CROSFIELDS SCHOOL

RESPONSE TO RBC OBJECTION DATED 7 JANUARY 2020

1.0 Introduction

1.1 This Technical Note has been prepared in response to the "Further Consultation Response on application no:191655" dated 7 January 2020 submitted by Reading Borough Council (RBC).

1.2 It is noted that, despite there having been no fundamental changes to the proposals since submission, RBC has now changed its previous position of *"no overall objection to the proposal, having considered the proposals from the perspective of possible tree/landscaping, ecology and transport implications on Reading Borough"* dated 26 September 2019 to *"the Local Planning Authority now formally **objects** to the proposal"* dated 7 January 2020.

1.3 RBC's Transport Development Control Manager has subsequently confirmed that he had seen the latest information within the Transport Assessment updated to address Wokingham Borough Council's comments (dated 7 October 2019) but had been unable to review the draft Travel Plan (dated 12 June 2019) prior to issuing his comments to the planning officers (dated 7 January 2020).

1.4 RBC incorrectly asserts that the approach in the submitted Transport Assessment (TA) is contrary to the National Planning Practice Guidance at Paragraph 014. Rather, the need for, scale, scope and level of detail required of the TA was established and agreed early in the development management process in consultation with Wokingham Borough Council (WBC) as the local highway authority. The resulting TA considers all of the requirements set out in Paragraphs 014 and 015 to the satisfaction of WBC.

2.0 Background

2.1 The School is a registered charity. It is not a commercial venture and all funds are reinvested into educational provision. There are currently 575 pupils at the school. The current school buildings could readily accommodate a 16% increase in pupil numbers to 665 with DfE approval and without recourse to planning.

2.2 The proposal is for an extension of the school by 3 years (Yrs 9-11) up to age 16. It arose because parents want greater choice of secondary education and, specifically, to remain at Crosfields. Affordability and co-education are key drivers at Crosfields. Girls tend to leave at age 11 (Yr 6) so to be truly co-ed, the school needs to extend its provision to 16 to avoid the risk of Years 7 & 8 becoming unsustainable. The school expects incremental growth over 5-7 years – up to an additional 275 places.

2.2 The need to provide additional secondary school places through the expansion of existing schools is recognised in the WBC's Core Strategy (2010): "2.27 The Council will need to provide enough secondary school places for the existing and new communities being planned for the next 20 years. A number of WBC's secondary schools will have to be extended or where this is not possible rebuilt". Crosfields are also aware that RBC are c1000 secondary places short and are looking to build a new secondary school on Richfield Avenue. Effectively, Crosfields offers 300 places at no cost to RBC and WBC and, in the process, offers the potential to reduce cross town traffic within Reading.

2.3 The NPPF requires (at paragraphs 94 – 95) that a sufficient choice of school places is available to meet the needs of existing and new communities. LPA should take a positive, proactive and collaborative approach to meeting this requirement and to development that will widen choice in education. They should give great weight to the need to create, expand or alter schools through plans and decision making.

2.4 Crosfields School has worked closely with WBC to identify and resolve key planning issues both at Pre-Application stage (since Feb 19) and since the application was submitted in July 2019.

3.0 Traffic Generation and Traffic Impact on nearby RBC junctions

3.1 RBC's concerns relate to the amount of additional traffic from the Crosfields expansion and its impact on the Shinfield Road junctions with Whitley Wood Road or Elm Road, which RBC considers is not considered to have been adequately assessed in the TA.

3.2 As part of the process to address RBC's concerns, additional traffic surveys were undertaken in January 2020 as follows:

- 06:00-23:00 Video Junction Turning Count surveys at school entrances.
- 7 day 24hr Automatic Traffic Counts (ATC) on;
  - A327 Shinfield Road;
  - Whitley Wood Road; and
  - B3350 Elm Road.
- 07:00-10:00 & 16:00-19:00 Video Junction Turning Count surveys at;
  - A327 Shinfield Road junction with Whitley Wood Road; and
  - A327 Shinfield Road junction with B3350 Elm Road.

The survey results are included in Appendix A.

Traffic Generation

3.3 RBC correctly states that the TA identified that, 84% of pupils travel to school by car. This was suggested from a 'hands-up' pupil survey conducted in November 2018. However, the TA also identified that, of these pupils, several families attending the school have two or more siblings and some lift-share with other pupils not in the same family. Taking this into account, the TA estimates that this reduces residual car trips by around 14%. The school has advised that, currently, there are 140 children as siblings (ie 25% of pupils) which suggests a reduction of 14% is a significant under-estimate. Indeed, the turning count surveys at school entrances in January 2020 show total traffic leaving the school grounds between 07:30 and 09:00 was 343. Assuming all of these were parents having dropped pupils (ie disregarding non-school traffic from the houses along Crosfields Close) this is equivalent to 60% of total pupil numbers suggesting that the combined estimated reduction taking into account siblings and lift-share is actually very close to 25%.

