

### Discharge of planning Condition 3

A previous application, 171798, was submitted to discharge some of the planning conditions. Part of this application included approval for white upvc windows.

On reflection, Fynecast would now like to improve the specification of the windows and upgrade these to aluminium. This will tie in better with the doors and larger windows to the gable element, as well as being more robust.

Therefore, we would apply to change the specification of the windows to grey aluminium sliding sash windows, as shown on the image below. We are unable to provide a sample as all the manufacturers we approached would not supply a sample unless we paid for it, cost in the region of £800 plus VAT. This puts us in a difficult position, paying for a window sample that the Council may not approve, costing us £800 for nothing, and its not a very environmental approach either. We therefore request that an image be approved, rather than a sample being provided.
