Appendix G:	TRICS Outputs

1.0 Introduction and Policy

Introduction

- 1.1 This Transport Assessment has been prepared by Glanville Consultants on behalf of John Lewis Partnership BTR Ltd to accompany a full planning application at the former John Lewis Depot, Letcombe Street, Reading, RG1 2HN (also known as JLP Mill Lane).
- 1.2 The site currently comprises a disused warehouse with customer collection facilities, ancillary car park and servicing area. The development proposals comprise the demolition of the existing warehouse building and the construction of up to 215 residential flats with ancillary facilities. The description of the development is as follows:
- Demolition of the existing building and redevelopment of the site comprising erection of a new building for up to 215 build to rent residential dwellings (Use Class C3) together with flexible commercial / community space (Use Class E/F1/F2), residents' facilities, landscaping, public realm, amenity space, cycle parking and disabled car parking.*
- 1.3 Extensive pre-application discussions have taken place with Reading Borough Council (RBC) which have informed the design and operation of the proposed development.
- 1.4 The site is highly accessible by non-car modes. As such, it is proposed that the development will operate as largely car-free, with the exception of three accessible spaces proposed on site and parking for up to 4 vehicles for essential users of the affordable housing on Crossland Road. A car club space is also proposed on Mill Lane.
- 1.5 The remainder of this report is structured as follows:
- **Chapter 2:** Existing Situation – A review of the existing site, context and surrounding area;
 - **Chapter 3:** Accessibility by non-car modes – A review of existing pedestrian and cycle routes, public transport provision and the highway network;
 - **Chapter 4:** Development Proposals – A description of the proposed development, including access, parking and servicing;
 - **Chapter 5:** Development Trip Generation and Transport Impact – A consideration of the potential transport effects as a result of the development proposals with regards to trip generation and off-site impact; and
 - **Chapter 6:** Summary and Conclusion – A summary of the key points described in this report are presented and conclusions drawn.
- 1.6 The report concludes that the proposed development is acceptable in transport and highways terms as summarised in Section 6.0.

Policy

- 1.7 This Transport Assessment has been prepared in accordance with Central Government Policies set out in the National Planning Policy Framework (NPPF, December 2023) and in line with Planning Practice Guidance for Travel Plans, Transport Assessments and Statements (March 2014). The RBC Local Plan (November 2019) has also been adhered to, alongside RBC's Revised Parking Standards and Design Supplementary Planning Document (October 2011).

- 1.8 The following paragraphs set out the key national and local policy guidance which has informed the preparation of this Transport Assessment and the development proposals at the site.

National Planning Policy Framework (December 2023)

- 1.9 The NPPF sets out a presumption in favour of sustainable development and the role of transport policies in facilitating sustainable development. The NPPF has been regularly updated, with the most recent revision in December 2023. The relevant paragraphs of the NPPF are set out below.

- 1.10 Regarding transport issues, paragraph 108 states that:

"Transport issues should be considered from the earliest stages of plan-making and development proposals, so that:

- a) the potential impacts of development on transport networks can be addressed;*
- b) opportunities from existing or proposed transport infrastructure, and changing transport technology and usage, are realised – for example in relation to the scale, location or density of development that can be accommodated;*
- c) opportunities to promote walking, cycling and public transport use are identified and pursued;*
- d) the environmental impacts of traffic and transport infrastructure can be identified, assessed and taken into account – including appropriate opportunities for avoiding and mitigating any adverse effects, and for net environmental gains; and*
- e) patterns of movement, streets, parking and other transport considerations are integral to the design of schemes and contribute to making high quality places."*

- 1.11 This Transport Assessment demonstrates that the proposed development will address any adverse impacts on the local highway network and will provide opportunity for walking, cycling and public transport use. As demonstrated in Section 5.0, 93% of the trips to/from the proposed development would be trips on foot, by bicycle, or by public transport.

- 1.12 Paragraph 115 provides the key test of the NPPF to which developments should adhere:

"Development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe."

- 1.13 This Transport Assessment demonstrates that the development would not result in a severe cumulative impact on the local highway network or an unacceptable impact on highway safety.

Planning Practice Guidance - Travel Plans, Transport Assessments and Statements

- 1.14 The Planning Practice Guidance (PPG) – Travel Plans, Transport Assessments and Statements supports the principles set out in the NPPF, providing specific advice regarding Transport Assessments, Statements and Travel Plans.

- 1.15 The PPG states that:

"Travel Plans, Transport Assessments and Statements are all ways of assessing and mitigating the negative transport impacts of development in order to promote sustainable development. They are required for all developments which generate significant amounts of movements."

1.16 The PPG states that Transport Assessments, Statements and Travel Plans can positively contribute to:

- “encouraging sustainable travel;
- lessening traffic generation and its detrimental impacts;
- reducing carbon emissions and climate impacts;
- creating accessible, connected, inclusive communities;
- improving health outcomes and quality of life;
- improving road safety; and
- reducing the need for new development to increase existing road capacity or provide new roads.”