3.4 The assessment within the TA of the busiest AM and PM hours for existing Crosfields traffic was based on traffic movement counts at the school accesses on Shinfield Road undertaken in April 2018 and shown on the Traffic Diagram at Appendix L Figure 5. This shows existing Crosfields busiest AM and PM hours traffic turning movements as recorded then.

3.5 Despite a small increase in pupil numbers since September 2019 from 550 to 575, the 2020 turning count surveys at school entrances show a significantly smaller number of Crosfields traffic movements in the AM peak than recorded in the April 2018 survey, with a significantly higher proportion of right-turn exit movements (see Figure 1 attached). The combined effect of this is that there are 55 fewer two-way Crosfields traffic movements on Shinfield Road south of the signalled junction with Whitley Wood Road than stated in the TA (274 rather than 329).

3.3 It should be noted that although the Crosfields AM peak coincides with the background AM peak, the Crosfields PM peak does not coincide with the background PM peak.

3.4 The TA makes clear that, for the purposes of assessment, it has been assumed that vehicular traffic currently generated by the site will increase, following development, on a pro-rata basis and that all development traffic will be new to the local network (although it is not new to the wider network – all children go to school somewhere!). Accordingly, the TA suggests that in the AM peak there will be an increase of (up to) 173 vehicle movements over those observed in April 2018, on Shinfield Road between the school and the signalled junction with Whitley Wood Road.

3.5 This increase is asserted by RBC to be around 20% of the total flow, which is not correct. According to the April 2018 survey, 329 vehicles to and from Crosfields in the existing Crosfields busiest AM hour represents 23.8% of the total traffic on Shinfield Road south of the signalled junction with Whitley Wood Road. Taking into account the increase in background A327 flows (updated to 2026 using TEMPro), the worst case of (up to) 502 vehicles to and from Crosfields after development in the Crosfields busiest AM hour represents (up to) 29.3% of the total traffic on the same stretch of road, which represents a total increase of up to 5.5%, not 20%.

3.6 Notwithstanding, it is clear from the results of January 2020 turning count surveys at the school entrances that the pro-rata increase in vehicular traffic as a result of the Crosfields development will be less than the figure of (up to) 173 in the TA is over-stated. Using the same methodology, a more-realistic figure is an increase of (up to) 131. However, as the school could expand by 16% to 665 pupils within its existing buildings and hence without recourse to planning, the relevant increase in traffic is actually 87 in terms of assessment of traffic impact.

3.7 However, an increase of (up to) 131 two-way vehicle movements is considered to represent a worst case, as it takes no account of any reduction in traffic because of:

- Existing traffic which will no longer be generated (comprising former Crosfields pupils travelling to a different school. Typically, each year around 50% of leavers (typically around 35 in total) previously transferred to nearby schools, a significant proportion of whom would have made journeys passing through the Shinfield Road junctions with Whitley Wood Road or Elm Road). Over a three year period (equating to years 9 to 11), this would involve a rolling 105 pupils. For the purposes of assessment, it would seem reasonable to assume that around 50% would have made journeys passing through the Shinfield Road junctions with Whitley Wood Road or Elm Road, around 75% of which would be by car. This equates to around 40.

- New Crosfields traffic that would otherwise travel to other secondary schools, involving journeys passing through the Shinfield Road junctions with Whitley Wood Road or Elm Road. (traffic diverted away from junctions).

- Traffic already generated, comprising older siblings of Crosfields pupils.
- Increasing likelihood of senior Crosfields pupils travelling independently as they progress through school (traffic not generated).

- Mode shift as a result of Travel Plan implementation (A Travel Plan for staff and parents is being developed and will be in place before the planned school expansion is opened).

- The school day start and finish times are increasingly spread over a longer time period, which reduces the peak impact on the roads. This trend will continue with the senior school in place.

3.8 Taking the above into account, a more realistic assessment is that the pro-rata increase of 131 should be reduced by 40 to take account of existing pupils who would no longer transfer to other nearby schools and further reduced to take account of the combined effect of the other reasons for possible reduction in traffic generated by the development as identified above. The size of such further reduction cannot be estimated with accuracy, but it is considered that, for the purposes of assessment at this stage, a conservative estimated further reduction of 10 would be sufficiently robust for initial assessment, making an overall increase of (up to) 81 two-way vehicle movements (just over 1 each minute).

3.9 The relevant increase is significantly less taking into account that the school could expand by 16% to 665 pupils within its existing buildings and hence without recourse to planning.

