1.INTRODUCTION

1.1 Instruction

C.J. Associates Geotechnical Limited (CJA) was instructed by Oxford Architects (OA) to carry out a Desk Study investigation at 'The Butler' located on Chatham Street, Reading. Instructions to proceed are contained in an email instruction from OA to CJA in August 2017.

1.2 Brief and Report Scope

The general specification for the works was provided by Oxford Architects and incorporated the brief to undertake a Desk Study Investigation for the site.

This report is based upon a review of readily available historical and current information, a site walkover, our geological and hydrogeological map library, preliminary consultations with key relevant agencies, including Local Authorities and other Statutory Authorities, and information from an Environmental Database search.

The report also presents recommendations on intrusive investigations for the site, based on the findings of the Desk Study.

1.3 Limitations

The recommendations and opinions expressed in this report are based on the information obtained as part of the desk study or provided by others. Information provided from other sources is taken in good faith and CJA cannot guarantee its accuracy.

The report has been prepared exclusively for Oxford Architects for the site area indicated, and for the purpose stated. CJA accepts no responsibility for any site, client or type of development not indicated in this report.

2.THE SITE

2.1 General

As part of the investigation, CJA carried out a site walkover survey on 31st August 2017. The information presented below is based on the site visit and a review of Ordnance Survey map information. Site photographs are presented in the Appendices to this report.

2.2 Site Location & Description

The site is located at National Grid Reference SU708735, and is shown on the Site Location Plan, included in the Appendices to this report, and the aerial photograph below.

The site is bound to the north by Chatham Street, to the east by an NCP car park, to the south by a training centre and another small car park immediately to the west.

At the time of the walkover the site consisted of a two storey public house. Behind the pub are several small outhouses and sheds, which are typically used for storage, which form a small courtyard. However, there was no visual or olfactory evidence of contamination in this region of the site. These buildings appear to be in good working order. There is a slight topographical fall across the site from east to west of approximately 0.5m. Located to the front of the pub is a small beer garden, which has drainage running through its centre.

There is a small garage located to the rear of the plot. This is named as 'UK Tyres & Garage'. On inspection, it appears that this is primarily used for storing tyres, however, details internal inspection was not possible. The building conditions is far more dilapidated than the others. Most likely due to its usage. Visual evidence of localised oil staining was present on the forecourt.

There was no standing water present at the time of the investigation. Photographs taken during the walkover are presented in the Appendices to this report.

2.3 Geology

2.3.1 Published Geology

According to the British Geological Survey (BGS), online 'Geology of Britain Viewer', accessed August 2017, the site is indicated to be underlain by superficial deposits of the Taplow Gravel Formation comprised of Sand and Gravel. These in turn are underlain by the Seaford Chalk Formation and Newhaven Chalk Formation (undifferentiated).

Due to the nature of the site, Made Ground is anticipated beneath the site.

2.3.2 Historic Boreholes

A list of the nearest available BGS boreholes is summarised within the following table.

BGS Reference	Grid Reference	Made Ground, clayey, sandy GRAVEL(m begl)	Clayey, SAND	Clayey, sandy GRAVEL	Structureless Chalk composed of GRAVEL (m)	CHALK (m)	Approximate distance from site (m)
SSU77SW1088	470937, 173519	0 – 1.20		1.20 – 3.20			30m to E
SU77SW1104	470929, 173516	0 – 1.20		1.20-5.60	5.60 – 15.00	15.00-47.50	25m to E
SU77SW1106	470947, 173490	0 – 1.00	1.00-2.80	2.80-4.10	4.10-9.50	9.50-41.50	35m to SE
SU77SW1108	470934 173464	0-1.20		1.20-5.00	5.00-11.00	11.00-37.50	30m to SSW

Table 1: Historical BGS borehole data

2.4 Hydrogeology

The hydrogeology of the site area is detailed in the map, 'Groundwater Vulnerability of West London', Sheet 37, published by the Environment Agency. This classifies the ground beneath the site as a major aquifer, soils beneath the site are classified as having a high leaching potential.

