

“The Butts Yard @ Reading”

CCTV SECURITY & STREET FURNITURE STRATEGY

CCTV

«The Butts Yard» will provide 24 hours live and recorded CCTV of the common areas including corridors, internal space, external decking and servicing areas as part of its agreed conditions with the licensing authority.

The location of the proposed CCTV units are identified on the enclosed drawing ref. J2949/ES/001.

The «The Butts Yard» network of CCTV cameras will be interconnected with the existing Broad Mall Street Shopping Centre system, monitored 24 hours per day in the Control Room, located in the Shopping Centre.

Access to CCTV will be restricted to authorised personal only.

Street furniture:

At closing time of «The Butts Yard», the access gates will be closed and controlled by a security patrol, preventing access to the premises to the public. At the same time, the access to street furniture installed within the premises will also be restricted.

Any elements of street furniture that require protection from weather or are not fixed to the ground will be brought in and stored appropriately. No other street furniture will be provided outside the premises.
