

have been used to locate ship subsea/unsubmersibles that have features on the drawing. Subscan Technology Ltd have made every endeavour to make sure that the information contained within this document is correct and that the information is up to date. However, the results from these types of surveys are not infallible and should the location or depth of services/features be of particular importance to a project then it is strongly advised that trial excavations should be undertaken to confirm survey results. Subscan Technology Ltd have used any recorded drawings that were made available to us by the client or by the Statutory Utility Providers at the time of the survey. Any information taken from these drawings (i.e. pipe sizes) is not guaranteed. Historic record information is also incomplete and

Where quoted, depth information of underground services/features is stated. Depths are generally within +/- 10% accurate, but cannot be guaranteed. Any depths shown are usually to the top of a service/feature. Gravity sewers and drains are usually to invert (base of drainage channel) unless otherwise stated.
