is therefore 64 vehicles, meaning that as an absolute worst-case scenario the site would generate parking demand totalling 64 vehicles.
- 3.11 However, despite applying a maximum attendance restriction of 200 attendee's RBC officers require the implementation of the TP to result in a scale of impact and parking demand that reflects the current lawful maximum level of occupation at any one time, estimated at 100 visitors. **Table 3.3** below therefore applies the baseline mode splits to this capacity.

TABLE 3.3: MODAL SPLIT OF LAWFUL NUMBER OF ATTENDEES (100)

Mode	%	Trips
Walk	25%	25
Cycle	6%	6
Train	2%	2
Bus	21%	21
Car Driver (Alone)	16%	16
Car Share (Driver)	16%	16
Car Share (Passenger)	6%	6
Taxi	8%	8
Total:	100%	100

- 3.12 It is against these baseline mode splits that modal shift targets will be set, with vehicle/parking demand totalling 32 cars, plus 8 additional taxis.

Travel Distance

- 3.13 In terms of travel distance, the questionnaire established the origin post code of respondents, which could either be their home address, work address, or any other location that they typically travel from. The data was filtered to only include completed postcodes, resulting however in only 29 validated postcodes, which is acknowledged as a relatively small sample size. Notwithstanding, these postcodes have been mapped using GIS software and are indicated on **Figure 3.1**, which demonstrates that a large proportion of existing attendees

have an origin that is within an acceptable walking distance of the site (2km), with 48% originating within 2km walk distance. This information is summarised below in **Table 3.3**.

TABLE 3.3: EXISTING TRAVEL DISTANCE

Travel Distance	Count	%
0-500m	1	3%
600m-1km	4	14%
1.1km-1.5km	6	21%
1.6m-2km	3	10%
2.1km-2.5km	2	7%
2.6km+	13	45%

4. TRAVEL PLAN STRATEGY

Introduction

- 4.1 A TP is a practical management tool, rather than a static document, that sets out 'active' initiatives throughout an agreed TP lifetime. It requires infrastructure and management initiatives to be in place before implementation, an implementation strategy, a monitoring strategy that can assess the success of the TP and respond to site occupier concerns, a reporting strategy so that a path of communication with the local highway authority is set up and a funding strategy.
- 4.2 This chapter sets out the key elements of the wider strategy of the TP.

Appointing a TP Coordinator

- 4.3 The successful implementation of this will be fronted by an enthusiastic and approachable TP Coordinator (TPC), who will lead by example.
- 4.4 General responsibilities of the TPC can be summarised as follows:
- Ensure that identified physical measures have been implemented during construction;
 - Be the central point of contact for employees, attendees, adjacent land uses, neighbours and RBC regarding travel and transport concerns related to the development;
 - Promoting and marketing the TP;
 - Organise travel survey questionnaires;
 - Undertake the monitoring and reporting;
 - Providing all users of the site with up-to-date information relating to sustainable travel options as appropriate; and
 - Informing all users of the site of promotional schemes relating to sustainable travel.

- 4.5 The Applicant will act as the TPC, assisted by MA for the first year of implementation following planning approval. Contact Details are as follows:

<u>Central Jamme Mosque</u>	<u>Markides Associates</u>
Mustak Mohammed	Alex Scarratt
mohammedmustak@hotmail.co.uk	alex@markidesassocaites.co.uk

Implementation Strategy and Action Plan

- 4.6 Infrastructure measures, such as cycle parking, will be put in place following planning approval, with all marketing and informative material available to attendees within 3 months of planning approval. This material would be regularly reviewed to ensure it reflects up to date information as part of the monitoring strategy.
- 4.7 The anticipated timescales for the TP strategy are summarised in an Action Plan indicated in **Table 4.1**.

TABLE 4.1: ANTICIPATED TIMESCALES SUMMARY

Action	Timing
Planning condition/S106 detailing required content and strategy for TP	At planning permission
“Hard” measures detailed within TP implemented (cycle parking)	Immediately following planning permission
Appointment of TPC	Now
TPC responsibilities implemented Set up Webpage Site Notices Formation of BUG Car Sharing Database Cycle shop relationship Car Park relationship Walking / Cycling events	TPC Appointment
Travel surveys undertaken	Annually on anniversary of planning permission, with initial survey undertaken 3 months after permission.
Monitoring reports, including revised strategies if necessary, submitted to the local highway authority	3 months after surveys undertaken, in perpetuity.

