

Wellness Garden Plan

This is an enclosed communal garden with a focus on the wellbeing of residents. A series of lushly planted, sunny spaces provides for a range of organised and informal activity, encouraging people to spend more time outside, socialise and commune with nature.

Section through Wellness Garden, west facing.

This is the main communal garden for residents and intended as a social focus, opening out from internal shared spaces wherever possible. Therefore the landscape design has been developed in close collaboration with the interior communal offer.

- Retaining wall, approx. 1400mm high, along Crossland Road footway.
- 1100mm high railings with hedge, providing additional privacy and separation from the public footway above.
- Socialising spaces opening out directly into garden, with kitchen terrace and barbeque.
- Lounge opening out directing into the garden with relaxed seating.
- Raised planter adjacent to kitchen for residents' use for growing food, herbs and fruit.
- Tree species and locations carefully considered to reflect microclimatic conditions and screening functions.