1.17 This Transport Assessment demonstrates that the site enables and actively encourages sustainable travel, thereby positively contributing to the local environment.

RBC Local Plan (November 2019)

1.18 The Local Plan provides policies on how Reading will develop up to 2036. Also, vision 2050 has been launched with an aim to make Reading more dynamic, clean, green, healthy, safe and desirable places to live, work, study and visit. The Plan states that central Reading “is one of the most accessible locations in the South East”. The following five policies considered as part of the proposed development for transport include:

- CC6 – *The highest density and largest scale development location taking place in the most accessible location.*
- TR1 – *‘Proposed development should contribute appropriately to meeting the objectives of the most up-to-date Local Transport Plan’. Along with ‘development proposals should make appropriate provision for works and contributions to ensure an adequate level of accessibility and safety by all modes of transport from all parts of a development, particularly by public transport, walking and cycling, in accordance with any agreed transport assessment submitted as part of the application.’*
- TR3 – *‘Developments will only be permitted where:*
 - i. *Accesses and works to the highway comply with the adopted standards of the Transport Authority;*
 - ii. *The development would not have a material detrimental impact on the functioning of the transport network;*
 - iii. *The proposals would not be detrimental to the safety of users of the transport network, including pedestrians and cyclists;*
 - iv. *The proposal would not generate regular movement of heavy goods vehicles (HGVs) on unsuitable roads, or on roads without easy access to the Classified Highway Network; and*
 - v. *For non-residential uses, or new dwellings on classified roads, off-street servicing would be provided.’*
- TR4 – *It is expected that developments will ‘make full use of opportunities to improve access for cyclists to, from and within the development and to integrate cycling through the provision of new facilities. Development of new facilities for cycling, such as cycle hire points and cycle parking, will be acceptable.’*
- TR5 – *‘Development should provide car parking and cycle parking that is appropriate to the accessibility of locations within the Borough to sustainable transport facilities, particularly public transport.’*

RBC's Revised Parking Standards and Design Supplementary Planning Document (October 2011)

- 1.19 RBC's parking standards have been acknowledged and reflected in the development of the scheme.

