EXECUTIVE SUMMARY

Project Details	Geosphere Environmental Ltd was commissioned by Lochailort Reading, to undertake a Phase 1 Preliminary Risk Assessment at Land at Corner of Weldale Street and North Street, Reading, Berkshire, RG1 7BX. It was understood that the proposed development would comprise of the construction of a multi storey flatted development with associated soft landscaping and assumed car parking.
Site Location / Description	The site was located at Land at Corner of Weldale Street and North Street, Reading, Berkshire, RG1 7BX situated approximately 2.5Km to the south of the town centre of Caversham, and may be located by National Grid Reference (NGR) SU 709 736. The centre of the site comprised of a concrete hardstanding. To the east of this is a tarmacked area used as a carpark, and galvanised double gates for access. The south comprised of soft landscaping with six large deciduous trees approximately 15m in height adjacent to timber fencing.
Geology	The geological map indicated the site to be underlain by superficial deposits Quaternary in age, they include the Taplow Gravel Member with Alluvium to the north. Although not indicated as present upon the site, the possibility that Made Ground was present, could not be discounted.
Hydrogeology	The hydrogeological data provided within the Envirocheck Report indicate a Secondary Aquifer Type A overlying a bedrock Principal Aquifer. The site was not located within a groundwater source protection zone (SPZ).
Hydrology	The nearest surface watercourse was an unnamed freshwater stream, located approximately 204m to the north of the site. The site was not located within a river or tidal flood area and was not likely to be subject to flood warnings. However, the site has potential for groundwater flooding to occur at surface.
History	The earliest available historical map, dated 1878, indicated the site to be terraced residential dwellings with an attached public house. The surrounding area underwent significant developments from the earliest map until the present time, including the development of numerous works, residential housing, blacksmiths and other industrial sites (vehicular garages).
Conceptual Model	Based upon the findings of the preliminary risk assessment and walkover, it has been assessed that the former and present uses of the site may result in potential contamination likely to pose risks to human health and/or Controlled Waters.
Recommendations	It is recommended that the following works are undertaken: Ground investigation, including ground gas/groundwater monitoring and chemical testing.

This Executive Summary only provides a summary of the site data and its assessment. It does not provide a definitive engineering analysis and is for guidance only. It is recommended that the reader reviews the reporting its entirety and any material referenced therein.

1. INTRODUCTION

Geosphere Environmental Ltd was commissioned by Lochailort Reading, to undertake a Phase 1 Desk Study and Preliminary Risk Assessment for a proposed residential development at Land at Corner of Weldale Street and North Street, Reading, Berkshire, RG1 7BX.

It was understood that the proposed development would comprise of the construction of a multi-storey flatted development with associated soft landscaping and assumed car parking. Proposed Development Plans, drawing refs. 17965/1002 and 17965/107 were provided by the Client, and are presented in Appendix 7 of this report.

The primary objectives of the preliminary risk assessment were to:

- Provide an assessment of environmental sensitivity at the site and the surrounding area in relation to any suspected or known contamination which may significantly affect the site and the proposed development; and
- Indicate whether further works are required, and the nature of the works, to enable a more complete assessment of the site.

These were achieved by:

- Undertaking a walkover of the site;
- Researching and assessing the available information regarding the current site status, recorded geology, hydrogeology and hydrology of the site and surrounding area, and details of the history of the site; and
- Development of a Conceptual Site Model.

1.1 Background Information

Documentation regarding the planning application ref. 141626 provided on Reading Borough Council Planning Portal, was reviewed prior to the preparation of this report. It included a new temporary school of modular construction, single storey and flat roofed. New fencing and gates to site perimeter. New hardstanding for car and cycle parking, and pupil hard play.

2. SITE SETTINGS

2.1 Site Description

The subject site was situated in Reading approximately 2.5km km to the south of the town of Caversham, and may be located by National Grid Reference (NGR) SU 709 736.

A Site Location Plan, is shown in Figure 1 below:

Figure 1 – Site Location Plan

Figure 2 – Site Plan

The site is roughly rectangular and covers approximately 0.24 hectares (ha) in area. Elevation ranges between 41m and 42mAOD, sloping shallowly to the north. The centre of the site comprised of a concrete hardstanding. To the east of this is a tarmacked area used as a car park, and galvanised double gates for access. The south comprised of soft landscaping with six large deciduous trees approximately 15m in height, adjacent to timber fencing.

A low-level chain-link fence marks the northern boundary between the site and Reading Ambulance Station. The south is bounded by Weldale Street, and three-storey domestic housing. Immediately to the west is a depression in elevation, Burford Court housing estate and a row of deciduous trees.

A number of features may be identified on site, including three manhole covers approximately 1.0m from the edge of the tarmac car park, with drainage beneath, and a singular lamp post adjacent to the southern extent of the concrete foundation. A large central concrete foundation, likely to have housed the single- storey prefabricated school was present onsite. Elsewhere on site, a newly built 2.0m tall electric box is noted in the southeast corner.

