

INSPECTION SCHEDULE - MOCKBEGGAR ALLOTMENTS

Inspector: CG; 27.11.2015

No.	Species	Age Class	Condition	Context	Noteworthy features	Recommendations	Work Priority	Inspection frequency
TN12	Sycamore	Young	Good	1m from Whiteknights Rd and footpath edge	Heavily colonised by ivy from ground level. Suckers around base. Grows from the bank and bends upright at 1m. On NE underside of stem @ 1m a wound 10mm x 100mm, with evidence of exudation staining bark below. *Ivy prevents thorough inspection of stem and unions.*	No work required	3	
T18	Oak	Mature	Good	1m from Whiteknights Rd and footpath edge; overhanging road and footpaths. On bank pipe with sandbags around it on northern side of base.	Colonised by ivy from ground level to 5m. Small hollow on NE side @ GL 150mm x 20mm; probed to 300mm. Evidence of historic pruning throughout crown. On NE side @ 5m multiple wounds with cavities exist; normal woundwood production. Multiple pruning wounds with normal woundwood and old heartwood exposed through trunk and canopy, consistent with trees of this age. Minor deadwood.	No work	3	
T17	Hornbeam		Good	2m from boundary of road and footpath on bank	Heavily colonised by ivy from ground level to 5m. Hollow/cavity between buttress roots on northern side 200mm x 100 mm; probed to 500 mm. Minor deadwood. Evidence of historic pruning wounds. Slight lean to north. *Ivy prevents thorough inspection of stem up to 6m.*	No work	3	
T16	Holly	Young/ mature	Reasonable	On bank 3m from road and footpath	Hollow on NE side @ ground level between buttress roots 300 mm x 15 mm; probed to 200 mm. Minor deadwood in canopy.	No work	3