4.0 Shinfield Road junctions with Whitley Wood Road or Elm Road

4.1 RBC's principal concern relates to the impact of additional traffic from the Crosfields expansion on the Shinfield Road junctions with Whitley Wood Road or Elm Road, which is not considered to have been adequately assessed in the TA. However, the likely impact on these, and other junctions local to Crosfields, was considered by Glanville and WBC at the scoping stage. These junctions are well known to both Glanville and WBC and it was our joint professional opinion that, given both the small proportion of additional traffic movements anticipated at these junctions relative to the total traffic handled, it would be unlikely that any adverse impact would be sufficiently detrimental to warrant detailed quantitative assessment.

4.2 RBC disagrees, despite admitting that they do not hold any drawings of the existing junction layouts or quantitative capacity analysis of the junctions' performance under current traffic conditions to justify this position. Regardless, RBC has suggested that the impact of additional traffic from the Crosfields expansion will be sufficient to "adversely affect safety and flow of users of the existing road network within Reading" and hence warrant the provision of various mitigation measures on A327 Shinfield Road which Glanville and WBC consider to be out of proportion to the scale and effect of the proposed development, and which are either not realistically feasible or of doubtful real benefit.

4.3 Of tangible benefit to A327 Shinfield Road, however, is that both the northern and southern accesses to the school from Shinfield Road will be improved to current highway design standards in terms of layout, kerb radii and provision for pedestrians and cyclists. The improved south access will allow entry and egress and, with the adjacent new parking proposed, will help reduce improve vehicle movements at the north entrance and along Crosfields Close. By opening up the South entrance, Crosfields will be improving the flow of traffic. Some traffic will not have to go so far along Shinfield Road.

4.4 RBC is also unwilling to disclose what they regard as an acceptable impact on the Shinfield Road junctions with Whitley Wood Road or Elm Road, relying instead on NPPG paragraph 009 which states that "*Local planning authorities must make a judgement as to whether a proposed development would generate significant amounts of movement on a case by case basis".* It should be noted, however, that NPPG paragraph 009 relates to when a Travel Plan is needed; there is no guidance in NPPG on acceptable impact of development traffic at junctions.

4.5 The turning count survey results showed the busiest AM hour to be between 07:30 and 08:30 when 1,573 vehicles passed through the Whitley Wood Road junction and 1,379 vehicles passed through the Elm Road junction. The ATCs suggest daily variations of traffic at both junctions of up to around 120 vehicles which is equivalent to around 7.6%.

4.6 The PM busiest Crosfields hour does not coincide with the PM busiest hours at the Shinfield Road junctions with Whitley Wood Road or Elm Road.

4.7 Additional traffic generated by the Crosfields development when added to the Shinfield Road junctions with Whitley Wood Road or Elm Road during the AM busiest Crosfields hour represents an overall increase of up to 5.1% at these junctions, based on surveyed traffic flows in January 2020. This is significantly less than the surveyed daily traffic variations at these junctions. Taking into account increases in background traffic flows in future years as predicted by TEMPro, this would reduce to around 4.9% by 2026.

4.8 It is clear, therefore, that the uplift in vehicle movements from the Crosfields development is thus unlikely to have a material impact on the Shinfield Road junctions with Whitley Wood Road or Elm Road during the AM peak and will have no impact in the PM peak as the PM school peak does not coincide with the PM network peak hour. As such no further analysis is needed. The overall highway impact cannot be considered 'severe' in the context of the National Planning Policy Framework and no mitigation measures specific to the junctions or A327 Shinfield Road past the school are required to facilitate delivery of the wider masterplan.

5.0 Other matters raised in RBC Objection

5.1 The school is within borough of Wokingham and hence Policy compliance and the detail of the proposed arrangements within the school site are not matters which should concern Reading Borough Council. Nevertheless, we offer the following response to the other matters raised:

Compliance with NPPG paragraph 110 and Wokingham Core Strategy policies CP6 and P10

5.2 Contrary to RBC's assertion, the proposed development is in full compliance with NPPG paragraph 110 and Wokingham Core Strategy policy CP6 in that the Crosfields development gives priority to pedestrian and cycle movements within the school grounds, facilitates access to high quality public transport, includes an interchange facility for school transport services and makes appropriate provision for people with disabilities and reduced mobility. Thus, the proposals create a safe, secure and attractive environment which minimises the scope for conflicts between pedestrians, cyclists and vehicles. It also allows for efficient servicing and caters for EVs in safe, accessible and convenient locations.

5.3 The car park layout designs are such that the need for pedestrians to traverse the car park and negotiate cars manoeuvring in and out of spaces cross is eliminated. Similarly, the need to cross trafficked routes is either eliminated or significantly limited thus further improving safety. The access roads to parking areas provide considerable internal stacking space and the ability to re-circulate, ensuring that any queuing during peak times can be accommodated within the site rather than on the public highway.