A number of trees were noted to be present on site, including Birch and Willow, these were noted to be of a moderate age, due to their size. A number of tree stumps were noted along the chain-link fence adjacent to the southern and northern borders.

A Site Plan, Drawing ref. 2881,DS,GI 001/Rev 1, is included in Appendix 7 at the end of this report, and in Figure 2 above.

2.2 Site Walkover

A walkover survey of the site was carried out on 4 January 2018. The site walkover was conducted in accordance with CLR 2, (ref. R.11). Photographs taken during the site walkover are included in Appendix 8.

Relevant information from the site walkover has been described in subsection 2.1 above, and in addition to the information already detailed, the following observations are considered relevant to this study:

- o Electrical unit in the southeast corner of the site;
- o Made Ground around the raised areas of the site; and
- o Petroleum spirit switch off valve along ambulance station wall to north, inferred unknown location of storage tank.

2.3 Geological Setting

Details of the geology underlying the site have been obtained from the British Geological Survey (BGS) digital mapping at a scale of 1:50,000, which is provided within the Envirocheck Report.

The geological map indicated the site to be underlain by superficial deposits Quaternary in age, they include the Taplow Gravel Member with Alluvium to the north. Both superficial deposits are fluvial in origin and constitute clay, silt, sand and gravel often found as lenses. The superficial deposits were underlain by Seaford Chalk Formation and Newhaven Chalk Formation, Cretaceous in age.

The site was within an urban area and, although not indicated as present upon the site, the possibility that Made Ground is present, cannot be discounted.

Table 1 below, summarises the factors that may have a potential impact upon the engineering of the proposed development.

Table 1 – Geohazards and Ground Workings				
Potential Hazard	Recorded Risk [m] / [Direction]			Comments
	On-site	Within 250m	Within 500m	
Shrink Swell Clay	-	Very Low - 12m/N	-	-
Ground Workings	-	-	-	-
Chalk Workings	-	-	-	-
Other Workings	-	-	-	-
Collapsible Ground	Very Low	-	-	-
Compressible Ground	-	Moderate - 12m/N	-	-
Ground Dissolution	Low	Very Low - 12m/N, Low - 195m/E, Moderate - 235m/SE, High – 238m/SE.	-	-

Table 1 – Geohazards and Ground Workings				
Potential Hazard	Recorded Risk [m] / [Direction]			Comments
	On-site	Within 250m	Within 500m	
Natural Cavities	-	-	298m/SE, 453m/S	Solution widened pipe x3, solution widened fissure/joint x3
Landslides	Very Low	-	-	-
Running Sands	Very Low	Very Low – 195m/E	-	-

2.4 Hydrogeological Setting

The hydrogeological data provided within the Envirocheck Report indicate a Secondary Aquifer Type A overlying a bedrock Principal Aquifer.

The Environment Agency (ref. R.22) defines a Principal Aquifer as ‘layers of rock or drift deposits that have high intergranular and/or fracture permeability - meaning they usually provide a high level of water storage. They may support water supply and/or river base flow on a strategic scale’.

The Environment Agency (ref. R.22) defines a Secondary Aquifer Type A - permeable layers capable of supporting water supplies at a local rather than strategic scale, and in some cases forming an important source of base flow to rivers. These are generally aquifers formerly classified as minor aquifers.

The site was classified as being within an urban setting as designated by the Environment Agency, which therefore means that the soils are classified as having a high leaching potential.

Soils of high leaching potential are soils that readily transmit liquid discharges because they are either shallow or susceptible to rapid by-pass flow directly to rock, gravel or groundwater.

The site was not located within a groundwater source protection zone (SPZ).

According to the Envirocheck Report, there were unlikely to be any potential risks from rising groundwater at the site.

2.5 Hydrological Setting

The nearest surface watercourse was an unnamed freshwater stream, located approximately 204m to the north of the site.

The available river quality classification for this river was based upon the testing carried out in 2009, and provided a no GQA grade with regards to the Biological Quality and A (very good) with regards to the Chemical Quality.

Chemical GQA grade A (very good) refers all abstractions, very good salmonid fisheries, cyprinid fisheries, natural ecosystems.

Detailed information regarding the classification method can be found on the Environment Agency website (refs. R.5 and ref. R.6).

The site was not located within a river or tidal flood area and was not likely to be subject to flood warnings. However, the site has potential for groundwater flooding to occur at surface.

2.6 Radon

The HPA 'Indicative Atlas of Radon' 2007 (ref. R.8), indicates the site to lie within an area where there is a probability of 1% to 3% of present or future homes being above the action level of 200Bq/m³. As such, the site is classified as a Radon Affected Area. This is confirmed by the Building Research Establishment, Report 211, 2007, (ref.R.9).