2.0 Existing Situation

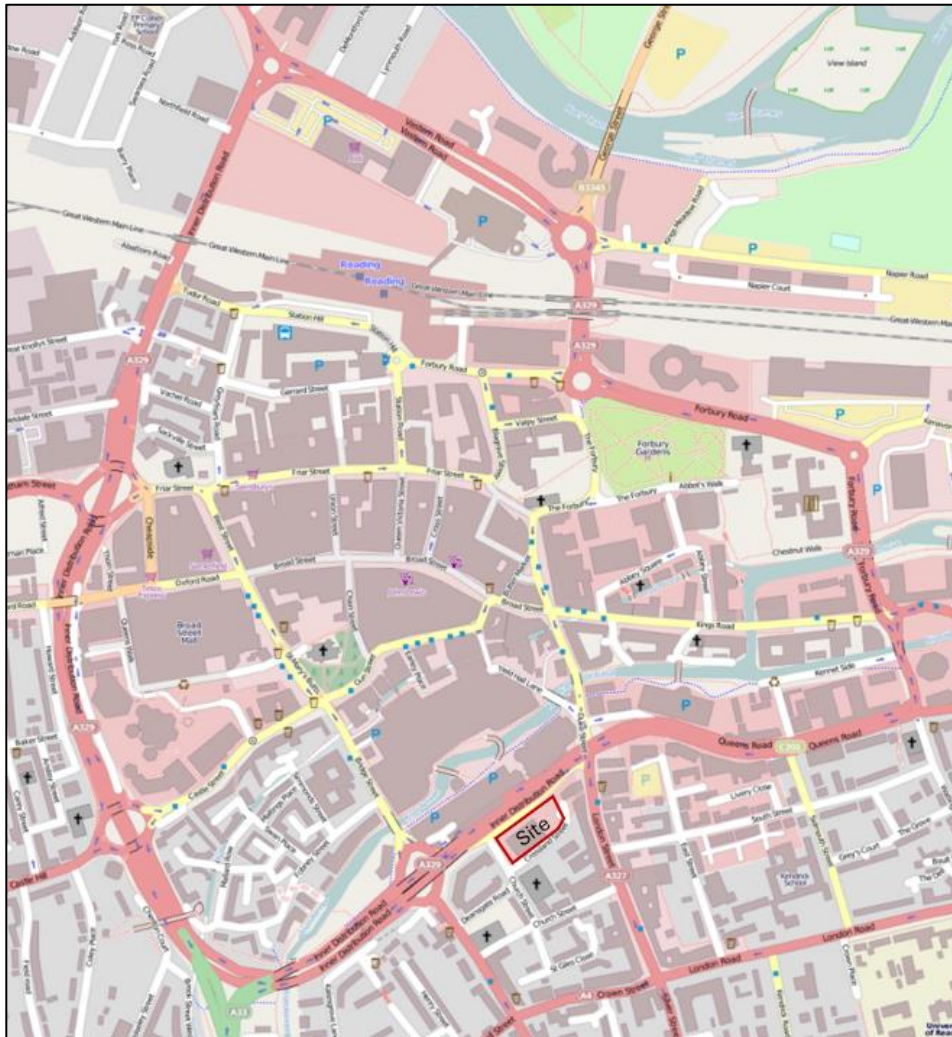

Existing Site

- 2.1 The site forms a rectangular plot of land that is bound by Mill Lane and the A329 to the north, Letcombe Street to the south-west and Crossland Road to the south-east. The site is located on the edge of the town centre in Central Reading within close proximity of key local services and facilities including The Oracle shopping centre opposite and the Premier Inn hotel adjacent to the west. A location plan is provided at Appendix A.
- 2.2 The site comprises a John Lewis warehouse building, formerly used for parcel collection, with associated car parking and servicing areas. The use of the existing building became surplus to requirements as a customer collection centre in 2021, with its functions having been transferred to the John Lewis department store at Broad Street, Reading. The on-site car parking area is accessed from the southwest via Crossland Road. It provides 17 formalised car parking spaces for customers / visitors. Two of those spaces are designated as accessible parking spaces.
- 2.3 The servicing area is located within the eastern portion of the site and is accessed via a turning head at the eastern end of Crossland Road. The servicing area can accommodate 14 car / light delivery vehicle (LDV) parking spaces, 2 enlarged spaces and 2 loading bays for heavy delivery vehicles (HDVs).
- 2.4 There is a pedestrian entrance off Letcombe Street on the north-western corner of the site that used to facilitate pedestrian access for parcel collections. This entrance serves an approximately 1.2m wide passageway along the edge of the car parking spaces adjacent to the south-western site boundary. This internal link along with a zebra crossing enabled customers / visitors to access the building facility on foot.
- 2.5 Pedestrian access for staff was taken from the northeast via a circular passageway, approximately 1.2m wide, running from the existing access through the service yard to two building entrances. No footway is currently provided across this turning head and the accessible route therefore runs along the eastern footway, opposite the turning head on Crossland Road.

Local Highway Network

- 2.6 Mill Lane is a one-way road providing two lanes of traffic west to east. To the east of the site Mill Lane narrows to a single lane and connects with southbound traffic on London Street (A327). The Mill Lane / London Street (A327) junction is signal controlled and comprises controlled pedestrian crossing facilities across all arms. To the west, Mill Lane forms a roundabout junction with Bridge Street, Southampton Street (A327) heading northbound only and the A329. The roundabout junction is also signal controlled and comprises controlled pedestrian crossing facilities across all arms.
- 2.7 The A329 is an east-west road linking Wentworth in Surrey to Thame in Oxfordshire. It comprises the Inner Distribution Road (IDR) that encircles the Reading Central Core Area as shown in Figure 1 below. The site is located to the immediate south of the IDR as shown on Figure 1.