2.5 Hydrology

The nearest surface watercourse is the unnamed water feature, 391m north of the site. Its River Quality is unknown. The river Kennet is 723m east of the site with River Quality B. The site has potential for groundwater flooding to occur at surface

2.6 Radon

According to the British Geological Survey, the site is located in an area where less than 1% of homes are above the radon action level. Therefore, no radon protection measures are necessary in the construction of new dwellings or extensions.

3. SITE HISTORY

3.1 Historical Maps

The historical development of the site and surrounding area has been determined, presented within Table 2 below, using available extracts of historical Ordnance Survey (OS) plans, the extracts of which are included in the Appendices to this report.

Dates	On Site	Off-site
1879	The site is divided into a house and garden. The remainder of the site is clear and seems to act as footpath/access to the church grounds, located immediately south.	The surrounding area is largely of a residential usage. However, there is a church indicated, immediately south of the site. An operational saw mill is indicated approximately 700m south east of the site. A railway line and associated station is located some 400m north of the site. To the east are residential properties beyond which appear to be possible commercial buildings.
1900	No significant change to the site.	Further residential housing is now indicated north of the site. The Thames bank Iron Works has been built approximately 900m north west of the site.
1913	No significant change to the site.	The church grounds directly to the south and south west are now occupied by several buildings. Significant development 500m north of the site, with a number of manufacturing (unknown) buildings. The saw mill is replaced by a brewery.
1938	No significant change to the site.	The iron works to the north is now closed.
1961-1962	No significant change to the site.	One of the church buildings, to the south of the site, has now been demolished and the church has been reduced in size overall.
1973-1976	The site is now marked by 'one' building of an unknown usage.	Directly to the east of the site, residential house are indicated to have been, and replaced by a road/path running along the east border of the site. This connects Chatham Street and Oxford Road. A bridge had been built elevating Chatham street over the A329.
1990-1992	The site now has the parking spaces surrounding the building.	The Broad Street Mall is now built about 400m to the east.
2006	No significant change to the site.	No significant change around the site.
2017	No significant change to the site.	No significant change around the site.

Table 2: Significant historical developments both on and off the proposed site.

4. ENVIRONMENTAL INFORMATION

4.1 Environmental Database Information

As part of the investigation, an environmental database search was obtained by CJA, a copy of which is included in the Appendices to his report and summarised below.

The following summary is generally limited to locations within 500m of the central point of the site unless it is considered that installations or activities beyond that range could potentially have an impact on the site or be affected by the redevelopment of the site.

There are 2 Local Authority **Pollution Prevention and Controls** within 500m, of the site, the details of which are as follows:

- Hobbs of Reading, 102 Oxford Road, date not supplied, referenced EPA/PAR.B/DC9/P1, allowing for dry cleaning.
- Oxford Road Service Station Texaco, 150 Oxford Road, dated 9th November 1999, referenced EPA/PAR.B/39/98/P1, allowing for a petrol filling station.

There are 2 **Discharge Consents** located within 500m, of the site, the details of which are as follows:

- Reading Transport Ltd (1998 to present), referenced CATM.3308, allowing trade effluent discharge-site drainage to be discharged into freshwater streams or rivers.
- Reading Transport Ltd (1998 to present), referenced CATM.3307, allowing trade effluent discharge-site drainage to be discharged into freshwater streams or rivers.

There is 1 registered **Substantiated Pollution Incident** within 500m of the site, 386m to the NW, Category 2 significant incident (oil) to land. Referenced 516354, dated to July 2007.

There is 1 **Water Abstraction License** within 500m of the site, 303m to the E, held by Primark Stores Limited, and allows water abstraction from the ground.

There is one record of **Mining Instabilty** within 500m of the site, 405m to the NE, conclusive rock mining evidence reported by Ove Arup & Partners.

