Subject: Re: PMC 1691 - Corner Meadow Road & Addison Road, Caversham, Reading - Haul and Remove Quotation Updated v2

My assistant Dani will send over the sample location plan now as discussed, as I'm struggling from my phone.

If you can let me know which items will apply based on how the material has been dug then we can look to set up the relevant facilities tomorrow. Then, subject to receiving an instruction/PO tomorrow by 12 midday we can get lorries booked in for Monday.

Subject: PMC 1691 - Corner Meadow Road & Addison Road, Caversham, Reading - Haul and Remove Quotation Updated v2

Afternoon Ross

As promised here our are revised rates based on our recent testing:

Due to widespread asbestos found in both fragment and free fibre form – please see the attached fragment ID and quantification of soils where applicable. Please note that this doesn't mean that these are the only areas on site that have the asbestos containing material.

Item 1: Non-haz with asbestos <0.1% - £595.75 per 8 wheel load – PMCTP002, PMCTP03, PMCTP05, PMCTP06, PMCTP07 and similar material

Item 2: Hazardous by TPH/Metals with asbestos <0.1% and no visible fragments - £1425.25 – PMCTP01, PMCTP04 and similar material

Item 3: If materials from Item 1 and Item 2 have been mixed together then Item 2 rate applies.

Item 4: Hazardous by visible asbestos fragments only within non haz soils - £1975.50 per 8 wheel load

Item 5: Hazardous by TPH/Metals and with visible asbestos fragments - £3195.75

Note: We can assist you in dealing with visible ACM by checking the material prior to its leaving site if you can supply a machine. Within the rates I have allowed for a consultant to attend site (Cat B asbestos trained). Please liaise with your H&S department on the asbestos issue. All asbestos control measure including damping down and air monitoring including RPE and PPE to be provided by others.

No vegetation, ACM, Tarmac, JKW or the like in item 1-5 unless stated.

Loading, Traffic Management, Ticketing and Wheel Cleaning by others.

Subject to analysis, acceptance and availability.

Programme and outputs to be discussed.

Price based as of today's date.

Producer Responsibility to ensure material is consistent with the analysis provided.

Waiting Time and Rejected Loads charged at £1.00 per minute after 20 mins during operational hours.

Kind Regards

Justine Cutmore

Subject: Re: PMC 1691 - Corner Meadow Road & Addison Road, Caversham, Reading - Haul and Remove Quotation Updated v2

My assistant Dani will send over the sample location plan now as discussed, as I'm struggling from my phone.

If you can let me know which items will apply based on how the material has been dug then we can look to set up the relevant facilities tomorrow. Then, subject to receiving an instruction/PO tomorrow by 12 midday we can get lorries booked in for Monday.

Subject: PMC 1691 - Corner Meadow Road & Addison Road, Caversham, Reading - Haul and Remove Quotation Updated v2

Afternoon Ross

As promised here our are revised rates based on our recent testing:

Due to widespread asbestos found in both fragment and free fibre form – please see the attached fragment ID and quantification of soils where applicable. Please note that this doesn't mean that these are the only areas on site that have the asbestos containing material.

Item 1: Non-haz with asbestos <0.1% - £595.75 per 8 wheel load – PMCTPO02, PMCTP03, PMCTP05, PMCTP06, PMCTP07 and similar material

Item 2: Hazardous by TPH/Metals with asbestos <0.1% and no visible fragments - £1425.25 – PMCTP01, PMCTP04 and similar material

Item 3: If materials from Item 1 and Item 2 have been mixed together then Item 2 rate applies.

Item 4: Hazardous by visible asbestos fragments only within non haz soils - £1975.50 per 8 wheel load

Item 5: Hazardous by TPH/Metals and with visible asbestos fragments - £3195.75

Note: We can assist you in dealing with visible ACM by checking the material prior to its leaving site if you can supply a machine. Within the rates I have allowed for a consultant to attend site (Cat B asbestos trained). Please liaise with your H&S department on the asbestos issue. All asbestos control measure including damping down and air monitoring including RPE and PPE to be provided by others.