3. ENVIRONMENTAL SEARCHES

3.1 Environmental Searches Summary

The environmental searches are detailed fully within the Envirocheck Report presented within Appendix 4. Table 2 shown below, summarises the most relevant findings:

Table 2 - Environmental Searches Summary				
Activity	Distance From The Site			Comments [m]/[direction]
	On-site	Within 250m	250m to 500m	
1. Incidents and Registers				
Red List Discharge Consents	-	-	-	None
Dangerous Substances Inventory Sites – List 1	-	-	-	None
Dangerous Substances Inventory Sites – List 2	-	-	-	None
Radioactive Substances	-	-	-	None
COMAH and NIHHS sites	-	-	-	None
Environment Agency Recorded Pollution Incidents	-	-	2	324m/N (category 3, minor incident involving oils – unknown), 482m/E (category 3, minor incident involving oils – unknown)
IPPC	-	-	-	None
Discharge Consents	-	2	2	204m/N (freshwater stream), 228m/NW (freshwater stream), 391m/NW (treated sewage discharges), 391m/NW (treated sewage discharges)
Sites Determined as Contaminated Land under Part IIA EPA1990	-	-	1	325m/W (remediation work completed, boundary quality good)
2. Landfills and Waste Treatment / Disposal Sites				
Registered Landfill Site	-	-	-	None
Historical Landfills	-	-	-	None
Non-operational Landfills	-	-	-	None
BGS - Landfill	-	-	-	None
3. Contemporary Trade Entries of Concern				
Industrial Sites	-	27	19	20m/E, 21m/E, 40m/NE, 41m/NW, 84m/NE, 84m/E, 84m/NE, 84m/NE, 86m/NE, 87m/NE, 91m/NE, 91m/NE, 91m/NE, 93m/NE, 110m/E, 111m/E, 112m/E, 112m/E, 112m/E, 122m/NE, 122m/NE, 122m/NE, 122m/NE, 203m/E, 203m/E, 234m/S, 234m/S (Vehicle repair, testing and servicing)

Table 2 - Environmental Searches Summary				
Activity	Distance From The Site			Comments [m]/[direction]
	On-site	Within 250m	250m to 500m	
				390m/SW, 402m/SW, 414m/SW, 395m/N, 395m/N, 395m/N, 395m/N, 403m/N, 409m/N, 413m/N, 444m/N, 445m/N, 474m/N, 475m/SW, 478m/N (Vehicle repair, testing and servicing) 468m/N (Metalworkers)
Fuel Sites	-	1	3	193m/SE (obsolete), 445m/SW (obsolete), 452m/SW (open), 485m/NW (obsolete)
Electrical Substations	-	1	-	22m/NW
4. Designed Environmentally Sensitive Sites				
Sites of Special Scientific Interest (SSSI)	-	-	-	None
National Nature Reserves (NNR)	-	-	-	None
Local Nature Reserves (LNR)	-	-	-	None
Areas of Outstanding Natural Beauty and Scenic Areas	-	-	-	None

Special Areas of Conservation	-	-	-	None
Special Protection Areas	-	-	-	None
Environmentally Sensitive Areas (DEFRA)	-	-	-	None

3.2 Nitrate Vulnerable Zone

The site was located within an area designated as a nitrate vulnerable zone.

The Nitrates Directive, (ref. R.12) defines a nitrate vulnerable zone as:

- o Surface freshwater which contains or could contain, if preventative action is not taken, nitrate concentrations greater than 50mg/l;
- o Groundwater which contains or could contain, if preventative action is not taken, nitrate concentrations greater than 50mg/l; and
- o Natural freshwater lakes or other freshwater bodies, estuaries, coastal waters and marine waters, which are eutrophic or may become so in the near future if protective action is not taken.

4. SITE HISTORY

4.1 Historical Maps

A review of the history of the site has been conducted based upon readily available large scale (1:1056 / 1:2500) historical maps provided by Landmark Information Group. The most significant changes are detailed in Table 3 below, and the historical ordnance survey maps are included in Appendix 5:

Table 3 - Historical Summary		
Date	Potentially Contaminative Land Uses / Significant Changes	
	On-site [Direction]	Off-site [Distance/Direction]
1878-81	- o Terraced residential housing with toilet to rear of garden - o Public House on the corner of North Street and Weldale Street - o Multiple trees	- o Public House (35m/N) - o Cut slope running east-west (56m/S) - o Cattle market (120m/NE) - o Reading abattoirs (190m/N) - o Great Western Railway Station (247m/NW) - o Engine shed for railway (280m/NW) - o Timber yard (401m/NE) - o Maltings (466m/NE) - o Rifle factory (390m/NE)
1879-1880	o No significant changes noted	- o Outdoor urinal (3.5m/E) - o Smithy (201m/SE, 246m/E, 349m/E, 340m/NE) - o Tanks of unknown contents (198m/E) - o Urinal (191m/SE) - o Coal yard (185m/SE, 310m/NE, 335m/NE, 321m/E) - o Local refuse yard (158m/N)
1899	o No significant changes noted	o Potential water body 100m in diameter adjacent to livery stables (403m/E)
1911-1913	o No significant changes noted	- o Site of earthwork (185m/SE) - o
1913-1914	o No significant changes noted	- o Area liable to floods (364m/NW) - o Printing works (385m/N)
1956-1960	o No significant changes noted	- o Bus depot (63m/SE) - o Garage (105m/E, 143m/SE, 400m/SE, 421m/E, 460m/E) - o Engineering works (395m/NE) - o Works (362m/N, 382m/N) - o Tanks (303m/NW)

