

List of External Materials and Finishes - Buildings and Car Park Structures

24.09.2018

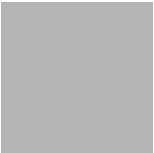

Material Description

- 01 - Aluminium coping / trims
- 02 - Metal panel
- 03 - Metal column casing
- 04 - Terracotta
- 05 - Precast concrete
- 06 - Horizontal metal louvre
- 07 - Vertical aluminium louvre
- 08 - Vertical terracotta fins
- 09 - Glass panel
- 10 - Metal spandrel
- 11 - Metal infill panel
- 12 - Glazed sliding door
- 13 - Stone ballast and concrete pavers
- 14 - Reinforced bituminous membrane
- 15 - Aluminium canopy
- 16 - Vertical aluminium fins

List of External Materials and Finishes - Buildings and Car Park Structures

24.09.2018

Material Description	Description / Location	Example Image
01 - Aluminium coping / trims	Light grey aluminium coping and cappings used predominantly at the top of the building.	
02 - Metal panel	White metal sheet wall and soffit panel cladding system to east and west elevation portals and entrance vestibule.	
03 - Metal column casing	Silver aluminium sheet column cladding to ground floor bridge columns.	
04 - Terracotta	Warm grey terracotta rainscreen cladding system to solid facades.	
05 - Precast concrete	Precast concrete plinth to base of solid facades.	
06 - Horizontal metal louvre	Light grey aluminium louvre to roof plant enclosure with matching doorset.	
07 - Vertical aluminium louvre	Dark grey external feature louvre system to south façade, bridge link and above building entrances.	
08 - Vertical terracotta fins	Feature terracotta baguette and metal fin system framing building entrances. The fin includes a white aluminium inlay.	 Terracotta
		 PPC plate
09 - Glass panel	Hermetically sealed, argon filled double glazed, insulated unit. G value not greater than 0.3, colour rendition index of glass not less than 95%. Glass panels to have structural silicone joint.	

List of External Materials and Finishes - Buildings and Car Park Structures

24.09.2018

Material Description	Description / Location	Example Image
10 - Metal spandrel	Steel spandrel panel on all building elevations.	
11 - Metal infill panel	Insulated metal faced composite flat panel system to clad solid elements of bridge and to vertical feature on the north and south elevations.	
12 - Glazed sliding door	External grade metal framed, glazed sliding doorset to main entrance.	
13 - Stone ballast and concrete pavers	Graded 40-60mm round washed pebble vegetation barrier to roofs. Precast concrete pavers to accessible areas.	 Stone ballast
		 Concrete pavers
14 - Reinforced bituminous membrane	Reinforced bituminous membrane system to bridge roof.	
15 - Aluminium canopy	Bespoke fabricated, aluminium sheet panel canopy system to main entrances.	 Aluminium border
		 PPC plate
16 - Vertical aluminium fins	Vertical aluminium fins to car park structures.
