

Dear Peter Newman,

This is to inform you that we are happy to install and deinstall your Dome at Caversham but we cannot give you a specific date to do this.

We are able to install your Dome sometime between the 13th of September and the 15th October each year and we are able to de-install the Dome between the 15th March and the 15th April each year, but we cannot be more specific than this.

The reason for this is that we have many Domes here in Belgium and in the UK that we need to install and deinstall so we need to be able to schedule all these domes into our diary as we only have one team and one set of equipment that can do this.

We need to move the team around the two countries in a planned and efficient way ie by doing Domes that are geographically close to each other as we can't criss cross around the country doing Domes far apart from each other. This means that the Domes are required to fit into our schedule as they all have similar requirements regarding around when they would like to be installed and de-installed but we cannot obviously do them all on the same day.

Kind Regards

Wouter Stoefs