Table 3 - Historical Summary

Date	Potentially Contaminative Land Uses / Significant Changes	
	On-site [Direction]	Off-site [Distance/Direction]
1962-1976	All buildings are now removed from site	- Electrical substation (22m/NW) - Works (158m/S)
1977-1988	Day nursery building with car parking along North Street	- Ambulance station building with entrance along North Street (5m/N) 1-28 Burford Court residential building constructed (7m/W)
2009	Day nursery no longer noted on site	No significant changes noted
2017	Vacant parcel of land, made ground covers the northern area with trees along the border in the south	Industrial estate (15m/E)

Notes:

It should be noted that the dates of the maps do not always correspond with the time of the surveys.

The review of historical maps provided information about changes to the site and its surroundings between 1878 and 2017.

Figure 3 – Extracts from Historical Ordnance Survey Maps between 1878 and 2017

4.2 Planning Applications

The Reading Borough Council Planning Portal (ref. R.23) was searched with regards to the current and historical planning applications, which can or might have affected the site.

The findings are provided in Table 4 below:

Table 4 - Reading Borough Council Planning Portal Searches				
Application Number	Year	Address	Proposal	Status
141626	2014	Corner of Weldale Street and North Street, Reading, Berkshire, RG1 7BX	A new temporary school of modular construction, single storey and flat roofed. New fencing and gates to site perimeter. New hardstanding for car and cycle parking, and pupil hard play.	Approved

4.3 History of the Site – Summary

The review of historical maps and planning applications provided information about changes to the site and its surroundings between 1878 and 2017. Based upon the historical information it has been concluded that the site has changed from residential use in the form of terraced housing and a public house, into a day nursery with off-street parking in 1977, and finally into a single-storey temporary school from the earliest available map until the present time.

The surrounding area underwent significant developments from the earliest map until the present time including the development of numerous works, residential housing, blacksmiths and other industrial sites (vehicular garages).

5. CONCEPTUAL MODEL

The risk assessment methodology is based upon current guidelines (refs. R.13, R.14 and R.15), and legislation (refs. R.17 and R.18).

The current guidance requires that a conceptual model be formulated, based upon the findings of the research. The conceptual model is limited at this stage to the identification and assessment of potential 'hazards', identified or suspected from the results of the research, and the potential 'receptors' that may be affected and the anticipated 'pathways' to those receptors. The findings are summarised in the following subsections.

The guidance proposes a four-stage approach for the assessment of contamination and the associated risks. The four stages are listed below:

- Hazard Identification;
- Hazard Assessment;
- Risk Estimation; and
- Risk Evaluation.

In accordance with the guidance, (ref. R.14), only the first two stages are addressed in a preliminary risk assessment, and should hazards exist which are a potential risk then more intrusive investigation works are recommended.

5.1 Hazard Identification: On-Site

The desk based research and historical review identified Made Ground associated with the construction and demolition of terraced housing, day nursery and prefabricated school as a potential hazard on the site:

5.2 Hazard Identification: Off-Site

The desk based research and historical review identified the following potential hazards off-site that may impact upon the site:

- Potential Hydrocarbon contamination migrating to the site from Ambulance station;
- Migration of contaminants through leaching of contaminants through the soils from historical off-site sources (blacksmith, coal yards, works, unknown tanks); and
- Potential PCBs from electrical substation.

5.3 Hazard Assessment

The preliminary risk assessment has identified a few potential sources of contamination that may pose a risk to human health and the Controlled Waters. Potential pollutant linkages that require further consideration are presented in Table 5 shown overleaf:

Table 5 – Conceptual Model

Sources	PATHWAYS:					RECEPTORS:						Risk Rating	Comments
	Root Uptake	Direct Contact	Ingestion	Respiration	Gas Accumulation	Plants	End Users	Structures (Concrete)	Services/Utilities	Construction Workers	Controlled Waters (GW)		
On-site: Potential Made Ground	L	L	L	U	L	N	S	Mi	Mi	S	Mo	HR	It is considered likely that Made Ground will be present at the site due to historical construction and demolition activities. Made Ground is a potential source of ground gas, which poses a potential risk of asphyxiation and explosion.
Off-site: Surrounding industrial land use, namely car workshops, garages etc.	U	U	L	L	U	N	Mo	N	N	Mo	N/A	MR	A multitude of vehicular garages are found to the east, most within a 250m radius of the site. The garages may have caused contamination of soils through spillages of fuel and synthetic oils. The highly permeable chalk bedrock coupled with the close proximity to the site indicates a high likelihood of being present.
Off-site: Electrical substation 22m/NW	N	U	U	N	N	N	S	N	N	S	S	MR	Electrical substations pose a potential source of PCBs, which can migrate through groundwater and are harmful to health.
Off-site: Petroleum spirit storage	L	L	L	N	U	N	S	N	N	S	Mo	HR	Signage indicating petroleum storage was noted immediately north of the site. No above ground tank was visible, so it is likely that there is or has previously been an underground storage tank within the vicinity. Underground storage tanks / associated pipework could

