Turbine Hall (Block D)

Schedule of Amendments

Reference	Description	Justification
D01	Stair configuration changed.	Stair width increased from 1200mm overall width to 1200mm between handrails to reflect fire regulation changes. Stair configuration amended to suit.
D02	Escape door position changed.	Fire escape door and associated internal corridors amended to provide direct escape to external area to suit fire regulations.
D03	Introduction of second stair and lift core within tallest part of the building.	Second stair core with lift introduced in the tallest part of the building to reflect fire regulation changes to buildings over 18m.
D04	Communal circulation arrangement changed with the introduction of a lift lobby and adjustment to the lengths of corridors serving apartment entrances.	Introduction of a lift lobby between the stairs and corridors with access to apartments in line with fire regulation changes. Corridors serving apartment entrances redesigned to limit distance from apartment entrance to the lift lobby to 7.5m max. to reflect fire regulations. Riser cupboards amended to suit.
D05	Parking spaces reconfigured.	Undercroft parking spaces relocated to reflect changes to new stair and lift core positions and alterations to structure to suit changes on floors above.
D06	Cycle store consolidated to a single location.	Cycle stores consolidated into a single location following changes to circulation and parking area.
D07	Entrance door arrangement changed.	Minor amendment to the main entrance door to suit changes to the stair position and orientation.
D08	Number of windows changed on north elevation.	Change from 3 windows to 5 windows within this section of the building to provide more glazing within apartments where party wall runs centrally on upper floors whilst retaining odd number of openings and symmetry on elevation.
D09	Set-back element expanded to meet line of building below on east and west elevations.	Set-back removed to limit loss of accommodation from introduction of secondary stair core.
D10	Set-back element pulled back from northern elevation.	Set-back increased to balance increased width on the east and west elevations and to allow simplified structural approach.
D11	Apartment changed from 3-bed to 1-bed.	Introduction of second stair as noted in B04 reduces the footprint of this apartment and therefore results in a change from 2 bedrooms to 1.
D12	Plant enclosure proportions changed.	Enclosure changed to reflect repositioned plant due to locations of smoke shafts, lift over-runs and AOVs. AOV to new stair to open within the enclosure to provide safer access to roof plant.
D13	Lift and smoke shaft over-run positions changed and AOV introduced over stairs.	Lift position changed to suit D01 and D03, with smoke shaft position adjusted to suit fire regulations. AOV added to roof plan over stair position for clarity to reflect fire regulation requirements.
D14	Change from metal cladding to brickwork.	Brickwork introduced to suit elevational changes, providing a “stop” to the glazed element which now sits further back on the building (see D10).
D15	Changes to brick detailing.	Detailing at upper floors changed to suit the revised elevations on the top two floors.
D16	Introduction of plant rooms.	Plant rooms introduced for LV switchgear and Emergency LV switchgear to provide dedicated emergency electrical supplies to each block.
D17	Adjustment to parking space setting out.	Parking spaces adjusted to provide a clear gap to allow alternative fire escape routes from the undercroft area.

Reference	Description	Justification
D18	Internal apartment arrangement handed.	Apartment layout handed to suit change in entrance door position (driven by changes to communal corridor arrangement) and maximise the floor area for the living/kitchen/dining area of this apartment. These internal changes do not affect the external envelope.
D19	Study room added.	Introduction of study rooms to apartments where possible to promote a better home-working environment. These internal changes do not affect the external envelope.
D20	Refuse store updated.	Internal arrangement updated to reflect waste officer comments.

Christchurch Wharf (Block E), Coal Drop Building (Blocks F & G)

Schedule of Amendments

Reference	Description	Justification
E01	Stair configuration changed.	Stair width increased from 1200mm overall width to 1200mm between handrails to reflect fire regulation changes. Stair configuration amended to suit.
E02	Escape door position changed.	Fire escape door and associated internal corridors amended to provide direct escape to external area to suit fire regulations.
E03	Introduction of second stair and lift core within tallest part of the building.	Second stair core with lift introduced in the tallest part of the building to reflect fire regulation changes to buildings over 18m.
E04	Communal circulation arrangement changed with the introduction of a lift lobby and adjustment to the lengths of corridors serving apartment entrances.	Introduction of a lift lobby between the stairs and corridors with access to apartments in line with fire regulation changes. Corridors serving apartment entrances redesigned to limit distance from apartment entrance to the lift lobby to 7.5m max. to reflect fire regulations. Riser cupboards amended to suit.
E05	Cycle store position adjusted.	Cycle store shifted south to allow emergency escape door to revised stair core position.
E06	2no 1-bed apartments combined into a single 2-bed apartment at ground floor, and 1no 1-bed and 1no 2-bed combined to a single 2-bed on upper floors.	Combination of apartments due to smaller footprint sizes through larger circulation spaces, and requirement to maintain 209 dwellings across the scheme.
E07	Door and window configuration handed.	Handing to suit internal arrangement changes.
E08	Doorset changed to window. Balcony removed on upper floors.	Removal of balcony and change to window to reflect the internal arrangement changes and provide rhythm with the adjacent two bays to this elevation.
E09	High-level windows omitted on rear elevation.	Windows omitted due to incompatibility with internal arrangement of the apartment and configuration / floor levels within the stair cores.
E10	New south-facing window added.	Introduction of windows to upper floor apartments to allow introduction of study spaces. Introduction of study rooms to apartments where possible to promote a better home-working environment. These internal changes do not affect the external envelope.
E11	Building footprint changed to match floors below. Addition of 1no 1-bed apartment.	Changes to floor due to inefficiencies of previous scheme when incorporating second stair and lift cores in such a small footprint.
E12	Building footprint changed to match floors below, with provision of 2no set-backs to provide external amenity.	Changes to floor due to inefficiencies of previous scheme when incorporating second stair and lift cores in such a small footprint.
E13	1no 2-bed apartment changed to 1no 3-bed apartment.	Change in number of bedrooms to suit floorspace of the apartment and maintain quantum of 3-beds across the site.
E14	Lift and smoke shaft over-run positions changed and AOV introduced over stairs.	Lift position changed to suit E01 and E03, with smoke shaft position adjusted to suit fire regulations. AOV added to roof plan over stair position for clarity to reflect fire regulation requirements.
E15	Study room added.	Introduction of study rooms to apartments where possible to promote a better home-working environment. These internal changes do not affect the external envelope.
E16	Additional height information added.	AOD levels provided to maintain consistency with approved elevations. Changes to AOD heights through the introduction of parapet to suit masonry construction.

Reference	Description	Justification
F01	Stair configuration changed.	Stair width increased from 1200mm overall width to 1200mm between handrails to reflect fire regulation changes. Stair configuration amended to suit.
F02	Entrance door handed.	Door handing to reflect stair core layout changes.
F03	Window sizes changed.	Window size and positions changed to provide fire separation from adjacent fenestration.
F04	Enlarged lean-to building through introduction of plant rooms.	Plant rooms introduced for LV switchgear and Emergency LV switchgear to provide dedicated emergency electrical supplies to each block.
F05	Refuse store updated.	Internal arrangement updated to suit waste officer comments.
