

KEY

EXISTING

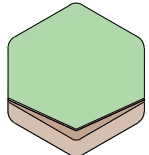

Existing columns location between 1st and 2nd floor

PROPOSED

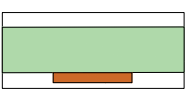

Tree planting

Multi-stemmed Feature shrubs 3.5-4m high M/S  
Refer to Planting Plans for further detail.

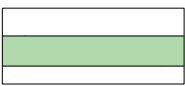

Proposed raised hexagonal metal planters

Ornamental grasses and perennial planting.  
Planter height 645mm above finished floor level.  
FSC hardwood timber seating lounger with sloping backrest and integrated luminaries.

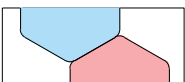

Proposed linear metal planters

Ornamental grasses and perennial planting.  
1000mm wide x 700mm high with integrated timber seating supplied by Iota or similar approved.

Proposed metal planters to provide screening to private terraces

Ornamental grasses and perennial planting.  
Planters 700mm high x Varies.

Rubber crumb safety surface

Various colours

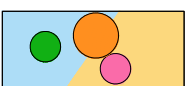

Artificial turf areas

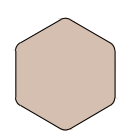

Millboard Enhanced Grain Decking boards

Golden Oak 176x3600x32mm with 4mm gaps.  
Durafix stainless steel screw fixing to joists  
Supplied by Millboard or similar approved.

Indicative locations for incidental play

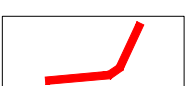

Hexagonal raised timber platform with integrated luminaries

Powder coated metal edge to the sides, dimension 500mm (h).