				potentially leak and corrode leading to hydrocarbon contamination in the subsurface. Due to the permeable nature of the indicated underlying geology, this is therefore considered to be a potential off-site source of contamination.
Legend:- See Comparison of Consequence Against Probability within Appendix 6 for Key to Legend. Probability: Negligible (N) Unlikely (U) Likely (L) Highly Likely (HL) Consequence (Severity): Negligible (N) Mild (Mi) Moderate (Mo) Severe (S) Risk Rating: Very High Risk High Risk Medium Risk Low Risk Negligible Risk VH HR MR LR NR				

Based upon the findings of the data search as well as the site walkover, it has been assessed that the former uses of the site and surrounding area are likely to result in potential contamination, which could pose risks to human health/Controlled Waters. Sources of contamination on site included Made Ground from the demolition of former structures, and potential hydrocarbon contamination from the adjacent ambulance station petroleum spirit storage.

In addition to which, the offsite sources of contamination thought to impact on the site include PCBs from an adjacent electrical substation, potential hydrocarbon contamination migrating to the site from a nearby fuel garage, and migration of contaminants through leaching of contaminants through soils from historical off-site sources (coal yards, blacksmiths, garages).

5.4 Constraints to Development

The following constraints to the development should be taken into consideration during redevelopment of the site:

- Presence of trees and their effect on underlying soils;
- Contamination status of the northern site boundary adjacent to the ambulance station; and
- Buried underground services (water and electrics around the central and eastern portions of the site).

6. CONCLUSIONS AND RECOMMENDATIONS

Geosphere Environmental Ltd was commissioned by Lochailort Reading, to undertake a Phase 1 Desk Study for a proposed residential development at the Land at Corner of Weldale Street and North Street, Reading, Berkshire, RG1 7BX.

Based upon the findings of the preliminary risk assessment and site walkover, a number of potential contaminant sources and pathways to potential receptors have been identified. It would be prudent to undertake a preliminary intrusive ground investigation to determine the extent of any potential contamination within the groundwater and soil strata. Any investigation should ensure a number of exploratory holes across the site. Where applicable, ground gas and/or groundwater monitoring installations should be constructed on site to include the anticipated made ground.

Sampling along the northern site border is recommended to ascertain whether contaminant migration has occurred.

Should redevelopment of the site take place, it would be advisable to undertake a geotechnical investigation of the site to enable a suitable foundation solution to be designed. It would be prudent, where possible, to undertake this at the same time as the environmental investigations to minimise mobilisation and supervisory costs.

Any ground investigation should be designed in general accordance with CLR 4, (refs. R.16 and R.19) undertaken in compliance with BS10175, (ref. R.19) and BS5930, (ref. R.20).

It is also recommended that Petroleum Officer is consulted, prior to any investigative works.

Due to the potential contamination, PPE is advised to be worn during any intrusive works or groundworks.

It is recommended that this report be submitted to the Local Authority as part of the planning submission for the site.

APPENDIX 2 – REPORT LIMITATIONS AND CONDITIONS

This report refers, within the limitations stated, to the condition of the site at the time of the inspections. No warranty is given as to the possibility of future changes in the condition of the site.

The comments given in this report, and the opinions expressed herein, are based upon the readily available information collated for the report and an assessment based upon the current UK guidance, primarily the Contaminated Land Research (CLR) Reports, and most importantly CLR Report 3 (ref. R.1).

This report has been prepared for the sole use of the Client for the purposes described and no extended duty of care to any third party is implied or offered. Third parties using any information contained within this report do so at their own risk.

This report is prepared and written for the use stated herein; it should not be used for any other purposes without reference to Geosphere Environmental Limited. The report has been prepared in relation to the proposed end-use should another end-use been intended a further re-assessment may be required. It is likely that over time practises will improve and the relevant guidance and legislation be amended or superseded, which may necessitate a re-assessment of the site.

The report is limited to those aspects of land contamination specifically reported on and is necessarily qualified accordingly, no liability shall be accepted for other aspects which may be the result of gradual or sudden pollution incidents, past or present unrecorded land uses both on- and off-site and the potential for associated contaminant migration. The opinions expressed cannot be absolute due to the limitations of time and resources imposed by the agreed brief.

The accuracy of any map extracts cannot be guaranteed. It is possible that different conditions existed on site, between and subsequent to the various map surveys appended.

Whilst the report may express an opinion on possible configurations of strata between or beyond exploratory holes discussed or on the possible presence of features based on visual, verbal or published evidence, this is for guidance only and no liability can be accepted for its accuracy.