5.4 On the basis that the proposals do not result in "major environmental or safety problems" its compliance with Wokingham Core Strategy policy CP10 is irrelevant.

Drop-off and Pick-up

5.5 It is not clear how or why RBC consider that the Drop-off and Pick-up provision is contrary to NPPG paragraph 110. It is also not clear how or why RBC consider that it does not meet WBC policy. WBC parking policy is informed by the Parking Standards Study Report Consultation Document dated October 2011 which specifically states that *"the approach provided within this document should be regarded as only a starting point in any discussions with the Borough Council, as it should be recognised that each development site will need to be assessed on it owns merits within the wider context of the area within which the development sits. It is strongly recommended that any developers discuss in detail the parking requirements with Council Officers regarding the flexibility of standards in the local development context"*. WBC are content with the proposals which were developed with their involvement.

5.6 Further, the Wokingham Borough Parking Plan dated April 2011 states at paragraph 1.3.19:

"There are a number of issues relating to car parking associated with schools such as obstruction of footpaths, roads and accesses, non-observance of zig-zag markings, congestion and concerns over safety. Parents dropping off and picking-up children from school can cause significant traffic flow and safety problems for short periods of time. Afternoon pick up can be worst as it has a greater duration, as parents wait to collect students.

STATEMENTS OF INTENT

- *Work with schools to improve their parking situation where possible*
- *Schools and parents will be encouraged to seek methods to reduce the amount of congestion caused by setting down/picking up parking outside schools at the start and end of the day*
- *To enable access and to ensure safe visibility for pedestrians, keep clear zig-zag markings will be installed at all Wokingham Borough School entrances where appropriate and will be adequately enforced*
- *Drop off and pick up zones outside schools to be extended where appropriate"*

5.7 Thus, the provision of additional drop-off/pick-up spaces will neither "further encourage the use of the private car" nor increase the number of vehicle movements on the network. Rather, it will accommodate, efficiently and safely, residual car use within the school site so that the public highway in the vicinity of the school continues to be kept clear of such use thus avoiding unnecessary additional traffic in nearby residential roads and any associated inconvenience to local residents. It will also encourage quick turnarounds rather than parking.

5.8 It is the nature of an independent school such as Crosfields that it attracts pupils from a considerably wider catchment than usually the case with a school in the maintained sector. Accordingly, the proportion of pupils living within either walking, or cycling distance of the school or in a location close to a convenient public transport option, is considerably lower than generally the case for a school in the maintained sector. As a result, although Crosfields is committed, through its emerging Travel Plan, to encourage either car sharing or travel by means other than the car whenever practical, inevitably there will be a significant residual need to accommodate travel to and from school by car which this needs to be achieved efficiently and safely.

5.9 Currently there are 92 spaces used by parents. Pupil numbers are projected to increase by 55%. A 55% increase in spaces used by parents would equate to 142 spaces in total, but only 133 spaces are proposed.

Measures to promote more-sustainable modes of travel

5.10 RBC incorrectly asserts that "no improvements have been proposed to promote other more sustainable modes of travel".

5.11 In terms of infrastructure, the opportunity will be taken to provide:

- improved pedestrian access from Shinfield Road to the school to encourage bus use and pedestrian/cycle use to and from residential areas east of Shinfield Road as well as to provide improved pedestrian/cycle access between the school and Shinfield Road closer to the desire lines such that conflicts between vehicles and pedestrians/cyclists are avoided. Improved pedestrian connections to be made between the school and Shinfield Road, being located away from the majority of traffic movements will enable those boarding / alighting local buses at the stops on Shinfield Road to walk in and out of the school site with minimal crossing of trafficked areas within the school grounds and avoiding the need to traverse the car park and negotiate cars manoeuvring in and out of spaces.

- a new interchange facility within the school site close to the north entrance for Coaches and mini-buses providing daily school transport. This will ensure that pupils can be appropriately managed as they board and alight school transport. Their route to and from the school buildings will involve minimal crossing of trafficked areas and avoid the need to traverse the car park.

- additional cycle parking close to the proposed Senior School site. In this location, covered parking for 60 bikes is proposed to be provided for pupils. This is additional to the 12 existing staff cycle parking spaces that will be relocated.

5.12 WBC Standards for cycle parking for primary and secondary schools are 1 space per 3 pupils and 1 space per 5 staff. To be in line with WBC standards there would need to be 100 cycle spaces for the additional pupils and 6 for the additional staff. WBC have agreed that the WBC Standards may be appropriate for schools with a defined local neighbourhood catchment, but are significantly less so for schools with a considerably wider catchment area such as Crosfields where a significant proportion of pupils live well beyond reasonable cycling distance. Given the existing level of cycling WBC consider that the proposed provision will prove sufficient, but will require adequacy of provision to be kept under review and additional provision made should this prove appropriate. The level of occupancy of the cycle parking provided will be monitored and recorded monthly to inform whether additional provision is needed.