Figure 1: Inner Distribution Road, Reading

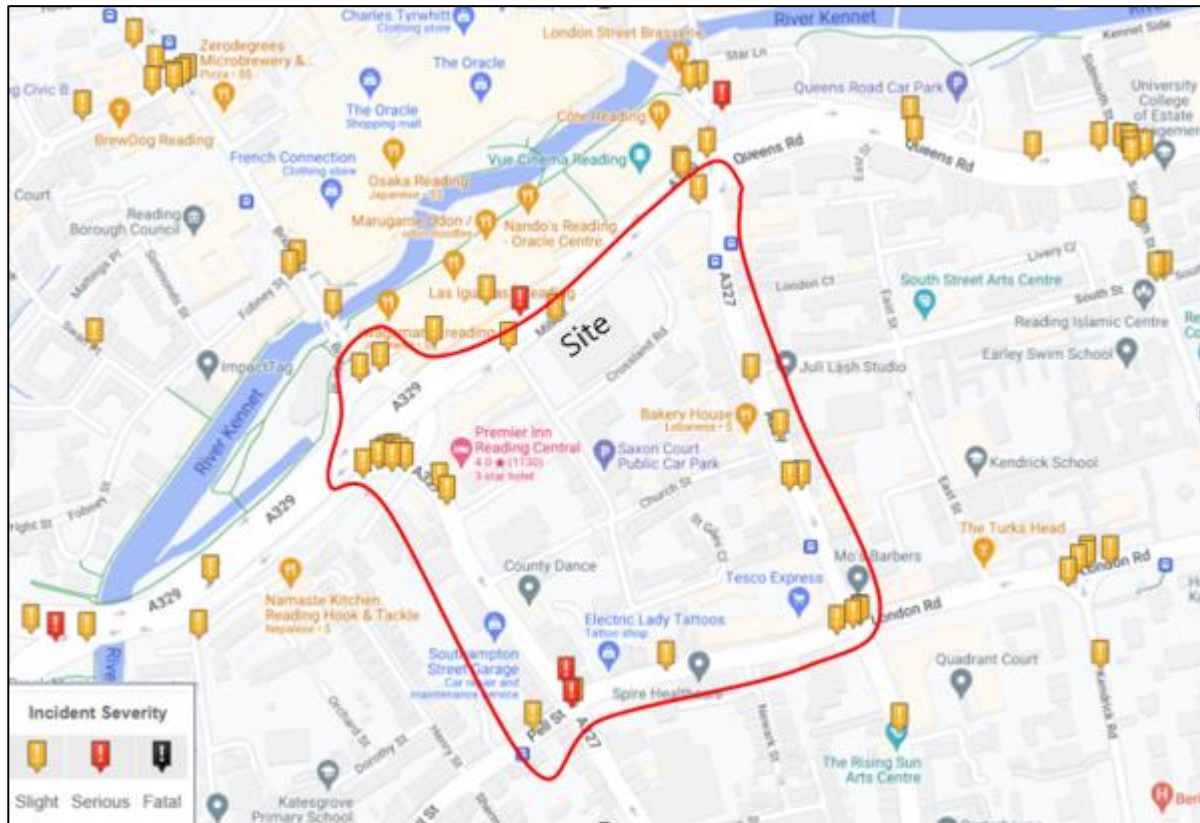

- 2.8 Letcombe Street is an approximately 6m wide single carriageway that provides access (right-turn only) to Mill Lane to the north. Letcombe Street connects with Church Street and Deansgate Road to the south. Deansgate Road connects with northbound traffic on Southamton Street (A327) to the west. Church Street is a no through road for vehicles but provides pedestrian and cycle connections to London Street (A327) eastwards and to Southamton Street (A327) westwards.
- 2.9 Crossland Road is an approximately 6m wide single carriageway which connects to Letcombe Street to the west and is a no through road with a turning head provided to the east of the site. The pavement stops either side of the eastern access point into the site with no dropped kerbs or tactile paving provided. A more accessible route is provided on the eastern side of Crossland Road, opposite the turning head.
- 2.10 There is an approximately 60m long on-street pay and display parking bay on the northern side of Crossland Road, adjacent to the site, that allows parking up to 3 hours with no return within 2 hours. Vehicle parking is restricted on the remainder of Crossland Road by a way of double yellow lines. Double yellow lines are also present on both sides of Letcombe Street and Mill Lane to the west and north of the site.
- 2.11 Current parking controls and waiting restrictions prevent vehicles from parking on street in the vicinity of the site without using pay & display bays.

Road Safety

- 2.12 Personal injury collision records were obtained from Crashmap (<http://www.crashmap.co.uk/>) for the area edged in red as shown in Figure 2. The data refers to the latest five-year period (2018-2022).

Figure 2: Personal Injury Collision records (2018-2022)

- 2.13 Figure 2 demonstrates that very few collisions have been recorded immediately adjacent to the site. Further details on the personal injury collisions shown in Figure 2 are contained in Table 1.

Table 1: Personal Injury Collisions in the vicinity of the site

Location	Severity	Date
A329/Bridge Street/Mill Lane/A327 (Southampton Street) roundabout junction	Slight	06/02/2018
	Slight	17/02/2018
	Slight	03/03/2019
	Slight	03/07/2019
	Slight	25/07/2019
	Slight	29/01/2020
	Slight	26/08/2020
	Slight	12/08/2021
	Slight	2/11/2021
A327 (Southampton Street)	Slight	24/10/2022
	Slight	22/04/2018
A327 (Southampton Street)/A4 junction	Slight	22/04/2018
	Serious	22/12/2018
	Slight	02/02/2019
	Serious	17/08/2021
A4 (Crown Street)	Slight	07/11/2021
A4 (Crown Street/London Road) JW A327 (London Street/Silver Street)	Slight	05/10/2019
	Slight	14/02/2018
	Slight	13/03/2022
	Slight	12/08/2022
A327 (London Street)	Serious	03/12/2022
	Slight	06/10/2018
	Slight	12/08/2020
	Slight	01/10/2020
A327/Mill Lane junction	Slight	26/01/2022
	Slight	09/06/2021

- 2.14 As can be seen in Table 1, a total of 26 personal injury collisions were recorded in this area in the last five years, 3 of which are classified as serious and the rest 23 are classified as slight.
- 2.15 The proposed scheme will be largely car-free and reduce the number of vehicles to and from the site when compared to the extant use as a customer collection centre. Therefore, the proposed development will not result in an increase in the frequency of accidents on the highway network and will be in accordance with paragraph 115 of the NPPF.

3.0 Accessibility by Non-Car Modes

- 3.1 This section of the report appraises the site in terms of accessibility by modes of transport other than the private car.

Walking and Cycling

- 3.2 It is generally considered that 2km for walking and 5km for cycling are acceptable distances to travel to local amenities, facilities, workplaces, and schools. Based on these distances, Figures 3 and 4 show the walking and cycling routes providing access to key destinations in Reading town centre and the wider area.