The conceptual model is based on the information available at the time of conducting this assessment and is an interpretative assessment of the conditions at the site. It should be noted that the redevelopment and/or further investigation of the site may reveal additional information and therefore alter the conceptual model and the conclusion of this report.

Introduction

The Environment Act 1995 has made site sensitivity a key issue, as the legislation pays as much attention to the pathways by which contamination could spread, and to the vulnerable targets of contamination, as it does the potential sources of contamination. For this reason, Landmark's Site Sensitivity maps and Datasheet(s) place great emphasis on statutory data provided by the Environment Agency/Natural Resources Wales and the Scottish Environment Protection Agency; it also incorporates data from Natural England (and the Scottish and Welsh equivalents) and Local Authorities; and highlights hydrogeological features required by environmental and geotechnical consultants. It does not include any information concerning past uses of land. The datasheet is produced by querying the Landmark database to a distance defined by the client from a site boundary provided by the client.

In the attached datasheet the National Grid References (NGRs) are rounded to the nearest 10m in accordance with Landmark's agreements with a number of Data Suppliers.

Geology 1:50,000 Maps

This report contains geological map extracts taken from the BGS Digital Geological map of Great Britain at 1:50,000 scale and is designed for users carrying out preliminary site assessments who require geological maps for the area around the site. This mapping may be more up to date than previously published paper maps.

The various geological layers - artificial and landslip deposits, superficial geology and solid (bedrock) geology are displayed in separate maps, but superimposed on the final 'Combined Surface Geology' map. All map legends feature on this page. Not all layers have complete nationwide coverage, so availability of data for relevant map sheets is indicated below.

LANDMARK INFORMATION GROUP®

Artificial Ground and Landslip

Artificial ground is a term used by BGS for those areas where the ground surface has been significantly modified by human activity. Information about previously developed ground is especially important, as it is often associated with potentially contaminated material, unpredictable engineering conditions and unstable ground.

Artificial ground includes:

- Made ground - man-made deposits such as embankments and spoil heaps on the natural ground surface.
- Worked ground - areas where the ground has been cut away such as quarries and road cuttings.
- Infilled ground - areas where the ground has been cut away then wholly or partially backfilled.
- Landscaped ground - areas where the surface has been reshaped.
- Disturbed ground - areas of ill-defined shallow or near surface mineral workings where it is impracticable to map made and worked ground separately.

Mass movement (landslip) deposits on BGS geological maps are primarily superficial deposits that have moved down slope under gravity to form landslips. These affect bedrock, other superficial deposits and artificial ground. The dataset also includes foundered strata, where the ground has collapsed due to subsidence.

● LANDMARK INFORMATION GROUP®

Superficial Geology

Superficial Deposits are the youngest geological deposits formed during the most recent period of geological time, the Quaternary, which extends back about 1.8 million years from the present.

They rest on older deposits or rocks referred to as Bedrock. This dataset contains Superficial deposits that are of natural origin and 'in place'. Other superficial strata may be held in the Mass Movement dataset where they have been moved, or in the Artificial Ground dataset where they are of man-made origin.

Most of these Superficial deposits are unconsolidated sediments such as gravel, sand, silt and clay, and onshore they form relatively thin, often discontinuous patches or larger spreads.

LANDMARK INFORMATION GROUP®

Bedrock and Faults

Bedrock geology is a term used for the main mass of rocks forming the Earth and are present everywhere, whether exposed at the surface in outcrops or concealed beneath superficial deposits or water.

The bedrock has formed over vast lengths of geological time ranging from ancient and highly altered rocks of the Proterozoic, some 2500 million years ago, or older, up to the relatively young Pliocene, 1.8 million years ago.

The bedrock geology includes many lithologies, often classified into three types based on origin: igneous, metamorphic and sedimentary.

The BGS Faults and Rock Segments dataset includes geological faults (e.g. normal, thrust), and thin beds mapped as lines (e.g. coal seam, gypsum bed). Some of these are linked to other particular 1:50,000 Geology datasets, for example, coal seams are part of the bedrock sequence, most faults and mineral veins primarily affect the bedrock but cut across the strata and post date its deposition.

Combined Surface Geology

The Combined Surface Geology map combines all the previous maps into one combined geological overview of your site.

Please consult the legends to the previous maps to interpret the Combined "Surface Geology" map.

Additional Information

More information on 1:50,000 Geological mapping and explanations of rock classifications can be found on the BGS website. Using the LEX Codes in this report, further descriptions of rock types can be obtained by interrogating the 'BGS Lexicon of Named Rock Units'. This database can be accessed by following the 'Information and Data' link on the BGS website.

Index Map

For ease of identification, your site and buffer have been split into Slices, Segments and Quadrants. These are illustrated on the Index Map opposite and explained further below.