There are 11 **Natural Cavities**, and 4 **Man Made Cavities** within 500m of the site, the details of closest one, which is within 250m of the site, is as follows:

- Natural Cavity 224m to the SE, solution pipe type of cavity, details not recorded.

Other information obtained in the environmental database check is as follows:

- **Coal mining affected areas** – in an area, which may not be affected by coal mining.
- **Shallow mining hazards** - low risk.
- **Potential for collapsible ground stability hazards** – very low
- **Potential for compressible ground stability hazards** – no hazard
- **Potential for ground dissolution hazards** - low.to moderate
- **Potential for landslide subsidence hazards** - very low.
- **Potential for running sand ground stability hazards** - very low.
- **Potential for shrinking or swelling clay ground stability hazard** - no hazard.

There are numerous other contemporary trade entries within 500m of the site, a comprehensive list is given in the Envirocheck report. The salient entries within 250m of the site, which are most likely to affect the site, are as follows:

- Ra Engineering, 175m to the N (garage services)
- D J Wyeth, 168m to the S (garage services)

- M S B Autos, 106m to the SW (garage services)
- Top Class Executive Cars, 92m to the NW (Car Engine Tuning)
- Leadcraft Stained Glass Studio 127m to the NW (Stained Glass Designers & Producers)
- K R G Transport Ltd 127m to the NW (Stained Glass Designers & Producers)

4.2 Other Information - Landfills and Waste Facilities

According to the Envirocheck Report there is a no **Licensed Waste Management Facility** and **Landfill Site** located within 500m of the site.

4.3 Soil Chemistry

According to the Envirocheck Report, estimated soil chemistry for the site, as supplied by the British geological Society, is as follows:

- Arsenic concentration = <15mg/kg, Cadmium concentration = <1.8mg/kg
- Chromium concentration = 60 - 90mg/kg, Lead concentration = <100mg/kg
- Nickel concentration = 15 - 30mg/kg

5. PRELIMINARY ENVIRONMENTAL ASSESSMENT

5.1 Introduction

In accordance with current best practice, the assessment of potentially contaminated sites is normally carried out by means of a risk assessment, based on a conceptual model, which examines possible sources of contamination, potential receptors, and likely links between the two. For contamination to be a hazard, it must be demonstrated that there is an identifiable source of contamination (either inside or outside the site), potential receptors that may be at risk (occupiers of the site, for example, or the environment in general), and that there are also potential pathways through which the former may affect the latter.

5.2 Conceptual Model / Risk Assessment

5.2.1 Contaminant Sources

Based on the current and historical uses of the site and its surroundings, and the findings of the investigation, it is concluded that the following contaminant sources should be considered:

Historical/Current Site Sources: The buildings have been used as Public House since 1830 and are marked as such on the first historical map in 1879. Risk from historic uses are therefore considered to be LOW.

Materials present on the site: No significant visual or olfactory evidence of contamination was seen on the site surface, however; given the garage located at the rear of the potential contaminative materials may well be present. Localised oil residue was seen in the garage forecourt. Also given the change(s) on site Made Ground may be encountered, which could potentially be contaminated.

Groundwater: The ground beneath parts of the site is classified as a major (highly permeable) aquifer, with soils classified as having a high leaching potential. It should therefore be considered that the risk of contamination to groundwater is LOW to MODERATE.

Asbestos: There a high risk of asbestos being present in the existing buildings or in any Made Ground that may underlie the site.

Land Gas: Another potential source of contamination is land gas. Land gas is largely generated by the decomposition of organic matter, both in natural soils such as peat, and man-made materials such as landfill or other fill materials. The gases that are normally associated with these materials, which can pose a risk to health, include methane (which is toxic and potentially explosive) and carbon dioxide (which is toxic). Oxygen depletion is also a consequence of the generation of these other gases. Based on the anticipated ground conditions, and a landfill not being identified within 500m of the site, it is considered the risk posed by land gas is low to moderate.