Figure 3: Walking Routes to Key Destinations

Figure 4: Cycle Routes to Key Destinations

- 3.3 The above figures demonstrate that the site benefits from walking and cycling links to a wide range of local amenities and has immediate access to public transport links. Therefore, future residents and visitors will be able to travel by walking, cycling and public transport to key destinations and will not rely on private car use.

Public Transport

Bus Services

- 3.4 A number of bus services serve Reading town centre and a copy of the network and town centre bus maps (updated January 2024) are provided at Appendix B. The site location has been identified on the town centre map.
- 3.5 As shown in Figure 5, the nearest bus stops are located on London Street (A327), around 100m to the east of the site. The northbound bus stop is provided in a flag and pole arrangement with timetable, whilst the southbound bus stop benefits from a bus shelter with seating. Both bus stops provide access to several routes. Tables 2 and 3 summarise the northbound and southbound bus services respectively.

Figure 5: Public Transport Accessibility

Table 2: Northbound Bus Services

Service Number	Route	Peak Frequency		
		Weekday	Saturday	Sunday
3	Wokingham – Finchampstead – Arborfield – Shinfield – Whitley – University of Reading – Royal Berkshire Hospital – Reading St Marys Butts – Reading Station Road	2 / 4 per hour	2 / 3 per hour	2 per hour
9	Green Park – Whitley – University of Reading – Royal Berkshire Hospital – Reading Kings Road – Reading St Marys Butts – Reading Friar Street – Reading Station Road	1 per hour	1 per hour	No service
9a	Green Park – Whitley – University of Reading – Royal Berkshire Hospital – Reading St Marys Butts	2 per day	No service	No service
19a	Woodley – North Earley – Royal Berkshire Hospital – Reading St Marys Butts – Reading Station Road	2 per hour	1 per hour	No service
19b	Lower Earley – Royal Berkshire Hospital – Reading Kings Road – Reading St Marys Butts – Reading Friar Street – Reading Station Road	1 per hour	1 per hour	No service
19c	Woodley – Earley – Royal Berkshire Hospital – Reading St Marys Butts – Reading Station Road	1 per hour	1 per hour	No service
21	Lower Earley – University of Reading – Reading St Marys Butts – Reading West Street – Reading Blagrove Street	3 per hour	3 per hour	3 per hour
21a	University of Reading – Reading St Marys Butts – Reading Blagrove Street	4 per hour (University of Reading term time only)	No service	No service

- 3.6 As can be seen from Table 2, there are eight northbound bus routes with most of those providing frequent services over the course of a week to Reading Central Core Area and the railway station.
- 3.7 Additionally, Rail Air operates 2 coaches per hour between Reading railway station and London Heathrow Airport.

Table 3: Southbound Bus Services

Service Number	Route	Peak Frequency		
		Weekday	Saturday	Sunday
5	Reading St Marys Butts – Reading Station Road – Whitley – Whitley Wood	5 per hour	5 per hour	4 per hour
6	Reading St Marys Butts – Reading Station Road – Whitley – Whitley Wood	5 per hour	5 per hour	4 per hour
6a	Reading St Marys Butts – Reading Station Road – Whitley – Whitley Wood – Worton Grange	7 per day	7 per day	6 per day
11	Reading St Marys Butts – Reading Blagrove Street – Katesgrove – Coley Park	4 per hour	4 per hour	2 per hour
21	Reading St Marys Butts – Reading Blagrove Street – University of Reading – Earley – Lower Earley	4 per hour	4 per hour	4 per hour
21a	Reading St Marys Butts – Reading Blagrove Street – The Mount – University of Reading	5 per hour	No service	No service
81	Caversham Heights - Caversham Library – The Mount – Royal Berkshire Hospital – University of Reading – Whitley – Earley – Bulmershe Sports Centre	2 per day (Wokingham school days only)	No service	No service
91	Kentwood Circle – Reading West – Whitley – Reading Girls School	1 per day (Oxfordshire school days only)	No service	No service

- 3.8 As can be seen from Table 3, frequent bus services throughout the week are provided to University of Reading, local schools as well as to Whitley and Whitley Wood which provide access to large employment sites in the south of Reading.

Rail Services

- 3.9 Reading railway station is located within an 850m (12-minute) walking distance of the site to the north. The station is a major transport hub that provides access to train services operated by Great Western Railway (GWR), Cross Country and South Western Railway (SWR), details of which are provided below.
- **GWR** operate trains to destinations which include Slough and London Paddington to the east, Oxford, Cheltenham and Worcester to the northwest, Swindon, Bath, Bristol and Cardiff to the west as well as Basingstoke and Guildford to the south.
 - **Cross Country** operate trains to destinations which include Basingstoke, Winchester, Southampton, and Bournemouth to the south as well as Oxford, Banbury, Leamington Spa, Coventry, Birmingham, Stoke-on-Trent, and Manchester to the north.
 - **SWR** provides services to Wokingham, Staines, Richmond, Wimbledon, Clapham Junction, Vauxhall and London Waterloo.