Slice

Each slice represents a 1:10,000 plot area (2.7km x 2.7km) for your site and buffer. A large site and buffer may be made up of several slices (represented by a red outline), that are referenced by letters of the alphabet, starting from the bottom left corner of the slice "grid". This grid does not relate to National Grid lines but is designed to give best fit over the site and buffer.

Segment

A segment represents a 1:2,500 plot area. Segments that have plot files associated with them are shown in dark green, others in light blue. These are numbered from the bottom left hand corner within each slice.

Quadrant

A quadrant is a quarter of a segment. These are labelled as NW, NE, SW, SE and are referenced in the datasheet to allow features to be quickly located on plots. Therefore a feature that has a quadrant reference of A7NW will be in Slice A, Segment 7 and the NW Quadrant.

A selection of organisations who provide data within this report:

Envirocheck reports are compiled from 136 different sources of data.

Berkshire

Published 1879 - 1880

Source map scale - 1:500

The 1:500 scale Ordnance Survey mapping was introduced in 1855 as a replacement for the 1:528 scale and to complement the 1:2500 scale that had been implemented in 1853. By 1895, the 1:500 scale covered most towns over a population of about 4000 at the time of survey, although very few towns were mapped more than once at this scale, and none have been since 1910. The 1:500 scale gives particular emphasis to such features as lamp posts, man holes, arched passages and minor building projections. Also often featured are divisions between tenements, interior ground floor layouts of public buildings, and on earlier plans, the functions of the various parts of larger industrial premises are also indicated. Content of the plans does vary however, from one town to the next in terms of, for example, the completeness of railway tracks and the coverage of public buildings.

Please note: Due to the partial coverage of Historical Town Plans, it is possible that not all segments within an order will contain mapping. Only the segments that have Town Plan coverage will be generated.

The diagram shows a 5x5 grid of squares. The columns are labeled A1 through A5 at the bottom, and the rows are labeled A1 through A5 on the left. A 2x2 square area is highlighted in red, covering the intersection of columns A3 and A4 and rows A12 and A13. The intersection of A3 and A13 is marked with a red circle and labeled A13. A compass rose is located to the right of the grid, pointing North.

LANDMARK INFORMATION GROUP®

Berkshire

Published 1879

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas and by 1896 it covered the whole of what were considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Supply of Unpublished Survey Information

Published 1973 - 1974

Source map scale - 1:1,250

SUSI maps (Supply of Unpublished Survey Information) were produced between 1972 and 1977, mainly for internal use at Ordnance Survey. These were more of a 'work-in-progress' plan as they showed updates of individual areas on a map. These maps were unpublished, and they do not represent a single moment in time. They were produced at both 1:2,500 and 1:1,250 scales.

Historical Mapping Legends

Ordnance Survey County Series 1:10,560

	Gravel Pit		Sand Pit		Other Pits
	Quarry		Shingle		Orchard
	Osiers		Reeds		Marsh
	Mixed Wood		Deciduous		Brushwood
	Fir		Furze		Rough Pasture
	Arrow denotes flow of water		Trigonometrical Station		
	Site of Antiquities		Bench Mark		
	Pump, Guide Post, Signal Post		Well, Spring, Boundary Post		
	•285 Surface Level				
	Sketched Contour		Instrumental Contour		
	Main Roads		Minor Roads		
	Sunken Road		Raised Road		
	Road over Railway		Railway over River		
	Railway over Road		Level Crossing		
	Road over River or Canal		Road over Stream		
	Road over Stream				
	County Boundary (Geographical)				
	County & Civil Parish Boundary				
	Administrative County & Civil Parish Boundary				
	County Borough Boundary (England)				
	County Burgh Boundary (Scotland)				
	Rural District Boundary				
	Civil Parish Boundary				

Ordnance Survey Plan 1:10,000

	Chalk Pit, Clay Pit or Quarry		Gravel Pit
	Sand Pit		Disused Pit or Quarry
	Refuse or Slag Heap		Lake, Loch or Pond
	Dunes		Boulders
	Coniferous Trees		Non-Coniferous Trees
	Orchard		Scrub
	Bracken		Heath
	Marsh		Reeds
	Building		Glasshouse
	Sloping Masonry		Pylon
	Cutting		Embankment
	Road Under		Road Over
	Level Crossing		Foot Bridge
	Standard Gauge Multiple Track		Standard Gauge Single Track
	Siding, Tramway or Mineral Line		Narrow Gauge
	Geographical County		Administrative County, County Borough or County of City
	Municipal Borough, Urban or Rural District, Burgh or District Council		Borough, Burgh or County Constituency
	Civil Parish		
	BP, BS Boundary Post or Stone		Police Station
	Church		Post Office
	Club House		Public Convenience
	Fire Engine Station		Public House
	Foot Bridge		Signal Box
	Fountain		Spring
	Guide Post		Telephone Call Box
	Mile Post		Telephone Call Post
	Mile Stone		Well