Contamination arising from external sources: Based on our reconnaissance survey, historical maps and the environmental database information, there appear to be no uses either current or historic, that might give rise to external sources of contamination.

5.2.2 Contaminant Pathways:

Contaminants can reach potential receptors through various routes. The following are considered to be applicable to this site:

- **Ingestion:** Some contaminants can be harmful if ingested directly, either after handling contaminated soils, or due to eating plants grown in such soils that may not be thoroughly clean.
- **Absorption through Plants:** Other contaminants can be taken up by plants grown in contaminated soils, and ingested by anybody eating such plants.
- **Leachate:** Soluble fractions of some contaminants can leach into the ground, contaminating groundwater.
- **Services / Drains:** Contaminants in solution can be transported from one part of the site to another, or from outside the site to within the site, through old drains, or other service trenches which may be present.
- **Dissolution features:** Voids/mineworkings/cavities may form preferential flow horizons for contamination in groundwater, and land gas.

5.2.3 Contaminant Receptors:

The following potential receptors are considered to be applicable to this site:

- **Future Site Occupants:** Future site occupants could be at risk from the effects of any contaminants in the soil and groundwater, and also from land gas.
- **Construction Workers:** The personnel involved in the construction of the proposed development are also at risk.
- **Groundwater / River Water:** As well as being a potential source of contamination, the groundwater also needs to be considered as a potential receptor of further contamination.
- **Vegetation:** New planting on the site could be at risk from contamination.

5.2.4 Risk Assessment

The following table presents an outline summary of the contamination risk assessment, based on the findings of the desk study, and should be reviewed once a Phase II investigation has been carried out.

Contamination Assessment Summary

Description of Receptor or Source	Risk rating
Risk of contamination from historical/current site uses	Low
Risk of contamination from external sources	Low
Risk to/from groundwater	Low to Moderate
Presence of Asbestos	Moderate to High
Risk posed by land gas	Low
Risk of dissolution and/or mining features	Moderate
OVERALL GROUND CONTAMINATION RISK RATING	MODERATE

Table 3. Contamination assessment summary

6. DISCUSSION AND CONCLUSIONS

Based on the information included in this desk study report, a summary is given below of the general recommendations and conclusions for this site:

- Historical map extracts show the site to have been a public house since 1879 although recorded as a PH since 1830. It has remained in this use until the present day. Given the site's extensive history there may be contamination identified on site, for instance from unknown uses prior to records.
- The site has a possibility of containing asbestos or asbestos containing materials (ACM's), from possible historic demolition, which could pose a risk is present on site.
- Based on historical maps and environmental database information, it is possible that surrounding land-usages could contain elevated concentrations of some contaminants, which might affect the site itself.
- Environmental Records show there is no recorded pollution incidents located on site, or on the site boundaries, which could affect the site itself.
- The ground beneath parts of the site is classified as a major (highly permeable) aquifer, with soils classified as having a high leaching potential, it should be considered at this stage that the risk of contamination from or to groundwater is low to moderate.
- Subject to planning consent being granted, an intrusive investigation would normally be carried out as part of a 'phase 2' environmental survey. It is likely that several boreholes will be carried out with samples recovered for laboratory testing and monitoring wells installed to inform of any gas or groundwater hazards. During the drilling Insitu tests will be carried out including use of a Photo Ionisation Device (PID) to record the presence of volatile product.
- In addition to providing high quality environmental samples for testing, the investigation will provide geotechnical data to inform foundation design. Based

on published geological records, conventional shallow depth foundations could be suitable at this site, depending anticipated loadings and the relative densities/inherent strengths of the natural materials encountered.

Introduction

The Environment Act 1995 has made site sensitivity a key issue, as the legislation pays as much attention to the pathways by which contamination could spread, and to the vulnerable targets of contamination, as it does the potential sources of contamination. For this reason, Landmark's Site Sensitivity maps and Datasheet(s) place great emphasis on statutory data provided by the Environment Agency/Natural Resources Wales and the Scottish Environment Protection Agency; it also incorporates data from Natural England (and the Scottish and Welsh equivalents) and Local Authorities; and highlights hydrogeological features required by environmental and geotechnical consultants. It does not include any information concerning past uses of land. The datasheet is produced by querying the Landmark database to a distance defined by the client from a site boundary provided by the client.

