**Statement**

To whom it may concern

We have just completed the purchase of 332 Kidmore Rd for our home and would like to make some minor adjustments to the approved plans from August 2018 please.

There are a few reasons why. From the previous application the neighbour from the right hand side had some objections due to the size of the house and we felt they would be in favour of a slight scaling back of the proposed extension.

The other reason is to reduce the cost of the build. We would also like to simplify the design of the house by making the rear more symmetrical and having cleaner junctions with the side extension.

Combining the garage and porch with a pitched roof at the front of the house reduces the impact from the street view and the approach from the south.

I hope the proposed amendments will satisfy the council and we would really appreciate a quick response to the amendments please.

Yours sincerely

Russell King
