Tim Salt
Head of Technical
Berkeley Homes (Western) Limited

Dear Tim,

Re: Reading Green Park Village: Phase 2a

During 2015 as part of site wide archaeological mitigation works at Green Park Village Reading, Oxford Archaeology excavated three trenches within the Phase 2a area. The mitigation work followed on from the production of the Cultural Heritage Chapter of an Environmental Impact Assessment (OA 2014). The trenches within area 2a (numbers 20, 21 and 22) were excavated under an addendum to an approved Written Scheme of Investigation (OA 2015), and measured a total of 44.1 linear metres. The trenches were targeted on the footprints of buildings proposed under planning ref: 07/01275/OUT, and revealed up to 2.4m depth of modern made ground, overlying natural geology. No features or deposits of cultural heritage interest were noted. The results of the archaeological mitigation work for Phase 6 was included in the planning report *Reading Green Park Village. Archaeological Mitigation Report V. 1* (OA 2016).

Yours sincerely

Gerry Thacker