No vegetation, ACM, Tarmac, JKW or the like in item 1-5 unless stated.

Loading, Traffic Management, Ticketing and Wheel Cleaning by others.

Subject to analysis, acceptance and availability.

Programme and outputs to be discussed.

Price based as of today's date.

Producer Responsibility to ensure material is consistent with the analysis provided.

Waiting Time and Rejected Loads charged at £1.00 per minute after 20 mins during operational hours.

Kind Regards

Justine Cutmore

My assistant Dani will send over the sample location plan now as discussed, as I'm struggling from my phone.

If you can let me know which items will apply based on how the material has been dug then we can look to set up the relevant facilities tomorrow. Then, subject to receiving an instruction/PO tomorrow by 12 midday we can get lorries booked in for Monday.

Subject: PMC 1691 - Corner Meadow Road & Addison Road, Caversham, Reading - Haul and Remove Quotation Updated v2

Afternoon Ross

As promised here our are revised rates based on our recent testing:

Due to widespread asbestos found in both fragment and free fibre form – please see the attached fragment ID and quantification of soils where applicable. Please note that this doesn't mean that these are the only areas on site that have the asbestos containing material.

Item 1: Non-haz with asbestos <0.1% - £595.75 per 8 wheel load – PMCTPO02, PMCTP03, PMCTP05, PMCTP06, PMCTP07 and similar material

Item 2: Hazardous by TPH/Metals with asbestos <0.1% and no visible fragments - £1425.25 – PMCTP01, PMCTP04 and similar material

Item 3: If materials from Item 1 and Item 2 have been mixed together then Item 2 rate applies.

Item 4: Hazardous by visible asbestos fragments only within non haz soils - £1975.50 per 8 wheel load

Item 5: Hazardous by TPH/Metals and with visible asbestos fragments - £3195.75

Note: We can assist you in dealing with visible ACM by checking the material prior to its leaving site if you can supply a machine. Within the rates I have allowed for a consultant to attend site (Cat B asbestos trained). Please liaise with your H&S department on the asbestos issue. All asbestos control measure including damping down and air monitoring including RPE and PPE to be provided by others.

No vegetation, ACM, Tarmac, JKW or the like in item 1-5 unless stated.

Loading, Traffic Management, Ticketing and Wheel Cleaning by others.

Subject to analysis, acceptance and availability.

Programme and outputs to be discussed.

Price based as of today's date.

Producer Responsibility to ensure material is consistent with the analysis provided.

Waiting Time and Rejected Loads charged at £1.00 per minute after 20 mins during operational hours.

Kind Regards

Justine Cutmore

Good afternoon Ross,

PMCSS was requested by Natta to attend the Addison Road site in Reading to visually inspect and treat soils prior to removal from site. Soils were inspected for the presence of visible asbestos fragments, tarmac and other items that may not be acceptable at the receiving facility. Materials not suitable were removed by PMCSS and left with Natta for onwards removal. PMCSS attended site on 12/2/19, 14/2/19, 22/2/19, 28/3/19, 10/4/19, 11/4/19 and 24/4/19.

All inspected soils were subsequently removed to Biffa Redhill as non-hazardous soils inc ACM <0.1% (EWC 17 05 04) (permit attached) by PMCSS (Waste Carrier Licence Attached).

A total of 27 loads of material were removed to the above facility. The associated invoices and waste transfer notes are attached for information.

Should you require any further information, please do not hesitate to contact me.

