VALIDATION REPORT FOLLOWING REMEDIATION ON A SITE AT THE CORNER OF MEADOW ROAD AND ADDISON ROAD, READING, RG1 8EN

1. INTRODUCTION

- 1.1 The remediation at the above site is now complete and this report gives a background to the investigations on the site leading up to the remediation method statement. It includes the final validation testing of the imported soil and topsoil to the landscaped and garden areas.

2. INVESTIGATIONS

- 2.1 Our initial involvement on this site was in March 2018. This consisted of a desk study, together with a report on a site investigation carried out on the 5 March 2018. The report is dated 20 March 2018, reference G/031950/001.
- 2.2 The desk study did not give any indication of potential widespread contamination on the site. However, the site investigation which consisted of three boreholes to 3.0m revealed fill material to between 2.4m and 2.8m.
- 2.3 During the site investigation samples for contamination testing were taken from across the site and this revealed elevated levels of arsenic, lead, benzo[a]pyrene and total petroleum hydrocarbons (TPH). The report recommended remediation in the proposed garden and landscaped areas and also suggested that gas and vapour monitoring might be required due to the above threshold levels of hydrocarbons.
- 2.4 The report included a suggested remediation method statement.
- 2.5 Following discussions with the Contaminated Land Officer of the local authority a revised method statement was prepared in October 2018, reference G/031850/004. This allowed for a further two boreholes to be put down on the site to allow for the installation of standpipes and the monitoring of groundwater. It also allowed for the potential for gas and vapour monitoring but a decision was made by the developers, Natta Homes Limited, to incorporate a vapour barrier within the slab construction of the five terraced properties to be constructed.

VALIDATION REPORT FOLLOWING REMEDIATION ON A SITE AT THE CORNER OF MEADOW ROAD AND ADDISON ROAD, READING, RG1 8EN

- 2.6 On the 28 October 2018 we returned to the site and put down a further borehole and installed a gas and water monitoring standpipe. The borehole revealed fill material to 1.8m in this instance with water being encountered at 2.5m. Samples were taken of the soil at between 2.5m and 2.7m and a water sample was taken from the groundwater in the borehole.
- 2.7 The results of the contamination testing on the soil from the natural ground and the water revealed no undue concentrations of any of the determinands including VOCs and on this basis we concluded that there was no risk to the aquifer and nor was there any potential for contaminants to migrate off the site.

3. SITE REMEDIATION

- 3.1 Natta Homes Limited provided an engineered fill solution for the terraced properties. This entailed the removal of a certain depth of soil from the site and the replacement with well-compacted material.
- 3.2 Natta Homes Limited used PMC Soil Solutions to arrange and supervise the removal of the soil from the site and we were not involved at this stage. Attached with this report is a chain of emails which details their involvement including the number of loads and the Waste Transfer Notes from Biffa who were the receiving landfill site operators.
- 3.3 Natta Homes Limited forwarded to us, in February 2019, test results of the proposed imported soil for the garden areas. The results are appended to this report and show that the soil is suitable for a residential end use with no undue concentrations of any of the determinands.

**VALIDATION REPORT FOLLOWING REMEDIATION ON A SITE AT THE
CORNER OF MEADOW ROAD AND ADDISON ROAD, READING, RG1 8EN**

- 3.4 For the final validation, we returned to the site on the 10 May 2019 and took seven samples from the site; five of these were from between 0.3m and 0.7m in the garden areas with a further two taken from stockpiles of soil ready to be laid. The site descriptions of this sampling are attached and confirm the presence of the marker layer at 700mm from ground level. The results from Chemtest are appended and indicate that the soil has no undue concentrations of any of the contaminants and can be considered to be uncontaminated for a residential end use with no further remediation required.
- 3.5 In light of the validation testing we can confirm that remediation has been undertaken in line with the agreed remediation method statement and we would formally request the discharge of the appropriate condition relating to contaminated land.
- 3.6 Under separate cover Natta Homes Limited will provide details of the gas and vapour barrier installed.