- 3.10 Table 4 summarises the peak frequency and approximate journey times of train services that are available from Reading railway station.

Table 4: Reading Railway Station Service Summary

Destination	Frequency	Approximate Journey Time
Slough	5 per hour	22 minutes
London Paddington	12 per hour	25 minutes
Basingstoke	3 per hour	27 minutes
Oxford	4 per hour	23 minutes
Swindon	6 per hour	25 minutes
Bath Spa	3 per hour	52 minutes
Bristol	5 per hour	70 minutes
Cardiff	3 per hour	93 minutes
Cheltenham	3 per hour	90 minutes
Worcester	1 per hour	100 minutes
Birmingham	3 per hour	90 minutes
Winchester	1 per hour	34 minutes
Southampton	1 per hour	50 minutes

- 3.11 Reading railway station is the west end terminus of the Transport for London's Elizabeth Line (Crossrail) services. This service runs through central London to Shenfield and Abbey Wood. It provides four trains during peak hours to railway stations and key interchanges in London including Hayes and Harlington (connection to Heathrow Airport), Ealing Broadway, Paddington, Bond Street, Farringdon, Liverpool Street, Canary Wharf and Stratford.
- 3.12 Reading station has step-free access to all platforms, cafés, shops and 344 secure cycle storage spaces. It is also provided with toilet facilities, ticket machines and a ticket office operating as follows over the course of a week:
- Monday to Friday: 06:15 – 22:00
 - Saturday: 06:15 – 22:00
 - Sunday: 07:15 – 22:00

Car Clubs

- 3.13 Car clubs provide their members with convenient access to a range of modern, efficient vehicles without having to consider the expense of ownership. Both individuals and businesses can join a car club which could then be used as an additional car or as an alternative to owning a vehicle. The cost of fuel, insurance and road tax is included as part of an annual membership fee, hourly payment, and a mileage charge.
- 3.14 There are currently 6 car clubs in Reading, two of which are operated by Enterprise and the remaining four are operated by Co Wheels. The nearest car club space to the site is located near the Filbert Street/Kenavon Drive junction, around 1.1km away from the development.

Summary

- 3.15 The site is highly accessible by non-car modes. As such, the site is ideally located for a car-free development.

4.0 Development Proposals

Proposed Development

- 4.1 The proposals comprise the demolition of the disused warehouse building and redevelopment of the site comprising erection of a new building for up to 215 residential dwellings with flexible commercial/community space (Use Class E/F1/F2), and residents' facilities. These apartments will be purpose-built for rent and will be professionally managed by JLP. This development will operate as largely car-free, with the exception of three accessible spaces proposed on site and four spaces for essential users of the affordable housing on Crossland Road. A car club space is also proposed on Mill Lane.
- 4.2 The proposed site layout and General Arrangement drawing are provided at Appendix C.

Access Arrangements

- 4.3 The existing crossover at the south-western corner of the site on Crossland Road, which currently serves the customer car park, will be closed and the footway and kerb reinstated to provide a continuous pedestrian route along the northern side of Crossland Road.
- 4.4 The existing vehicular access at the eastern end of the site on Crossland Road, which currently serves the servicing area, will be closed. The turning head will be retained and tracking drawings have been produced (see Appendix E) to demonstrate that vehicles can still easily manoeuvre within the space provided. No footway is currently provided either side of the eastern access into the site and the proposed development looks to rectify this. The landscaping layout, as shown at Appendix C, provides a stepped footway along the eastern edge of the new building and an accessible route across the turning head with flush/dropped kerbs and demarcated in red asphalt so that the route is highlighted to vehicles manoeuvring around the turning head as well as those pedestrians who are crossing the carriageway.

Car and Cycle Parking

Car Parking

- 4.5 According to the RBC "Revised Parking Standards and Design Supplementary Planning Document (SPD)" adopted on 31 October 2011, the proposed development falls within Zone 2, Primary Core Area. Maximum parking standards are provided for each Zone by land use. The parking standards for a 'C3 Dwelling Flat' located in Zone 2 are a maximum of 1 parking space per 1-2 bed flat and a maximum of 1.5 parking spaces per 3+ bed flat. In terms of visitors' parking, the standards require the provision of 1 space per 10 dwellings for flatted developments. However, RBC have accepted that this development site is well-located for a car-free scheme and therefore a largely car-free development is proposed.
- 4.6 Three accessible parking spaces will be provided on the north-eastern corner of the site, which is compliant with the RBC accessible parking standards.