Travel Plan

5.13 RBC incorrectly asserts that the draft Travel Plan that accompanies the submission is limited only to reducing "the number of single car occupancy vehicles which would only relate to staff". The Travel Plan clearly states that, with the overall intention of reducing the environmental impact of car use for school related journeys, it sets out to:

- reduce the number of car trips to and from the school by staff, parents and their children;
- help staff, as well as parents and their children to choose safe and convenient alternative ways for their journey to and from school; and
- improve conditions for pupils choosing more sustainable modes of travel.

5.14 WBC are content that the draft Travel Plan forms a good basis for development and have agreed to assist the school to produce a version which includes targets, informed by the results of comprehensive staff and parent travel survey questionnaires, which will be conditioned to be approved and in operation prior to opening.

5.15 Crosfields already promotes travel initiatives in advance of formally adopting a Travel Plan. For some time an initial school transport route has been in operation with 9 regular users. From September 2019 three further school transport routes have been added, initially used by 18 pupils. Crosfields is committed to expanding school transport routes as the school grows. The opportunity to work with Reading Buses to be explored. The idea of developing a minibus shuttle from the Science Park is proving popular with the growing number of families living south of M4 as it avoids need to travel on Shinfield Road at all. On the recent 'Walk to School' day, 13% pupils took up the challenge. Crosfields will be encouraging more of these events through the Travel Plan with the aim of changing behaviours.

6.0 Summary and Conclusion

6.1 Much of RBC's objection relates to matters of Policy compliance associated with the detail of the proposed arrangements within the school site which are not matters which should concern Reading Borough Council given that the school is within the borough of Wokingham.

6.2 Contrary to RBC's assertion, the proposed development is in full compliance with NPPG paragraph 110 and Wokingham Core Strategy policy CP6. The Crosfields development gives priority to pedestrian and cycle movements within the school grounds, facilitates access to high quality public transport, includes an interchange facility for school transport services and makes appropriate provision for people with disabilities and reduced mobility. Thus, the proposals create a safe, secure and attractive environment which minimises the scope for conflicts between pedestrians, cyclists and vehicles. It also allows for efficient servicing and caters for EVs in safe, accessible and convenient locations.

6.3 The need for, scale, scope and level of detail required of the TA was established and agreed early in the development management process in consultation with Wokingham Borough Council (WBC) as the local highway authority.

6.4 The TA complies with the National Planning Practice Guidance and demonstrates that:

a) appropriate opportunities to promote sustainable transport modes can be taken up, given the type of development and its location;
b) safe and suitable access to the site can be achieved for all users; and

c) there are no significant impacts from the development on the transport network (in terms of capacity and congestion), or on highway safety, sufficient to require additional mitigation.

6.5 RBC's remaining concerns relate to the amount of additional traffic from the Crosfields expansion and its impact on the Shinfield Road junctions with Whitley Wood Road or Elm Road, which RBC considers is not considered to have been adequately assessed in the TA.

6.6 RBC has admitted that it does not hold any drawings or quantitative capacity analysis of the junctions' performance under current traffic conditions and, on spurious grounds, is unwilling to disclose what it regards as an acceptable impact. Regardless, RBC has suggested that the impact of additional traffic from the Crosfields expansion will be sufficient to "adversely affect safety and flow of users of the existing road network within Reading". RBC has suggested a need to provide various mitigation measures on A327 Shinfield Road which Glanville and WBC consider to be out of proportion to the scale and effect of the proposed development, and which are either not realistically feasible or of undefined benefit.

6.7 It has been shown in this Response that the amount of additional traffic from the Crosfields expansion represents a total increase of up to 5.5% of the total flow on the Shinfield Road, not 20% as asserted by RBC.