Small incidental timber seats

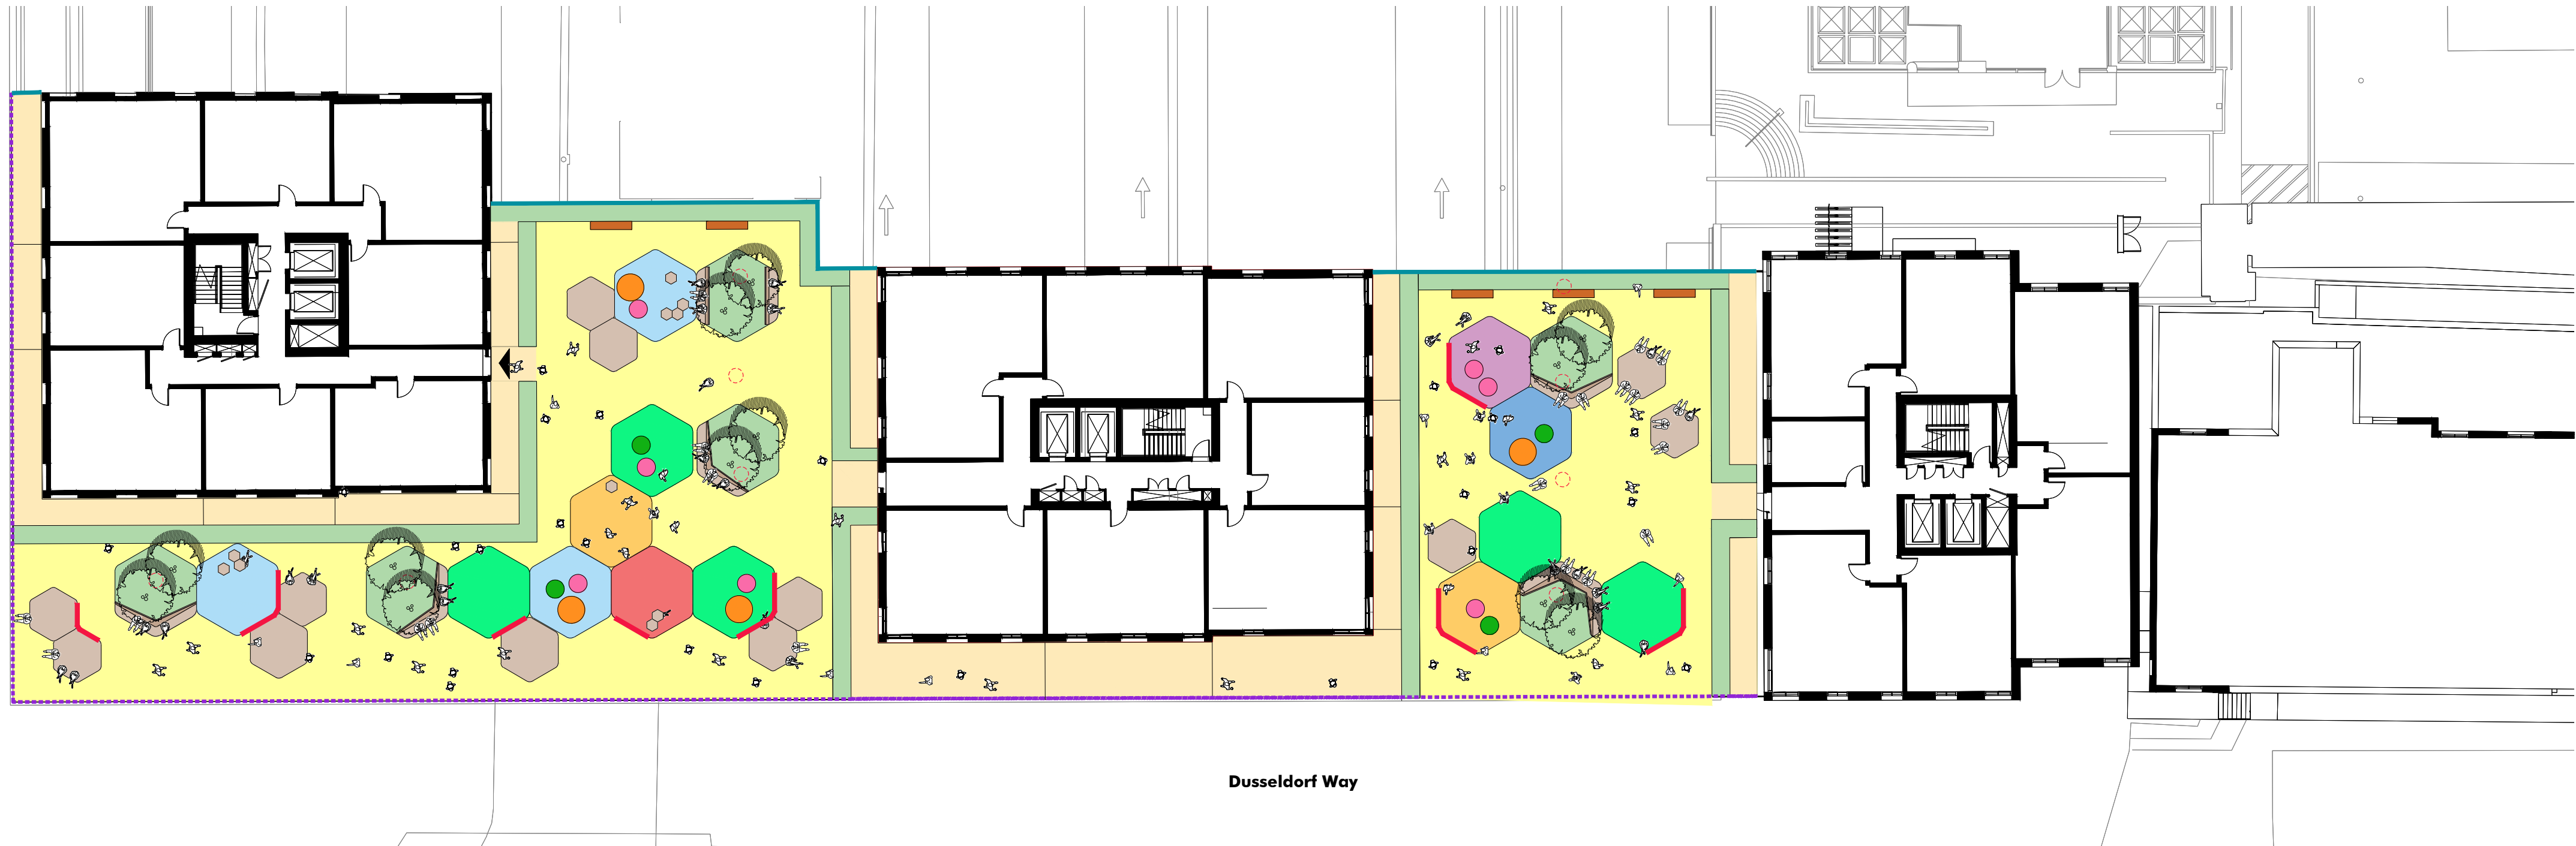

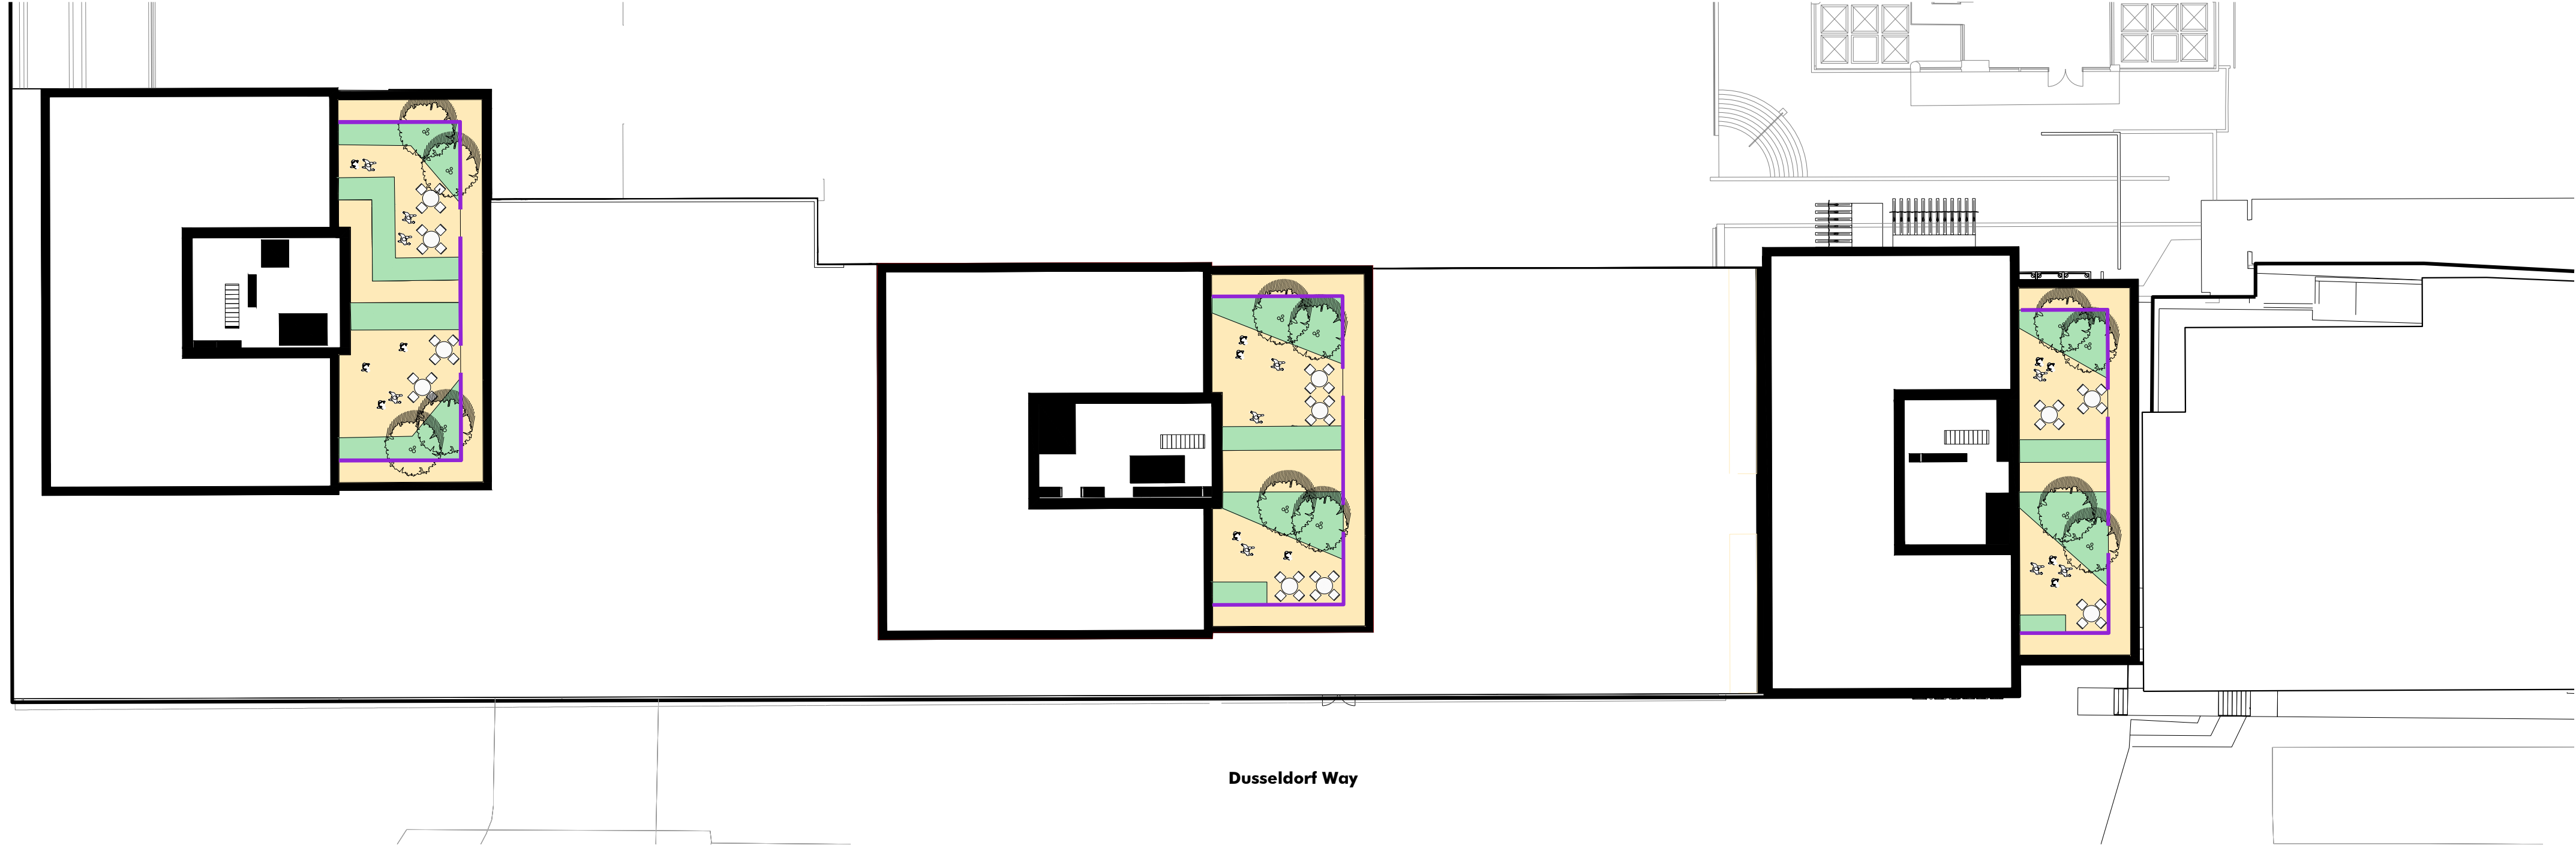

Decorative metal screens 3m high with integral planters + seats to provide backdrop to shelter or seating and incidental play

Decorative metal screen 3m high

Indicative Location for Glass Balustrade or similar to Architects Detail

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | drawn by   | DJ       |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | revision   | P2       |