Subject: RE: PMC 1691 - Corner Meadow Road & Addison Road, Caversham, Reading - Haul and Remove Quotation Updated v2

Hi Justine,

Instruction agreed , Please arrange for man to check and lorries for Wednesday next week , starting with about 6 loads

The loads are taken from the foundation area therefore hopefully at item 1 rate

Regards

Ross McLellan
Chief Quantity Surveyor

Subject: Re: PMC 1691 - Corner Meadow Road & Addison Road, Caversham, Reading - Haul and Remove Quotation Updated v2

My assistant Dani will send over the sample location plan now as discussed, as I'm struggling from my phone.

If you can let me know which items will apply based on how the material has been dug then we can look to set up the relevant facilities tomorrow. Then, subject to receiving an instruction/PO tomorrow by 12 midday we can get lorries booked in for Monday.

Subject: PMC 1691 - Corner Meadow Road & Addison Road, Caversham, Reading - Haul and Remove Quotation Updated v2

Afternoon Ross

As promised here our are revised rates based on our recent testing:

Due to widespread asbestos found in both fragment and free fibre form – please see the attached fragment ID and quantification of soils where applicable. Please note that this doesn't mean that these are the only areas on site that have the asbestos containing material.

Item 1: Non-haz with asbestos <0.1% - £595.75 per 8 wheel load – PMCTP002, PMCTP03, PMCTP05, PMCTP06, PMCTP07 and similar material

Item 2: Hazardous by TPH/Metals with asbestos <0.1% and no visible fragments - £1425.25 – PMCTP01, PMCTP04 and similar material

Item 3: If materials from Item 1 and Item 2 have been mixed together then Item 2 rate applies.

Item 4: Hazardous by visible asbestos fragments only within non haz soils - £1975.50 per 8 wheel load

Item 5: Hazardous by TPH/Metals and with visible asbestos fragments - £3195.75

Note: We can assist you in dealing with visible ACM by checking the material prior to its leaving site if you can supply a machine. Within the rates I have allowed for a consultant to attend site (Cat B asbestos trained). Please liaise with your H&S department on the asbestos issue. All asbestos control measure including damping down and air monitoring including RPE and PPE to be provided by others.

No vegetation, ACM, Tarmac, JKW or the like in item 1-5 unless stated.

Loading, Traffic Management, Ticketing and Wheel Cleaning by others.

Subject to analysis, acceptance and availability.

Programme and outputs to be discussed.

Price based as of today's date.

Producer Responsibility to ensure material is consistent with the analysis provided.

Waiting Time and Rejected Loads charged at £1.00 per minute after 20 mins during operational hours.

Kind Regards

Justine Cutmore

My assistant Dani will send over the sample location plan now as discussed, as I'm struggling from my phone.

If you can let me know which items will apply based on how the material has been dug then we can look to set up the relevant facilities tomorrow. Then, subject to receiving an instruction/PO tomorrow by 12 midday we can get lorries booked in for Monday.

To: Ross McLellan

Cc: Estimating

Subject: PMC 1691 - Corner Meadow Road & Addison Road, Caversham, Reading - Haul and Remove Quotation Updated v2

Afternoon Ross

As promised here our are revised rates based on our recent testing:

Due to widespread asbestos found in both fragment and free fibre form – please see the attached fragment ID and quantification of soils where applicable. Please note that this doesn't mean that these are the only areas on site that have the asbestos containing material.

Item 1: Non-haz with asbestos <0.1% - £595.75 per 8 wheel load – PMCTP002, PMCTP03, PMCTP05, PMCTP06, PMCTP07 and similar material

Item 2: Hazardous by TPH/Metals with asbestos <0.1% and no visible fragments - £1425.25 – PMCTP01, PMCTP04 and similar material

Item 3: If materials from Item 1 and Item 2 have been mixed together then Item 2 rate applies.

Item 4: Hazardous by visible asbestos fragments only within non haz soils - £1975.50 per 8 wheel load

Item 5: Hazardous by TPH/Metals and with visible asbestos fragments - £3195.75

Note: We can assist you in dealing with visible ACM by checking the material prior to its leaving site if you can supply a machine. Within the rates I have allowed for a consultant to attend site (Cat B asbestos trained). Please liaise with your H&S department on the asbestos issue. All asbestos control measure including damping down and air monitoring including RPE and PPE to be provided by others.

No vegetation, ACM, Tarmac, JKW or the like in item 1-5 unless stated.

Loading, Traffic Management, Ticketing and Wheel Cleaning by others.

