Re Development of 2 flats at Land to the Rear Of 115 Oxford Road, Reading,

Air Quality Statement

*The development has regard to the need to improve air quality and reduce the effects of poor air quality.*

*The building is in an Air Quality Management Area. We are proposing to provide heat recovery units to each flat to provide whole house ventilation in the flats, when the windows are closed.*

*This solution has been used and approved by your council relating to numerous projects within the town centre. I trust this is sufficient for your needs.*

Chris Keen