Marketing and Promotion of Travel Information

- 4.8 Marketing and promotion is essential in raising awareness of the existence and aims of the TP. The following section discusses the marketing and promotion measures that will be implemented.

Information Sheet for Attendees

- 4.9 An information sheet will be prepared within 3 months of planning permission, that will introduce the TP, its aims and objectives and more detailed travel information, including:
- Location map of the site;
 - Confirmation of on-site and off-site parking restrictions;
 - Availability of other car parking provision;
 - Site specific public transport information including rail and bus timetables for local services;
 - Walking and cycle routes and travel distances;
 - Details of car sharing database application;
 - Details of other site-specific measures such as Bicycle User Group and Walking Buddy; and
 - Details of cycle training, cycle purchase favourable terms.

- 4.10 The information sheet will be issued to attendees each Friday within the first month after preparation.

Travel Information Points & Notice Boards

- 4.11 A travel information points will be installed at a key access points or notice board within the site which will detail bus, cycling and walking routes, and bus/rail timetables.

Dedicated Webpage

- 4.12 The site website will include a dedicated webpage that references the TP and includes relevant travel information for visitors. The TPC will manage the webpage and will ensure that its content is regularly maintained and updated.

Newsletters

- 4.13 The site currently issues regular newsletters electronically, and it is anticipated this will continue. The newsletter will include travel related information and initiatives, as well as including a special annual addition that summarises the results of the annual surveys.

Monitoring and Reporting

- 4.14 Monitoring typically involves assessing the success of the TP against agreed modal split targets, with additional measures to support sustainable travel implemented where these targets are not being achieved.
- 4.15 The monitoring of the TP will occur in the form of travel surveys undertaken annually, with the initial survey undertaken within 3 months of planning permission.
- 4.16 The surveys will be undertaken on consecutive Friday afternoons, with a response rates of 70% needed for the data to be considered representative.
- 4.17 The TPC will be responsible for commissioning the surveys and compiling the results, which will include:
- Home postcode;
 - Mode of travel by travel purpose;
 - Journey origin;
 - Cycle parking demand;
 - Bicycle user group (BUG) uptake;
 - Walking buddy uptake;
 - Car share database uptake;
 - Pedestrian and cycle infrastructure review; and
 - On-street parking location.
- 4.18 Monitoring reports will be circulated to the appropriate officers at RBC within 3 months of the surveys being undertaken.

- 4.19 The monitoring report will include the results of travel surveys and general feedback. The report will include details of measures and initiatives introduced in the past year, plus an outline of planned measures and initiatives that would be implemented in the following year if at all necessary.

Lifetime of the TP

- 4.20 Encouraging sustainable travel will become an inherent part of the culture of the Mosque and therefore will exist in perpetuity.

Funding and Securing the TP

- 4.21 The funding of all aspects of the TP, including the introduction of infrastructure measures, employing of stakeholders, monitoring and reporting will be the responsibility of the Applicant, secured through a legal agreement
- 4.22 The Applicant will accept a S106 obligation that secures the implementation of the TP.

5. TRAVEL PLAN MEASURES

General Travel Plan Measures

- 5.1 This section of the TP describes the measures to be implemented. Such measures have been developed specifically with due regard to the transport conditions at the development site.
- 5.2 The initial travel surveys did not establish the propensity for modal shift toward specific modes of travel. Notwithstanding, the adopted measures reflect best practice and what we believe will result in some form of modal shift.
- 5.3 In general, measures can be assumed to fall into one of two categories; namely 'hard measures', such as physical facilities built into the scheme, and 'soft measures' such as promotional activities, marketing and incentives. Both have a part to play in the success of the TP and are discussed below.

Hard Measures

- 5.4 Hard measures represent elements of the that are designed in from the outset. Their primary role is to facilitate a modal shift by making facilities available to support 'soft' measures. It is the duty of the TPC to monitor the use of 'hard measures' implemented at the site and consider steps to improve them to better support the objectives of the TP.
- 5.5 In this case, the only hard measure will be the introduction of cycle parking provision. The proposed site layout, attached at **Appendix B**, details proposals to introduce 6 wall hangers that will allow bikes to be parked securely within the curtilage of the property. This represents an improvement on the existing situation, where no formal cycle parking is provided.