- 4.7 The proposed closure of the access to the existing car park on site allows for the extension of the pay & display parking bay along the northern side of Crossland Road. The existing bay measures 57.9m in length and provides parking for up to 9 vehicles, based on average of 6m per parallel parking space. A 54m-long pay & display bay and a 24m-long 'Affordable Housing - Essential Car Use Only' bay is proposed which would retain pay & display parking for up to 9 vehicles and provide parking for up to 4 vehicles for essential users of the affordable housing as shown on the General Arrangement drawing at Appendix C.
- 4.8 It is proposed that the 'Affordable Housing - Essential Car Use Only' bay will be managed through the issuing of four permits to essential users of the affordable housing upon request to RBC.
- 4.9 As described in Section 3, the proposed development is in a sustainable location to the immediate south of the Reading Central Core Area and benefits from walking and cycling links to local amenities and key destinations within the town centre and the wider area to the south and east. Additionally, there are several bus routes within a short distance of the site that provide frequent services to the Central Core Area and the railway station to the north as well as to the University of Reading to the southeast and major employment sites to the south. Reading railway station is located within a 12-minute walk to the north of the site and provides frequent services to further employment destinations.
- 4.10 The current parking controls and waiting restrictions in the vicinity of the site prevent vehicles from parking on street without using the pay & display bays or the proposed affordable housing essential worker bays. Therefore, it is considered that the location of the site can sufficiently accommodate a largely car-free scheme as future residents and visitors will be able to travel to key destinations without being reliant on private car use.

Car Club

- 4.11 RBC's "Revised Parking Standards and Design Supplementary Planning Document (SPD), October 2011" identifies the need for car club spaces at Chapter 9.0 with key extracts provided below, noting that the site is located within Zone 2:
- "For developments of more than 10 residential units in Zones 1 and 2, developers will be required to:*
- Provide or support a car club on the site, or demonstrate that the development will have access to and the use of a car club on a nearby site.*
 - Create dedicated car parking spaces on the site for the car club."*
- "Car clubs must provide a minimum of 2 cars. Spaces will be required to be provided on site, easily accessible for all residents."*
- "Car clubs will be encouraged to discuss the placement of car club parking on public streets within the Borough with the Council's Transport Department."*
- 4.12 Pre-application discussions with RBC, including the Highways Pre-Application Meeting on Thursday 7 December 2023, have not highlighted a need for two car club spaces to be provided. However, John Lewis Partnership BTR Ltd aspire to provide a car club space on-street to serve the proposed development as well as the local community.
- 4.13 RBC advised that, if the car club space was in place of part of a pay & display parking already provided, evidence would need to be provided to justify the loss of the on-street parking space.

- 4.14 RBC's Parking Services Team were able to provide parking data for the local pay & display bays on Crossland Road, Mill Lane and Deansgate Road. The data provides the arrival time and departure of vehicles using the pay & display bays every day for the whole of 2023. A copy of the raw data is provided at Appendix D.
- 4.15 The data has been analysed and an accumulation exercise has been undertaken to better understand the maximum number of vehicles parked in each location at any one time. A summary of the findings is provided in the following tables.

Table 5: Summary of Daily Vehicle Arrivals

Daily Vehicle Arrivals	Crossland Road		Mill Lane		Deansgate Road	
	Nos. of Days	% of the Year	Nos. of Days	% of the Year	Nos. of Days	% of the Year
0	35	10%	42	12%	12	3%
1	81	22%	67	18%	38	10%
2	102	28%	71	19%	45	12%
3	69	19%	72	20%	67	18%
4	32	9%	41	11%	78	21%
5	21	6%	37	10%	52	14%
6	8	2%	23	6%	36	10%
7	11	3%	10	3%	15	4%
8	3	1%	2	1%	13	4%
9	3	1%	0	0%	5	1%
10	0	0%	0	0%	4	1%
Total	365	100%	365	100%	365	100%

- 4.16 Table 5 demonstrates that 87% of the year (2023) there are four or less vehicles using the bays on Crossland Road.

Table 6: Summary of Daily Vehicle Accumulation

Daily Accumulation (Max. Nos. of Vehicles Parked at any One Time)	Crossland Road		Mill Lane		Deansgate Road	
	Nos. of Days	% of the Year	Nos. of Days	% of the Year	Nos. of Days	% of the Year
0	35	10%	42	12%	114	31%
1	180	49%	152	42%	83	23%
2	104	28%	137	38%	115	32%
3	29	8%	31	8%	40	11%
4	14	4%	2	1%	12	3%
5	2	1%	1	0%	0	0%
6	1	0%			1	0%
7	0	0%				
8	0	0%				
9	0	0%				
Total	365	100%	365	100%	365	100%

- 4.17 Table 6 demonstrates that the bay on Crossland Road was never fully occupied in 2023 with a maximum of 6 vehicles parked at the same time on only one day of the year. This bay can accommodate up to 9 vehicles.
- 4.18 The bay on Mill Lane can accommodate up to 5 vehicles and was only fully occupied on one day of the year in 2023: Wednesday 26 April. The bays on Deansgate Road can accommodate up to 6 vehicles and were also only fully occupied on one day of the year in 2023: Monday 16 January.
- 4.19 Therefore, given that there is capacity available within the nearby pay & display bays on Mill Lane and Deansgate Road, this data demonstrates that a reduction in the length of the pay & display bay on Crossland Road (by up to 4 spaces) would not negatively impact parking provision in the local area. Furthermore, the reallocation of a pay & display bay on either Mill Lane or Deansgate Road would also not negatively impact parking provision in the local area.
- 4.20 As discussed at paragraph 4.7, it is proposed to reduce the length of the pay & display bay on Crossland Road by 3.9m which would retain parking provision for up to 9 vehicles. Considering the need for car club spaces as identified in RBC's "*Revised Parking Standards and Design Supplementary Planning Document (SPD), October 2011*" and the above parking assessment, a car club space is proposed to be provided by converting the western end of the pay & display bay on Mill Lane as shown on the General Arrangement drawing at Appendix C.

