SWANAGE

TRADITIONAL AND BESPOKE STOCK BRICKS

Handcrafted splendour

Swanage...

... creating bricks with personality and integrity for traditional & contemporary design

- Traditional handmade and stock bricks
- Imperial bricks available as standard
- Bespoke blends a speciality with Ibstock's unique bespoke blending service
- Non-standard sizes available
- Grey glazed headers available ex-stock
- Full range of special shapes available
- Ideal for matching traditional Edwardian and Georgian brickwork

Handmade bricks of true character

Where Hardy's Dorset meets the Solent, Swanage creates individually unique bricks in a range of colours, textures and sizes to meet specific requirements for any size and type of construction project. Handmakers at Swanage lend their own special character to develop the warmth found only in true handmade bricks.

Blended by hand, traditional Swanage bricks include authentic imperials for restoration or refurbishment projects, especially those in conservation-sensitive areas, and grey-glazed headers characteristic of many original houses found throughout the South East.

In addition to a standard range of handmade and imperial-sized stock bricks, bespoke hand-blended products are a speciality at Swanage. These products are supported with Ibstock's unique blending service.

Non-standard sizes are also readily available to meet particular requirements such as matching up existing brickwork or creating a unique bonding pattern.

Swanage bricks have been used on many high value, prestigious projects including Paternoster Square, London, Millennium Library, Norwich & Douai Abbey, Reading.

Ulwell Multi

Swanage Bespoke Blends

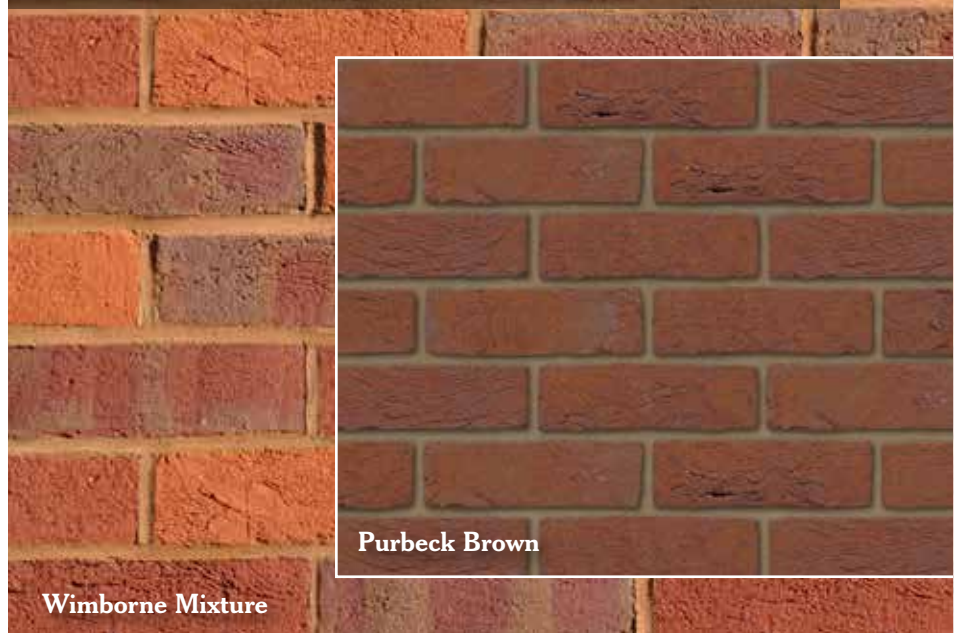

Swanage specialises in creating bespoke or purpose-made blends. These are blends of bricks created for a specific project or customer to meet a particular colour, texture or size requirement enabling the designer to fully exploit their creative flair or to match existing brickwork where a standard brick, 'off the shelf', doesn't do the job.

These panels are just a few of the unlimited options available from Swanage showing blends in:

- 50mm, 65mm and Imperial size formats
- Handmade and fine stock textures in all or a range of Swanage colours
- Non-standard products such as grey glazed headers and brown bricks e.g Purbeck Brown
- Standard blends such as the Ulwell Multi and Wimborne Mixture

Bespoke blend projects are showcased throughout the brochure.

For more information on Swanage bespoke or purpose-made blends contact Mark Woolston on 01929 422257

Grey Glazed Headers

Grey glazed headers are a feature typically found on many traditional houses in the Wealden counties of Kent and East & West Sussex. Used as a feature, normally with plain red stock or handmade bricks, the glazed headers are either used in a variety of bonding patterns such as English & Flemish bonds or as a feature to create a particular pattern often in a diamond formation, such as on the dormitory buildings at Shiplake College, Henley-on-Thames.

Grey glazed headers are now normally used to recreate these effects on new build or to match adjacent brickwork often where planning requirements dictate. This recent upmarket new housing

development in the pretty village of Hamble in Hampshire blends well with the original residential and retail 19th century buildings throughout the village.

Swanage Bespoke Blend St Lawrence Church Hall, Alvechurch, Warwickshire

A Swanage Bespoke Blend brings alive the Ark, the exciting new meeting place at St Lawrence Parish Church in Alvechurch, Warwickshire.

The restoration red colour of the Swanage bricks contrasts well with bands of buff coloured stone, emulating the red and white patterned brickwork incorporated during its restoration in the mid-19th century. The brick and stone combination enhances the distinctive ark design, whilst creating a contemporary feel alongside the mainly stone built church.

Swanage Special Shapes

A full range of both manufactured and cut and bonded specials is available in British Standard and non-standard formats for all Swanage products including bespoke blends. This ensures a seamless match with the main feature brick.

Matching up with existing special shapes forms part of the service provided by Swanage, particularly on refurbishment projects where often there is a requirement for intricate ornamental designs typical of Victorian masonry architecture.

Swanage special shapes are supported by the Ibstock-Kevington special shapes service including prefabricated arches, underslung soffits and factory made brickwork details for use with conventional masonry, saving time and money on site.

Swanage Bespoke Blend Orangery, Cane End, Reading

The Orangery at Cane End, Reading is a beautiful example of using new bricks to blend in with much older brickwork whilst introducing traditional-type features such as detailed dentil brickwork and semi-circular arches over deep feature windows.

The brick blend was selected to match existing walls and barns. The front elevation is formed of a one-brick thick external cavity in Flemish bond overlooking the pool. Particular attention was paid to arching and corbel specials in the cornice to re-emphasise the arched openings.

All specials and elevations were evaluated by the Ibstock design service, including all copings and corner bricks. Rebated specials form subtle panelling effects on the columns between arches, which break down the scale and add relief.
