Summer 2014

Cycling Safely

Whether you are an experienced or inexperienced cyclist you must obey the Highway Code – it applies to cyclists as much as to motorists. Below you will find an outline of some of the points illustrated in the code.

On-Road

You MUST obey all traffic signs and traffic light signals.

Bus lanes may be used by cyclists only if the signs include a cycle symbol. Be very careful when overtaking or leaving a bus lane as you will be entering a busier traffic flow.

The law requires that you must have lights and reflectors when on the road between sunset and sunrise.

Advanced Stop Lines enable cyclists to position themselves ahead of other traffic at traffic signal junctions.

Off-Road

Look out for footpaths designated as shared-use for pedestrians and cyclists. These may be segregated by a white line or unsegregated.

Take care when passing pedestrians, especially children, elderly or disabled people and allow them plenty of room. Always be prepared to slow down and stop if necessary.

Top Safety Tips

- Aim to be seen by other road users – wear bright or reflective clothing
- Wear a helmet that conforms to current regulations
- The law requires that you must have lights and reflectors when on the road between sunset and sunrise

Considerate Cycling

- Follow the Highway Code
- Cycle only on pavements designated as share-use
- Use your bell to make other road users aware of your presence as not all pedestrians can see you.
- Make eye contact with other road users
- Signal when carrying out turning manoeuvres and check your blind spots
- Cycle at an appropriate speed dependent upon the facilities being used
- Be prepared to stop or slow down particularly where other road users are present

More information on the Highway Code can be found at www.direct.gov.uk/en/TravelAndTransport/Highwaycode/DG_069837

Cycling in Reading

Reading
Cycle Routes

Bikes are the most energy-efficient form of transport and can be faster and more predictable than car or bus for short journeys.

For example, at a relatively comfortable 10mph, you can cycle from Green Park to The Oracle in 15 minutes – burning around 100 calories in the process.

Cycling regularly can keep you fit, save you money (no tax, no fuel, no fares) and it's one of the most environmentally-friendly ways to travel.

Whether you are an experienced or inexperienced cyclist, planning a journey to work, school or for leisure, Reading Borough Council is happy to provide copies of this cycle map. Please call 0118 937 4881 for hard copies. Alternatively it is online at www.reading-travelinfo.co.uk/cycling

Lock it or Lose It

To Protect Your Bike From Theft with four simple practical steps:

- Do lock your bike to something solid
- Do use the many bike parks around the town 
- Do invest in a good quality lock
- Do have your frame postcoded

BUT

- Don't leave your bike obstructing a way used by pedestrians
- Don't leave it unlocked, EVER, not even for a few seconds

Bike and Train

Bicycles are carried on most trains operating on the National Rail Network. However, each train operating company has its own rules. For full details go to www.nationalrail.co.uk/passenger_services/cyclists.html or call 0845 7484 950. Compact folding cycles are carried free of charge without restrictions.

NOTES

1. This drawing has been prepared in accordance with the scope of RPS's appointment with its client and is subject to the terms and conditions of that appointment. RPS accepts no liability for any use of this document other than by its client and only for the purposes for which it was prepared and provided.
2. If received electronically it is the recipient's responsibility to print to correct scale. Only written dimensions should be used.
3. Exact locations and positions of signs to be agreed with University of Reading on site, to which the contractor is expected to arrange in advance on site works.
4. All traffic sign edges are required to be located a minimum of 450mm away from the edge of carriageway on 30mph roads, and 600mm on roads with speeds greater than 30mph.
5. Traffic management and safety measures shall comply in all respects to Chapter 6 of the traffic signs manual published by HMSO. The Contractor shall submit his proposals for the approval of the Engineer and the Local Highway Authority prior to commencing any work.

APPENDIX G: ENVIRONMENTAL IMPACT MEASURES DURING CONSTRUCTION

Introduction

It is important that construction impacts in relation to issues that may arise within the University Campus and along the local highway network, as well as increases in vehicle emissions and waste attributable to the proposed scheme, are addressed. Suitable mitigation measures aimed at reducing these impacts with specific regard to transport are identified below.

Air Pollution, Dust and Dirt Control

During works the main air pollution emissions are when dust is generated when building materials are broken up and from fumes from machinery. Although there will be no demolition works, if there is any activity that generates dust, the contractors will use high pressure hoses to saturate all bulk materials with water during any such process and whilst loading the waste materials for disposal. Machinery exhaust emissions will be kept as low as is practicable by using well maintained vehicles and machinery at all times.

The three main instances of air pollution emissions during construction works are likely to be the use of compressors, generators and portable cutting tools. Any compressors and generators used will be of the latest design available with low emission ratings. All machinery will be switched off when not in use to minimise emissions as well as noise. Any cutting tools needed will be operated with an automatic water applicator where possible. The water application is designed to dampen any arising debris and dust as well as reduce wear to the blade.

Burning of materials on site will not be permitted in order to prevent smoke emissions.

Mud and debris on the road is regarded as one of the main environmental nuisances and safety problems arising from construction sites. A wheel washing facility will be provided for the duration of the construction works to ensure levels of soil on roadways near the Application Site is minimised. The wheel washing facilities will be in the form of a hose down point located within the University Campus before vehicles exit onto the local road network. All vehicle wheels will be cleaned whenever a vehicle leaves the site.

The contractor will ensure that the area around the Application Site including campus access roads and the public highway is regularly and adequately swept to prevent any accumulation of dust and dirt.

Noise Control

- Noise generated by the construction process will be considered and its impact on neighbouring University buildings mitigated. Suitable mitigation measures to be used include:
- Standard construction hours;
- The use of quieter alternative methods or mechanical plant, where reasonably practicable;
- Locating plant, equipment, site offices, storage areas and worksites away from neighbouring buildings where practical;

- Machines and equipment in intermittent use will be shut down or throttled down to a minimum when not in use; and
- Maintaining and operating all vehicles, plant and equipment in an appropriate manner, to ensure that extraneous noise from mechanical vibration, creaking and squeaking is kept to a minimum.

Fuel Consumption / Emissions

Where possible, local contractors will be appointed for the project, thereby minimising transport costs and impact on the local environment. The use of the booking system for deliveries will also help to ensure that the construction site is serviced in an efficient manner which will help to minimise the number of vehicle movements that would be generated.

A further measure that will be employed is encouraging all delivery vehicles to switch off engines as they are waiting at the site, thereby preventing unnecessarily idling vehicles.

Waste Management

All waste materials will be collected and stored in suitable receptacles before they are taken off site. Waste materials will not be allowed to accumulate because of the fire/vermin risk and due to limited storage space. The waste will be separated into recycling types and general waste in designated general waste and refuse and recycling stores.

Whenever deliveries are undertaken, banksmen will be used to ensure that materials are transferred into the site as soon as possible to ensure that no dirt or rubbish is left on the public highway.