Soft Measures

- 5.6 Soft measures are those that are implemented during the life of the TP, and which do not represent physical measures as those set out above. They broadly include marketing initiatives and campaigns to promote a shift away from single occupancy vehicle travel to more sustainable modes.

Capacity Check

- 5.7 For capacity events, e.g. Friday afternoons, the TPC will undertake a count at the site access to ensure that the capacity of 200 attendees at any one time is not exceeded
- 5.8 Additional attendees above this limit will be turned away without exception.

Encouraging Walking

- 5.9 The TPC will implement a Walking Buddy scheme, where those that may indicate they would be willing to walk within subsequent travel surveys are met by another attendee so they can walk together.
- 5.10 The WESTRANS faith destination TP guidance TP guidance identifies this is particularly helpful for members of the elderly community.
- 5.11 The TPCs will, in addition:
- Act as a point of contact for users who may be concerned about the condition of local pedestrian routes and liaise with the highway authority to ensure necessary maintenance / improvements;
 - Organise participation amongst attendees in promotional events such as 'Walk to Work Week';
 - Provision of information relevant to local pedestrian routes to the nearest facilities and / or public transport nodes within all marketing material; and
 - Consider the inclusion of a marshal at the site access to escort those with mobility issues crossing Waylen Street and to ensure attendees do not gather on the local footway network after prayer.

Encouraging Cycling

- 5.12 The proposals include secure cycle parking to facilitate this mode of travel.
- 5.13 The TPC will also invite attendees to set up a Bike User Group (BUG), allowing less experienced cyclists or those who are not confident in their route to gain experience by cycling with more

experienced cyclists. It is likely that member of the existing congregation that are already an experienced cyclist would be interested in running the BUG.

5.14 The TPC will, in addition:

- Use reasonable endeavours to obtain a discount for residents at a local bicycle shop;
- Provide and / or promote Dr Bike maintenance sessions and cycle maintenance training sessions on site;
- Include the provision of basic cycle repair equipment on-site.
- Provision of information relevant to local cycle routes within all marketing material.

Encouraging use of Public Transport

5.15 The TPC will encourage all users at the site to use public transport by:

- Provision of information relevant to local public transport routes and facilities within all marketing material.

Car Sharing Database

5.16 Car sharing involves two or more people sharing a car to travel together. Such a practise is already undertaken by many attendees and the TPC will encourage this further via the formation of a Car Share Database.

5.17 Attendees would be requested to submit postcode data, with the TPC matching up attendees with similar origins/destination, linking them afterwards.

Car Parking

5.18 The site provides no dedicated car parking, with the significant majority of existing parking demand accommodated on-street.

5.19 In order to encourage car parking away from the site, thereby making this on-street provision available to residents or visitors to Oxford Road, discussion have been initiated with Q-Park

regarding favourable terms to park within their existing Chatham Place facility, located only a short walk distance from the site.

6. MODAL SHIFT TARGETS

- 6.1 The introduction of the measures and management strategies above will deliver modal shift away from single occupancy vehicle travel and toward sustainable travel.
- 6.2 RBC highways development control officer's require the implementation of the TP to result in a scale of impact and parking demand that reflects the lawful level of maximum occupation at any one time, estimated at 100 visitors, therefore resulting in vehicle/parking demand totalling 32 cars, plus 8 additional taxis.
- 6.3 The TP must therefore adopt the following modal shift targets, which are intended on being achieved over a 2-year life time, summarised below as **Table 6.1**.