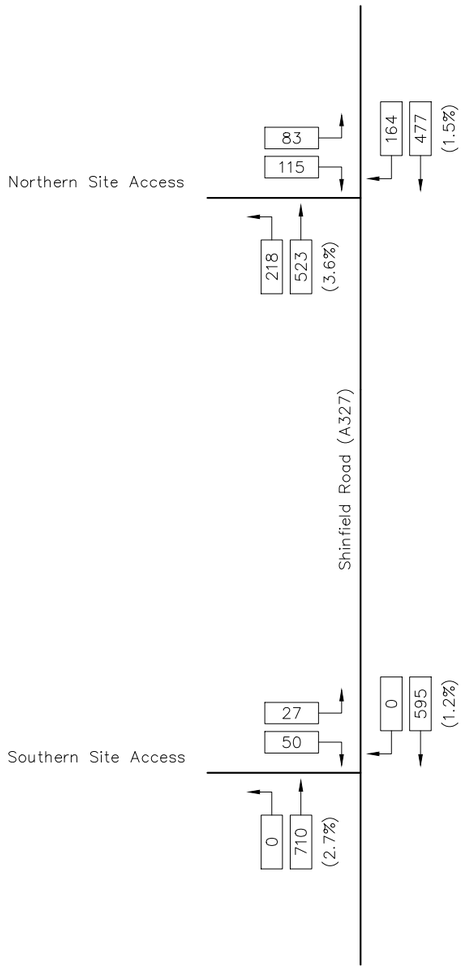

6.8 Notwithstanding, it is clear from the results of January 2020 turning count surveys at the school entrances that the figure in the TA is over-stated. It has also been shown that the revised figure should be reduced to take account of existing pupils who would no longer transfer to other nearby schools and further reduced to take account of the combined effect of other reasons for possible reduction in traffic generated by the development.

6.9 Moreover, as the school could expand by 16% to 665 pupils within its existing buildings and hence without recourse to planning, the relevant increase in traffic in terms of assessment of traffic impact is even lower still.

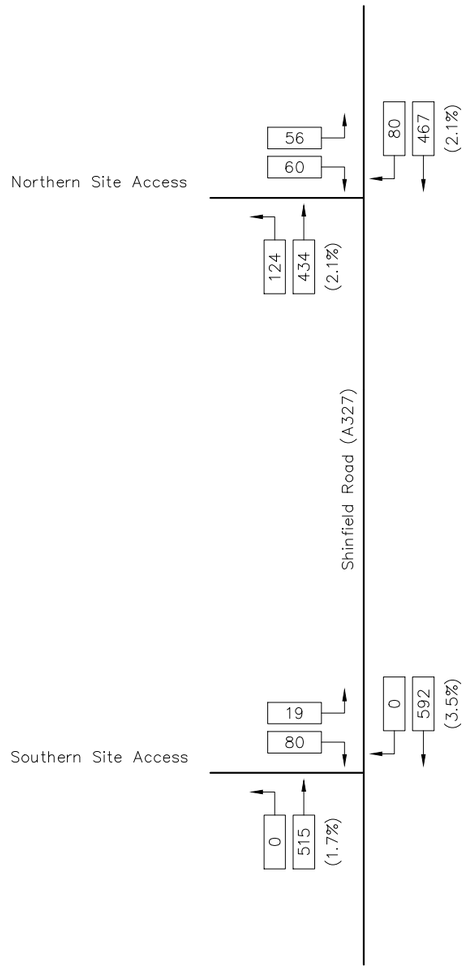

6.10 The RBC objection cannot be sustained in terms of suggesting that the development would have an unacceptable impact on highway safety, or that the residual cumulative impacts on the road network would be severe. Accordingly, the RBC objection does not provide cause for the Application to be refused on highways grounds.

ATC SPEED BINS & DATA HEADINGS

Heading	Description
0 - 5	Speed bin totals 0 - 5 mph
5 - 10	Speed bin totals 5 - 10 mph
10 -15	Speed bin totals 10 - 15 mph
15 - 20	Speed bin totals 15 - 20 mph
20 - 25	Speed bin totals 20 - 25 mph
25 - 30	Speed bin totals 25 - 30 mph
30 - 35	Speed bin totals 30 - 35 mph
35 - 40	Speed bin totals 35 - 40 mph
40 - 45	Speed bin totals 40 - 45 mph
45 - 50	Speed bin totals 45 - 50 mph
50 - 55	Speed bin totals 50 - 55 mph
55 - 60	Speed bin totals 55 - 60 mph
60 - 65	Speed bin totals 60 - 65 mph
65 - 70	Speed bin totals 65 - 70 mph
70 - 75	Speed bin totals 70 - 75 mph
75 - 80	Speed bin totals 75 - 80 mph
80 - 85	Speed bin totals 80 - 85 mph
85 - 90	Speed bin totals 85 - 90 mph
90 - 95	Speed bin totals 90 - 95 mph
95 - 100	Speed bin totals 95 - 100 mph
100 - 105	Speed bin totals 100 - 105 mph
105 - 110	Speed bin totals 105 - 110 mph
110 - 115	Speed bin totals 110 - 115 mph
115 - 120	Speed bin totals 115 - 120 mph
120 - 125	Speed bin totals 120 - 125 mph
125 - 130	Speed bin totals 125 - 130 mph
130 - 135	Speed bin totals 130 - 135 mph
135 - 140	Speed bin totals 135 - 140 mph

