

Below is a google street view photo of the dropped kerb markings before it was approved and implemented in 2017. This application included the removal of the front original railing (22 Erleigh Road)

Below is the current photo outside 22 Erleigh Road taken today.

3 Meters of this original railing was removal- granted by planners under planning app ref: 171665.

Below are further examples from google street view demonstrating original railings being altered/ replaced, cut back or in some cases completely removed. Most front of the gardens are poorly designed and not in line with the conservation area policy. All photos are of properties within the Alexandra Road & Erleigh Road conservation area.
