To whom it may concern

Re: 9 Erleigh Road, Reading- Importance of On-Site Parking for Liberty Supported Living Ltd

As tenants in the property since 1st February 2024, I am writing to address the critical issue of on-site parking for our organisation, Liberty Supported Living Ltd. As a semi-independent provider catering to young people aged 16-18 and Unaccompanied Asylum seekers, our ability to deliver essential services is directly linked to the availability of on-site parking facilities.

Operational Efficiency: The smooth functioning of our organisation hinges on the accessibility and convenience afforded by on-site parking. It allows our staff and visiting professionals to navigate our premises efficiently, ensuring that crucial services are delivered without unnecessary delays or complications.

Accessibility for Professionals: On-site parking is essential to accommodate the diverse range of professionals who play a vital role in supporting the young people under our care. Without this amenity, the logistical challenges of transporting equipment and materials to and from distant parking locations would impede the effectiveness of their services.

Emergency Response: In situations requiring urgent intervention or emergency response, the availability of on-site parking can be a matter of life and death. Rapid access to our premises enables emergency services to reach our young people swiftly, potentially averting crisis situations and ensuring their safety.

Minimisation of Disruptions: The absence of on-site parking increases the likelihood of disruptions to our operations. External service providers, including transport companies and professionals attending meetings, encounter difficulties in finding suitable parking nearby, leading to delays and inefficiencies that compromise the quality of our services.

Long-Term Viability: As a provider committed to the well-being and support of young people, we must consider the long-term viability of our operations. Without adequate on-site parking, the sustainability of our services is called into question, raising concerns about our ability to continue fulfilling our mission effectively.

Liberty Supported Living, 48 Norfolk Avenue, Slough,

In light of these considerations, we urge your understanding and support in addressing the issue of on-site parking for our organisation. We recognise the importance of respecting the requirements of the Conservation Area while ensuring the continued provision of essential services to those who depend on us.

Thank you for your attention to this matter. We look forward to working together to find viable solutions that meet the needs of all stakeholders involved.

Sincerely,

Fradreck Mushaninga

Service Manger