Heading	Description
>PSL	Greater than the posted speed limit
>PSL%	Greater than the posted speed limit as a percentage
>SL1 ACPO	Greater than ACPO (Association of Chief Police Officers) standard. ACPO is PSL x 10%+2mph
>SL1% ACPO	Greater than ACPO displayed as a percentage
>SL2 DfT	Greater than DFT (Department For Transport) standard. DFT is PSL plus 15mph.
>SL2% DfT	Greater than DFT displayed as a percentage
Mean	Average speed
Vpp 85	85th percentile speed

ATC SPEED BINS & DATA HEADINGS

Heading	Description
0 - 5	Speed bin totals 0 - 5 mph
5 - 10	Speed bin totals 5 - 10 mph
10 -15	Speed bin totals 10 - 15 mph
15 - 20	Speed bin totals 15 - 20 mph
20 - 25	Speed bin totals 20 - 25 mph
25 - 30	Speed bin totals 25 - 30 mph
30 - 35	Speed bin totals 30 - 35 mph
35 - 40	Speed bin totals 35 - 40 mph
40 - 45	Speed bin totals 40 - 45 mph
45 - 50	Speed bin totals 45 - 50 mph
50 - 55	Speed bin totals 50 - 55 mph
55 - 60	Speed bin totals 55 - 60 mph
60 - 65	Speed bin totals 60 - 65 mph
65 - 70	Speed bin totals 65 - 70 mph
70 - 75	Speed bin totals 70 - 75 mph
75 - 80	Speed bin totals 75 - 80 mph
80 - 85	Speed bin totals 80 - 85 mph
85 - 90	Speed bin totals 85 - 90 mph
90 - 95	Speed bin totals 90 - 95 mph
95 - 100	Speed bin totals 95 - 100 mph
100 - 105	Speed bin totals 100 - 105 mph
105 - 110	Speed bin totals 105 - 110 mph
110 - 115	Speed bin totals 110 - 115 mph
115 - 120	Speed bin totals 115 - 120 mph
120 - 125	Speed bin totals 120 - 125 mph
125 - 130	Speed bin totals 125 - 130 mph
130 - 135	Speed bin totals 130 - 135 mph
135 - 140	Speed bin totals 135 - 140 mph

Heading	Description
>PSL	Greater than the posted speed limit
>PSL%	Greater than the posted speed limit as a percentage
>SL1 ACPO	Greater than ACPO (Association of Chief Police Officers) standard. ACPO is PSL x 10%+2mph
>SL1% ACPO	Greater than ACPO displayed as a percentage
>SL2 DfT	Greater than DFT (Department For Transport) standard. DFT is PSL plus 15mph.
>SL2% DfT	Greater than DFT displayed as a percentage
Mean	Average speed
Vpp 85	85th percentile speed

ATC SPEED BINS & DATA HEADINGS

Heading	Description
0 - 5	Speed bin totals 0 - 5 mph
5 - 10	Speed bin totals 5 - 10 mph
10 -15	Speed bin totals 10 - 15 mph
15 - 20	Speed bin totals 15 - 20 mph
20 - 25	Speed bin totals 20 - 25 mph
25 - 30	Speed bin totals 25 - 30 mph
30 - 35	Speed bin totals 30 - 35 mph
35 - 40	Speed bin totals 35 - 40 mph
40 - 45	Speed bin totals 40 - 45 mph
45 - 50	Speed bin totals 45 - 50 mph
50 - 55	Speed bin totals 50 - 55 mph
55 - 60	Speed bin totals 55 - 60 mph
60 - 65	Speed bin totals 60 - 65 mph
65 - 70	Speed bin totals 65 - 70 mph
70 - 75	Speed bin totals 70 - 75 mph
75 - 80	Speed bin totals 75 - 80 mph
80 - 85	Speed bin totals 80 - 85 mph
85 - 90	Speed bin totals 85 - 90 mph
90 - 95	Speed bin totals 90 - 95 mph
95 - 100	Speed bin totals 95 - 100 mph
100 - 105	Speed bin totals 100 - 105 mph
105 - 110	Speed bin totals 105 - 110 mph
110 - 115	Speed bin totals 110 - 115 mph
115 - 120	Speed bin totals 115 - 120 mph
120 - 125	Speed bin totals 120 - 125 mph
125 - 130	Speed bin totals 125 - 130 mph
130 - 135	Speed bin totals 130 - 135 mph
135 - 140	Speed bin totals 135 - 140 mph

