

Honest Burger, Unit 2, 3-5 King Street, Reading

Waste Management Strategy

1) Number of Bins Provided:

Honest Burger, have undergone an operational assessment of how the site will operate including footfall, covers and amount of potential waste generated from the site using their experience throughout their existing portfolio of restaurants. The necessary quantum of refuse bins required is as follows:

- 2no. 240L Wheelie bins dedicated for general waste
- 1no. 240L wheelie bin dedicated for recycling

2) Bin Storage Area

Please refer to submitted plan ref: 04.01A Proposed Ground Floor GA, which shows the location of the dedicated Waste Refuse Storage Area. The proposed area is located conveniently close to the kitchen and is completely separated from any restaurant space and is not accessible to anyone except members of staff.

All waste will be carried by hand from the dedicated Waste Refuse Storage Area to a dedicated refuse area to the rear of the site before an agreed collection time with the Council's Waste and Refuse Team.

3) Bin Collection Arrangements

As outlined above, the dedicated Waste Refuse Area will be emptied daily, with the refuse being taken to the rear of the property half an hour before the agreed collection time with the Council's Waste and Refuse Team.

Indeed, as was the case with the neighbouring operator, it is deemed that other delivery and servicing arrangements are adequately controlled by the existing highway restrictions for servicing within the central Reading Area.