TABLE 6.1: MODAL SHIFT TARGETS

Mode	Baseline	Year 2 Target		Change
	%	%	Trips	%
Walk	25%	38%	66	+32%
Cycle	6%	7%	16	+33%
Train	2%	2%	4	0%
Bus	21%	23%	50	+19%
Car Driver (Alone)	16%	8%	16	-50%
Car Share (Driver)	16%	8%	16	-50%
Car Share (Passenger)	6%	10%	24	+100%
Taxi	8%	4%	8	-50%
Total:	100%	100%	200	NA

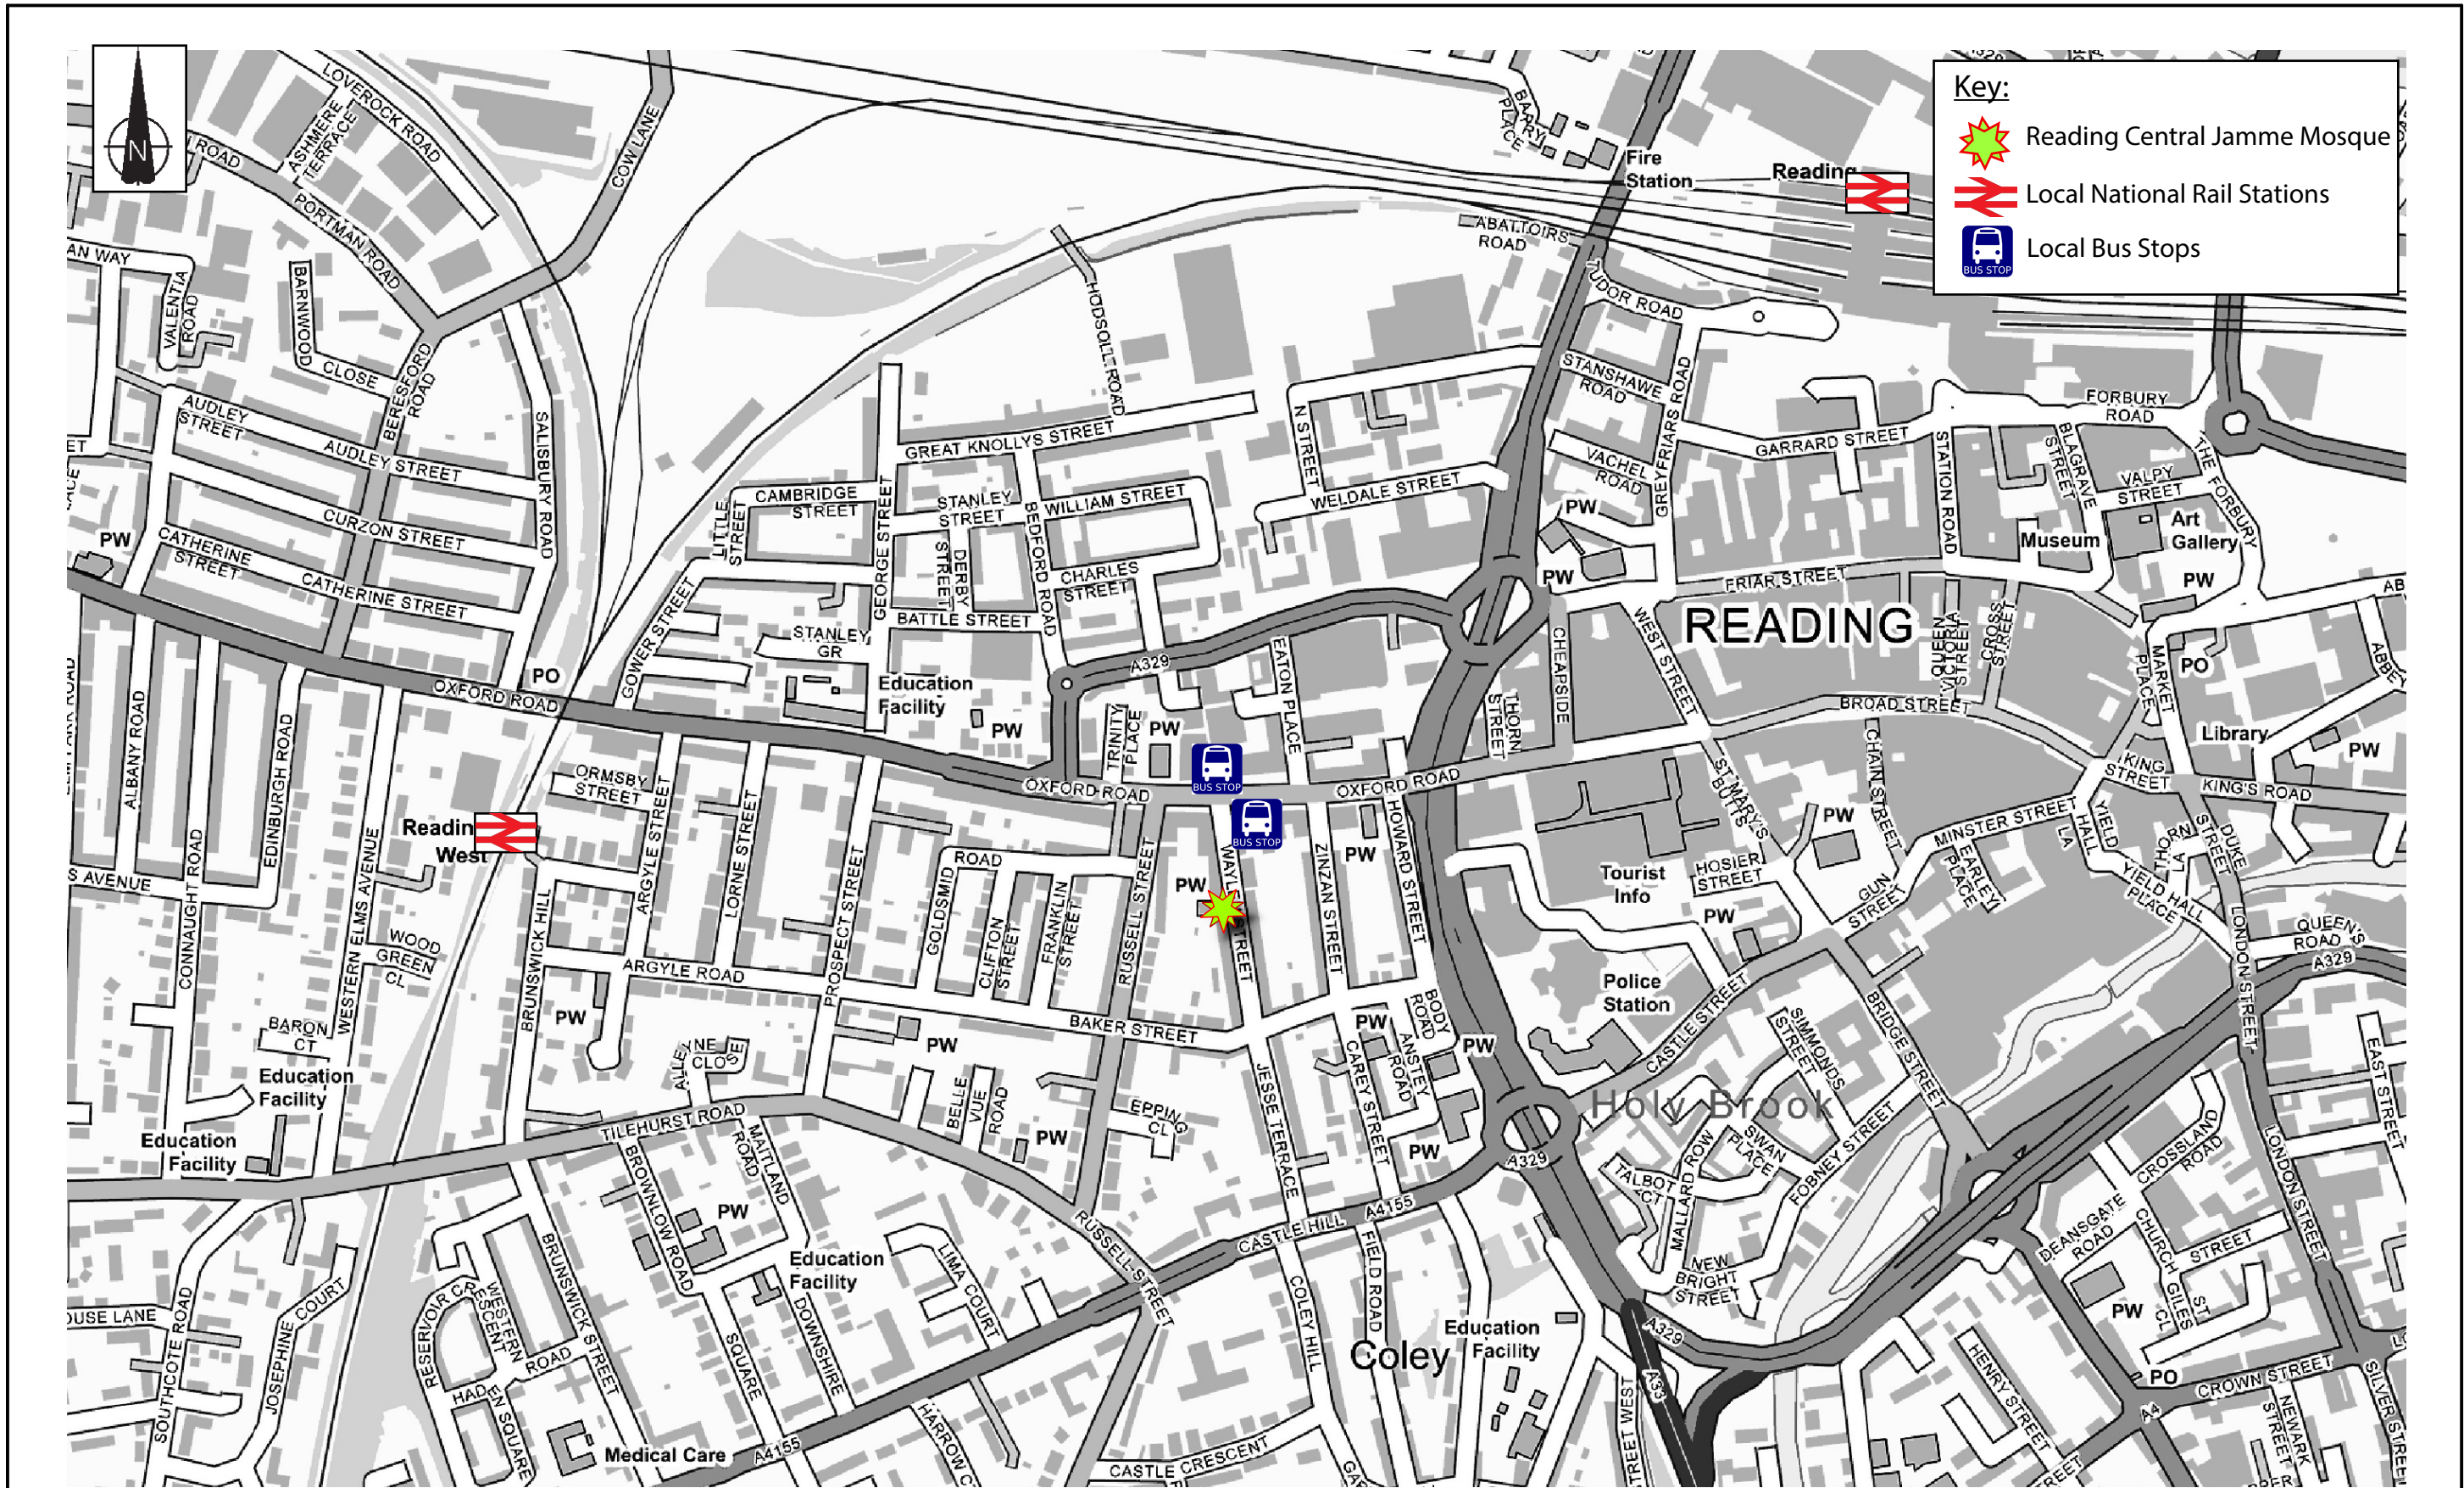

- 6.5 The TP will aim to deliver an increase in cycle uptake, through the provision of secure cycle parking facilities on-site, the provision of cycle repair equipment and the hosting of cycle events.
- 6.6 The TP will aim to deliver an increase in car sharing, through the introduction of a car sharing database, which is likely to be readily supported given the community land use.
- 6.7 The TP will aim to deliver an increase in public bus uptake through the provision of up to date timetable information.

6.8 These targets will be ratified as part of subsequent monitoring surveys.

APPENDIX A: TRAVEL SURVEY RESULTS

Central Jamme Masjid, 18A Waylen Street, Reading - Travel Survey

A travel survey is being undertaken so we can understand your travel patterns.
