

Refuse Bins Statement

1 Albert Road
Caversham
Reading
RG4 7AL

1. Requirement

The refuse strategy submitted as part of the planning application made the following commitment under section 1.8:

To further decrease noise arising from the collection bin store we are willing to use noise deadening measures where practicable as requested by Reading Borough Council officers. We would recommend the following approach:

Solid rubber tyres for quieter operation

Sound reducing lining such as the felt, treated to be water proof and robust

Roll top lids to reduce noise from opening

2. Bins

We will provide the following bins with the development which have solid rubber tyres and a roll top lid:

<https://www.alisonhandling.com/1100-litre-roll-top-1100-litre-roll-top>

These will be lined with sound deadening rubber:

<https://www.slip-not.co.uk/productdetail/Sound-Proofing-And-Deadening-Rubber-Sheet-Linear-Meter>

3. Conclusion

Taking the above steps will reduce the noise transmission from emptying the refuse and satisfy the requirements of the Refuse Strategy.