Subject to analysis, acceptance and availability.

Programme and outputs to be discussed.

Price based as of today's date.

Producer Responsibility to ensure material is consistent with the analysis provided.

Waiting Time and Rejected Loads charged at £1.00 per minute after 20 mins during operational hours.

Kind Regards

Justine Cutmore

Item 1: Non-haz with asbestos <0.1% - £595.75 per 8 wheel load – PMCTP002, PMCTP03, PMCTP05, PMCTP06, PMCTP07 and similar material

Item 2: Hazardous by TPH/Metals with asbestos <0.1% and no visible fragments - £1425.25 – PMCTP01, PMCTP04 and similar material

Item 3: If materials from Item 1 and Item 2 have been mixed together then Item 2 rate applies.

Item 4: Hazardous by visible asbestos fragments only within non haz soils - £1975.50 per 8 wheel load

Item 5: Hazardous by TPH/Metals and with visible asbestos fragments - £3195.75

Note: We can assist you in dealing with visible ACM by checking the material prior to its leaving site if you can supply a machine. Within the rates I have allowed for a consultant to attend site (Cat B asbestos trained). Please liaise with your H&S department on the asbestos issue. All asbestos control measure including damping down and air monitoring including RPE and PPE to be provided by others.

No vegetation, ACM, Tarmac, JKW or the like in item 1-5 unless stated.

Loading, Traffic Management, Ticketing and Wheel Cleaning by others.

Subject to analysis, acceptance and availability.

Programme and outputs to be discussed.

Price based as of today's date.

Producer Responsibility to ensure material is consistent with the analysis provided.

Waiting Time and Rejected Loads charged at £1.00 per minute after 20 mins during operational hours.

Kind Regards

Justine Cutmore

Subject: Re: PMC 1691 - Corner Meadow Road & Addison Road, Caversham, Reading - Haul and Remove Quotation Updated v2

My assistant Dani will send over the sample location plan now as discussed, as I'm struggling from my phone.

If you can let me know which items will apply based on how the material has been dug then we can look to set up the relevant facilities tomorrow. Then, subject to receiving an instruction/PO tomorrow by 12 midday we can get lorries booked in for Monday.

Subject: PMC 1691 - Corner Meadow Road & Addison Road, Caversham, Reading - Haul and Remove Quotation Updated v2

Afternoon Ross

As promised here our are revised rates based on our recent testing:

Due to widespread asbestos found in both fragment and free fibre form – please see the attached fragment ID and quantification of soils where applicable. Please note that this doesn't mean that these are the only areas on site that have the asbestos containing material.

Item 1: Non-haz with asbestos <0.1% - £595.75 per 8 wheel load – PMCTPO02, PMCTP03, PMCTP05, PMCTP06, PMCTP07 and similar material

Item 2: Hazardous by TPH/Metals with asbestos <0.1% and no visible fragments - £1425.25 – PMCTP01, PMCTP04 and similar material

Item 3: If materials from Item 1 and Item 2 have been mixed together then Item 2 rate applies.

Item 4: Hazardous by visible asbestos fragments only within non haz soils - £1975.50 per 8 wheel load

Item 5: Hazardous by TPH/Metals and with visible asbestos fragments - £3195.75

Note: We can assist you in dealing with visible ACM by checking the material prior to its leaving site if you can supply a machine. Within the rates I have allowed for a consultant to attend site (Cat B asbestos trained). Please liaise with your H&S department on the asbestos issue. All asbestos control measure including damping down and air monitoring including RPE and PPE to be provided by others.

No vegetation, ACM, Tarmac, JKW or the like in item 1-5 unless stated.

Loading, Traffic Management, Ticketing and Wheel Cleaning by others.

Subject to analysis, acceptance and availability.

Programme and outputs to be discussed.

Price based as of today's date.

Producer Responsibility to ensure material is consistent with the analysis provided.

Waiting Time and Rejected Loads charged at £1.00 per minute after 20 mins during operational hours.

Kind Regards

Justine Cutmore

My assistant Dani will send over the sample location plan now as discussed, as I'm struggling from my phone.

If you can let me know which items will apply based on how the material has been dug then we can look to set up the relevant facilities tomorrow. Then, subject to receiving an instruction/PO tomorrow by 12 midday we can get lorries booked in for Monday.