Kindest regards

Tom

SOP	Title	Parameters included	Method summary
2010	pH Value of Soils	pH	pH Meter
2030	Moisture and Stone Content of Soils(Requirement of MCERTS)	Moisture content	Determination of moisture content of soil as a percentage of its as received mass obtained at <37°C.
2120	Water Soluble Boron, Sulphate, Magnesium & Chromium	Boron; Sulphate; Magnesium; Chromium	Aqueous extraction / ICP-OES
2300	Cyanides & Thiocyanate in Soils	Free (or easy liberatable) Cyanide; total Cyanide; complex Cyanide; Thiocyanate	Alkaline extraction followed by colorimetric determination using Automated Flow Injection Analyser.
2325	Sulphide in Soils	Sulphide	Steam distillation with sulphuric acid / analysis by 'Aquakem 600' Discrete Analyser, using N,N-dimethyl-p-phenylenediamine.
2430	Total Sulphate in soils	Total Sulphate	Acid digestion followed by determination of sulphate in extract by ICP-OES.
2450	Acid Soluble Metals in Soils	Metals, including: Arsenic; Barium; Beryllium; Cadmium; Chromium; Cobalt; Copper; Lead; Manganese; Mercury; Molybdenum; Nickel; Selenium; Vanadium; Zinc	Acid digestion followed by determination of metals in extract by ICP-MS.
2490	Hexavalent Chromium in Soils	Chromium [VI]	Soil extracts are prepared by extracting dried and ground soil samples into boiling water. Chromium [VI] is determined by 'Aquakem 600' Discrete Analyser using 1,5-diphenylcarbazide.
2625	Total Organic Carbon in Soils	Total organic Carbon (TOC)	Determined by high temperature combustion under oxygen, using an Eltra elemental analyser.
2700	Speciated Polynuclear Aromatic Hydrocarbons (PAH) in Soil by GC-FID	Acenaphthene; Acenaphthylene; Anthracene; Benzo[a]Anthracene; Benzo[a]Pyrene; Benzo[b]Fluoranthene; Benzo[ghi]Perylene; Benzo[k]Fluoranthene; Chrysene; Dibenz[ah]Anthracene; Fluoranthene; Fluorene; Indeno[123cd]Pyrene; Naphthalene; Phenanthrene; Pyrene	Dichloromethane extraction / GC-FID (GC-FID detection is non-selective and can be subject to interference from co-eluting compounds)
2920	Phenols in Soils by HPLC	Phenolic compounds including Resorcinol, Phenol, Methylphenols, Dimethylphenols, 1-Naphthol and TrimethylphenolsNote: chlorophenols are excluded.	60:40 methanol/water mixture extraction, followed by HPLC determination using electrochemical detection.

Report Information

Key

- U UKAS accredited
- M MCERTS and UKAS accredited
- N Unaccredited
- S This analysis has been subcontracted to a UKAS accredited laboratory that is accredited for this analysis
- SN This analysis has been subcontracted to a UKAS accredited laboratory that is not accredited for this analysis
- T This analysis has been subcontracted to an unaccredited laboratory
- I/S Insufficient Sample
- U/S Unsuitable Sample
- N/E not evaluated
- < "less than"
- > "greater than"

Comments or interpretations are beyond the scope of UKAS accreditation

The results relate only to the items tested

Uncertainty of measurement for the determinands tested are available upon request

None of the results in this report have been recovery corrected

All results are expressed on a dry weight basis

The following tests were analysed on samples as received and the results subsequently corrected to a dry weight basis TPH, BTEX, VOCs, SVOCs, PCBs, Phenols

For all other tests the samples were dried at < 37°C prior to analysis

All Asbestos testing is performed at the indicated laboratory

Issue numbers are sequential starting with 1 all subsequent reports are incremented by 1

Sample Deviation Codes

- A - Date of sampling not supplied
- B - Sample age exceeds stability time (sampling to extraction)
- C - Sample not received in appropriate containers
- D - Broken Container
- E - Insufficient Sample (Applies to LOI in Trommel Fines Only)

Sample Retention and Disposal

All soil samples will be retained for a period of 45 days from the date of receipt

All water samples will be retained for 14 days from the date of receipt

Charges may apply to extended sample storage

If you require extended retention of samples, please email your requirements to:

customerservices@chemtest.com
