Subject: RE: Draft report on Rosehill House site meeting

Morning.

Good job!!

I'm glad it was you that had to write that and not me!

It all seems in order and ready to send.

Cheers

kev

Subject: Draft report on Rosehill House site meeting

Hi Kevin

Thank you for your input this morning, found the on site meeting most informative and interesting .

I detail below your recommendations on all the trees under TPO's and any general maintenance work to be done.

Please amend if I have got something wrong and who should I send this e-mail to once you have checked it.

T1 - Cedrus spp Cedar. Tree removed.

T2 - Taxus baccata Yew. Crown lift canopies to allow vehicles to clear and along the neighbours hedge.

T3 - Cedrus spp Yew. No action required to tree, Viburnum tree to be trimmed back from Yew.

T4 - Cedrus spp Yew. Good, no action required.

T5 - Tilia spp Lime. Recommend reduce by 2 to 3 metres. Trim Laurel hedge, both height and width to form a formal hedge. Self seeded Ash tree and Sycamore tree should also be removed.

T6 - Tilia spp Lime. Tree removed. Remove all lime suckers on stump.

T7 - Tilia spp Lime. Good, no action required.

T8 - Tilia spp Lime. Crown lift to statutory height.

T9 - Tilia spp Lime. Reduce height by 3 to 4 metres and crown lift to statutory height.

General:

Trees overhanging highway, crown lifting tree height to statutory heights and road lamp to be cleared.

Driveway, cut back/reduction on Elm tree and cut back hedges to allow vehicles to clear.

Laurel trees next to Christmas tree to be thinned out/removed.

Remove dead tree and cut a pathway around all the poplar trees.

Car park, remove the twin stemmed Sycamore tree with noticeable defects.

Fire hydrant - alleyway to be cleared, Conifer hedge to be cut back to edge of garage.

Kind regards
