CONDITIONS & REASONS

1. Sufficient evidence has been provided to demonstrate that a Certificate of Lawfulness should be granted for the proposed two dormer windows and four rooflights. The proposal has been assessed against the Town and Country Planning Act 1990 (as amended) and Class B and Class C, Part 1, Schedule 2 of the Town and Country Planning (General Permitted Development) (England) Order 2015. It can be confirmed that the proposed operation would be lawful for planning purposes on the basis of the drawings:

Drawing No: LDC/1727/1 - Site Location and Block Plan (received 2nd May 2017)

Drawing No: LDC/1727/3A - Proposed Elevations, First Floor Plan and Roof Plan (received 17th May 2017)

Therefore the Local Planning Authority can issue the applicant with a Certificate of Lawfulness for the proposed development.

INFORMATIVES

1. The applicants attention is drawn to the requirement for submission of a Building Regulations application for the proposed development. Please contact Building Control on 0118 937 2449 for advice.

2. During the course of construction, the developer should take care to ensure that no part of this development (foundations, eaves, guttering, etc.) would encroach on, under or across the boundary line with the adjoining property, as the requisite Notice has not been served on the owner of that property. This permission does not confer any right of access onto land that is not under the developer's control. The developer should also be mindful of the obligations and requirements of the Party Wall Act (1996) details of which can be found at:

<http://www.communities.gov.uk/publications/planningandbuilding/partywall>

3. Complaints are commonly received about noise and dust caused by construction and demolition works, particularly working outside reasonable hours and smoke from bonfires associated with the burning of waste on site. The developer is reminded that construction and demolition associated with the approved development will be subject to environmental health law.

4. The materials used in any exterior work shall be of similar appearance to those used in the construction of the exterior of the existing dwellinghouse.