1:10,000 Raster Mapping

	Gravel Pit		Refuse tip or slag heap
	Rock		Rock (scattered)
	Boulders		Boulders (scattered)
	Shingle		Mud
	Sand		Sand Pit
	Slopes		Top of cliff
	General detail		Underground detail
	Overhead detail		Narrow gauge railway
	Multi-track railway		Single track railway
	County boundary (England only)		Civil, parish or community boundary
	District, Unitary, Metropolitan, London Borough boundary		Constituency boundary
	Area of wooded vegetation		Non-coniferous trees
	Non-coniferous trees (scattered)		Coniferous trees
	Coniferous trees (scattered)		Positioned tree
	Orchard		Coppice or Osiers
	Rough Grassland		Heath
	Scrub		Marsh, Salt Marsh or Reeds
	Water feature		Flow arrows
	Mean high water (springs)		Mean low water (springs)
	Telephone line (where shown)		Electricity transmission line (with poles)
	Bench mark (where shown)		Triangulation station
	Point feature (e.g. Guide Post or Mile Stone)		Pylon, flare stack or lighting tower
	Site of (antiquity)		Glasshouse
	General Building		Important Building

Published 1883

Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas; these maps were used to update the 1:10,560 maps. The published date given therefore is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

VectorMap Local

Published 2017

Source map scale - 1:10,000

VectorMap Local (Raster) is Ordnance Survey's highest detailed 'backdrop' mapping product. These maps are produced from OS's VectorMap Local, a simple vector dataset at a nominal scale of 1:10,000, covering the whole of Great Britain, that has been designed for creating graphical mapping. OS VectorMap Local is derived from large-scale information surveyed at 1:1250 scale (covering major towns and cities), 1:2500 scale (smaller towns, villages and developed rural areas), and 1:10 000 scale (mountain, moorland and river estuary areas).

APPENDIX 6 – COMPARISON OF CONSEQUENCES AGAINST PROBABILITY

		Consequence (Severity of Linkage)			
		Severe (S)	Moderate (Mo)	Mild (Mi)	Negligible (N)
Probability (Likelihood of linkage from)	Highly Likely (HL)	Very High Risk (VH)	High Risk (HR)	Moderate Risk (MR)	Moderate/Low Risk (MR-LR)
	Likely (L)	High Risk (HR)	Moderate Risk (MR)	Moderate/Low Risk (MR-LR)	Low Risk (LR)
	Unlikely (U)	Moderate Risk (MR)	Moderate/Low Risk (MR-LR)	Low Risk (LR)	Negligible Risk (NR)
	Negligible (N)	Moderate/Low Risk (MR-LR)	Low Risk (LR)	Negligible Risk (NR)	Negligible Risk (NR)

This Table is to provide reference information in conjunction with the GEL Conceptual Model attached within the Hazard Risk Assessment section of this report, Table 5 – Conceptual Model.

Very High Risk (VH)

- There is a high probability that severe harm could arise to a designated receptor from an identified hazard, OR, there is evidence that severe harm to a designated receptor is happening currently.
- Urgent investigation and remediation are likely to be required and advised.

High Risk (HR)

- Harm is likely to arise to a designated receptor from an identified hazard.
- Urgent investigation is required and remedial works are likely necessary in both the short to long term.

Moderate Risk (MR)

- It is possible that harm could arise to a designated receptor from an identified hazard. However, it is either relatively unlikely that any such harm would be severe, or if any harm were to occur it is more likely that the harm would be relatively mild.
- Investigation is required to clarify the risk and to determine the potential liability. Some remedial works may be required in the longer term.

Low Risk (LR)

- It is possible that harm could arise to a designated receptor from an identified hazard, but it is likely that this harm, if realised, would at worst normally be mild. Limited investigation recommended.

Negligible Risk (NR)

- There is a minimal possibility that harm could arise to a receptor. In the event of such harm being realised it is high likely to not be severe. Investigation not deemed necessary.

APPENDIX 8 – PHOTOGRAPHS

Photograph 1

Southern site boundary displayed by chain-link fencing with trees found either side (looking west).

Photograph 2

South-eastern corner looking north up North Street.

Photograph 3

Main double-gated vehicle and pedestrian access, looking west from North Street.

Photograph 4

Southwest corner of site displaying vegetated area likely to be Made Ground.

Photograph 5

Electrical box in the southeast corner.

Photograph 6

Southwest corner of the site looking north. Approximate 2.0m elevation drop adjacent to site.

Photograph 7

Concrete pad foundation and paved area to south (looking northeast).

Photograph 8

Access to services in centre concrete slab.

Photograph 9

Access to services in centre concrete slab.

Photograph 10

Wooden frame within concrete slab.

Photograph 11

Western site boundary taken from central concrete slab.

Photograph 12

Northwest site boundary.

Photograph 13

Northern boundary with
approximate 1.0m fall.

Photograph 14

Storage container of unknown
contents (adjacent to northwest
corner of site).

Photograph 15

petroleum shutoff switch along
ambulance wall.

Photograph 16

Slight slump between concrete pad and tarmac carpark.

Photograph 17

Underground services present.