In the attached datasheet the National Grid References (NGRs) are rounded to the nearest 10m in accordance with Landmark's agreements with a number of Data Suppliers.

HISTORICAL MAP EXTRACTS

Historical Mapping Legends

Ordnance Survey County Series 1:10,560

	Gravel Pit		Sand Pit		Other Pits
	Quarry		Shingle		Orchard
	Ostlers		Reeds		Marsh
	Mixed Wood		Deciduous		Beechwood
	Fir		Purse		Rough Pasture
	Arrow denoting flow of water		Trigonometrical Station		
	Site of Antiquities		Bench Mark		
	Pump, Guide Post, Signal Post		Well, Spring, Boundary Post		
	Surface Level				
	Sketched Contour		Instrumental Contour		
	Main Roads		Minor Roads		
	Sunken Road		Raised Road		
	Road over Railway		Railway over River		
	Railway over Road		Level Crossing		
	Road over River or Canal		Road over Stream		
	Road over Stream				
	County Boundary (Geographical)				
	County & Civil Parish Boundary				
	Administrative County & Civil Parish Boundary				
	County Borough Boundary (England)				
	County Borough Boundary (Scotland)				
	Rural District Boundary				
	Civil Parish Boundary				

Ordnance Survey Plan 1:10,000

	Chalk Pit, Clay Pit or Quarry		Gravel Pit
	Sand Pit		Disused Pit or Quarry
	Refuse or Slag Heap		Lake, Loch or Pond
	Dunes		Boulders
	Coniferous Trees		Non-Coniferous Trees
	Orchard		Scrub
	Bracken		Heath
	Marsh		Reeds
	Building		Glasshouse
	Sloping Masonry		Pylon
	Electricity Transmission Line		Pole
	Cutting		Embankment
	Road Under		Road Over
	Level Crossing		Foot Bridge
	Standard Gauge Multiple Track		Standard Gauge Single Track
	Siding, Tramway or Mineral Line		Narrow Gauge
	Geographical County		
	Administrative County, County Borough or County of City		
	Municipal Borough, Urban or Rural District, Borough or District Council		
	Borough, Borough or County Constituency		
	Civil Parish		
	Boundary Post or Stone		Police Station
	Church		Post Office
	Club House		Public Convenience
	Fire Engine Station		Public House
	Foot Bridge		Signal Box
	Footman		Spring
	Guide Post		Telephone Call Box
	Nile Post		Telephone Call Post
	Nile Stone		Well

1:10,000 Raster Mapping

	Gravel Pit		Refuse tip or slag heap
	Rock		Rock (scattered)
	Boulders		Boulders (scattered)
	Shingle		Mud
	Sand		Sand Pit
	Slopes		Top of cliff
	General detail		Underground detail
	Overhead detail		Narrow gauge railway
	Multi-track railway		Single track railway
	County boundary (England only)		Civil parish or community boundary
	District, Unitary, Metropolitan, London Borough boundary		Constituency boundary
	Area of wooded vegetation		Non-coniferous trees
	Non-coniferous trees (scattered)		Coniferous trees
	Coniferous trees (scattered)		Positioned tree
	Orchard		Coppice or Ostlers
	Rough Grassland		Heath
	Scrub		Marsh, Salt Marsh or Reeds
	Water feature		Flow arrows
	Mean high water (springs)		Mean low water (springs)
	Telephone line (where shown)		Electricity transmission line (with poles)
	Bench mark (where shown)		Triangulation station
	Point feature (e.g. Guide Post or Mile Stone)		Pylon, flare stack or lighting tower
	Site of antiquities		Glasshouse
	General Building		Important Building