Heading	Description
>PSL	Greater than the posted speed limit
>PSL%	Greater than the posted speed limit as a percentage
>SL1 ACPO	Greater than ACPO (Association of Chief Police Officers) standard. ACPO is PSL x 10%+2mph
>SL1% ACPO	Greater than ACPO displayed as a percentage
>SL2 DfT	Greater than DFT (Department For Transport) standard. DFT is PSL plus 15mph.
>SL2% DfT	Greater than DFT displayed as a percentage
Mean	Average speed
Vpp 85	85th percentile speed

Summary Graphs

ATC VEHICLE CATEGORIES

Axles	Groups	Description	Class		Parameters	Dominant Vehicle	Aggregate
2	1 or 2	Very Short - Pedal Cycle	PC	1	d(1)<1.18m & axles=2		1 (Light)
2	1 or 2	Very Short - Motor Cycle	MC	2	d(1)>=1.18m d(1)<1.7m & axles=2		
2	1 or 2	Short - Sedan, Wagon, 4WD, Utility, Light Van	SV	3	d(1)>=1.7m, d(1)<=3.2m & axles=2		
3, 4 or 5	3	Short Towing - Trailer, Caravan, Boat, etc.	SVT	4	groups=3, d(1)>=2.1m, d(1)<=3.2m, d(2)>=2.1m & axles=3,4,5		
2	2	Two axle truck or Bus	TB2	5	d(1)>3.2m & axles=2		2 (Medium)
3	2	Three axle truck or Bus	TB3	6	axles=3 & groups=2		
>3	2	Four axle truck	T4	7	axles>3 & groups=2		
3	3	Three axle articulated vehicle or Rigid vehicle and trailer	ART3	8	d(1)>3.2m, axles=3 & groups=3		3 (Heavy)
4	>2	Four axle articulated vehicle or Rigid vehicle and trailer	ART4	9	d(2)<2.1m or d(1)<2.1m or d(1)>3.2m axles = 4 & groups>2		
5	>2	Five axle articulated vehicle or Rigid vehicle and trailer	ART5	10	d(2)<2.1m or d(1)<2.1m or d(1)>3.2m axles=5 & groups>2		
>=6	>2	Six (or more) axle articulated vehicle or Rigid vehicle and trailer	ART6	11	axles=6 & groups>2 or axles>6 & groups=3		
>6	4	B-Double or Heavy truck and trailer	BD	12	groups=4 & axles>6		
>6	>=5	Double or triple road train or Heavy truck and two trailers	DRT	13	groups>=5 & axles>6		
>6	>6	Triple Road Train or Heavy and three (or more) trailers	TRT	14	groups>6 & axles>6		

ATC SPEED BINS & DATA HEADINGS

Heading	Description
0 - 5	Speed bin totals 0 - 5 mph
5 - 10	Speed bin totals 5 - 10 mph
10 -15	Speed bin totals 10 - 15 mph
15 - 20	Speed bin totals 15 - 20 mph
20 - 25	Speed bin totals 20 - 25 mph
25 - 30	Speed bin totals 25 - 30 mph
30 - 35	Speed bin totals 30 - 35 mph
35 - 40	Speed bin totals 35 - 40 mph
40 - 45	Speed bin totals 40 - 45 mph
45 - 50	Speed bin totals 45 - 50 mph
50 - 55	Speed bin totals 50 - 55 mph
55 - 60	Speed bin totals 55 - 60 mph
60 - 65	Speed bin totals 60 - 65 mph
65 - 70	Speed bin totals 65 - 70 mph
70 - 75	Speed bin totals 70 - 75 mph
75 - 80	Speed bin totals 75 - 80 mph
80 - 85	Speed bin totals 80 - 85 mph
85 - 90	Speed bin totals 85 - 90 mph
90 - 95	Speed bin totals 90 - 95 mph
95 - 100	Speed bin totals 95 - 100 mph
100 - 105	Speed bin totals 100 - 105 mph
105 - 110	Speed bin totals 105 - 110 mph
110 - 115	Speed bin totals 110 - 115 mph
115 - 120	Speed bin totals 115 - 120 mph
120 - 125	Speed bin totals 120 - 125 mph
125 - 130	Speed bin totals 125 - 130 mph
130 - 135	Speed bin totals 130 - 135 mph
135 - 140	Speed bin totals 135 - 140 mph

Heading	Description
>PSL	Greater than the posted speed limit
>PSL%	Greater than the posted speed limit as a percentage
>SL1 ACPO	Greater than ACPO (Association of Chief Police Officers) standard. ACPO is PSL x 10%+2mph
>SL1% ACPO	Greater than ACPO displayed as a percentage
>SL2 DfT	Greater than DFT (Department For Transport) standard. DFT is PSL plus 15mph.
>SL2% DfT	Greater than DFT displayed as a percentage
Mean	Average speed
Vpp 85	85th percentile speed
