

Specification and Reasons

Client Matthew

Address 58 Eastern Avenue, Reading, RG1 5SE

Front garden

T.1 Evergreen Oak

Crown lift by removing 3 limbs back to growth points marked with red/white tape.

Reason

To give clearance to Rhododendrons

Rear garden

T.2 Cedar

Remove storm damaged limb

Reason

To make safe

T.3 Apple

Fell

T.4 Persian Iron Wood

Crown reduce by approximately 25% of leaf area (this equates to the removal of approximately 1-1.5m of the crown spread and the height), see photo for approx. crown outline after the reduction (please note this image is only a rough guide), leaving tree with natural crown shape for species in line with BS3998. The trees dimensions will be approximately.

The crown reduction will be carried out by a highly skilled arborist in accordance with the guidelines in B.S 3998 therefore a natural crown shape will be retained. When crown reductions are carried out in this way it is sometimes very hard for a lay person to be able to see that works have been carried out.

This type of crown reduction results in the least amount of reaction growth by the tree and retains the visual amenity provided by the tree. Both these attributes are good for tree and its owner.

T.5 Strawberry Tree

Prune to give minimum clearance of 1.5m to the adjacent Magnolia