Cycle Parking

- 4.21 RBC's minimum cycle parking standards set out in the "*Revised Parking Standards and Design Supplementary Planning Document (SPD), October 2011*" require the provision of 0.5 cycle parking spaces per one to two-bedroom flat and the provision of 1 cycle parking space per three+ bedroom flat. Therefore, the proposed development will need to provide a minimum of 114 cycle parking spaces in total in accordance with the RBC standards.
- 4.22 The proposed development will sufficiently accommodate the above required cycle parking spaces within a communal cycle store to be provided at the ground floor level with access from the northern building frontage as illustrated at Appendix C. The residential cycle parking spaces will be provided in the form of two-tier racks with room available within the cycle store for adapted bicycles/tricycles.
- 4.23 The flexible commercial/community space covers an area of 74m² and would therefore require up to 2 cycle parking spaces in line with standards and depending on its exact use. In excess of this requirement, a total of six cycle parking spaces for visitors will be provided in the form of three Sheffield stands located adjacent to the main building entrance.

Servicing and Refuse Collection

- 4.24 Refuse collection will take place on Letcombe Street to the immediate southwest of the site and via the existing turning head of Crossland Road to the immediate northeast. Swept path analysis of an 8.75m refuse vehicle stopping at two points on Letcombe Street and then turning left into Crossland Road, travelling to the end of the road, using the turning head and then egressing in a forward gear is provided at Appendix E. For further waste management details, please refer to the Operational Waste Management Strategy submitted as part of this planning application.

- 4.25 Deliveries to the site will take place from Crossland Road via the existing turning head. Delivery vehicles will reverse up to the proposed development to drop off items and then egress in a forward gear.

Emergency Access

- 4.26 Emergency vehicle access complies with the Building Regulations 2010 Volume 1. Emergency vehicles will be able to travel along Crossland Road, manoeuvre within the existing turning head and then depart in a forward gear as demonstrated at Appendix E. This arrangement will enable the proposed residential units to be within a 45m buffer from the position of the fire tender, in accordance with the Building Regulations 2010 Volume 1.

Lighting

- 4.27 DFL (Designs for Lighting Ltd) have undertaken a detailed street lighting analysis of the existing high mast lighting on Mill Lane and a copy of DFL's Technical Report (dated 20 May 2024) is provided at Appendix F. The report summarises the impact of the current lighting on existing and proposed residential buildings and also sets out the benefits of amending the current lighting design and a proposal for doing so. DFL have discussed the proposals with the current lighting column manufacturers CU Phosco to propose a solution which does not impact the current lighting classification on the IDR or surrounding roads. The proposed lighting strategy is included on the proposed site layout and General Arrangement drawing provided at Appendix C.

Construction Logistics

- 4.28 The planning application is accompanied by a framework Construction Management Plan (CMP) which includes a Traffic Management Plan that clearly defines the pedestrian and vehicular routes that are proposed throughout the construction programme.

5.0 Development Trip Generation and Transport Impact

- 5.1 This chapter considers the likely number of trips that will be associated with the proposed development. Considering the flexible commercial/community space covers a small area of 74m² and would give rise to very little trips when compared with the 215 BTR apartments, the following trip generation exercise focuses on the residential trip generation alone. All trips are considered as new trips to the network as a worst-case scenario, in order to ensure a robust assessment.

Multi-Modal Trips

- 5.2 To estimate the trip generation of the proposed 215 BTR apartments, the TRICS database has been interrogated to establish appropriate trip rates. There are a limited number of sites within the TRICS database that are considered comparable to the location of the proposed development and that are car-free. Data is available for a development of 233 dwellings located at Maritime Street, Surrey Quays in Southwark, Greater London that is highly accessible by public transport and is similarly car-free. Trip rates derived from surveys at this site have been used to estimate the trip generation of the proposed development, as described below. A copy of the TRICS output is provided at Appendix G.
- 5.3 Multi-modal trip rates for the proposed residential use are set out in Table 7.

Table 7: Multi-modal trip rates for residential use (two-way)

	Multi-Modal Trip Rates (trips per dwelling)		
	AM Peak (08:00 – 09:00)	PM Peak (18:00 – 19:00)	Daily (00:00 – 24:00)
Vehicle occupants	0.038	0.026	0.420
Pedestrians	0.128	0.150	1.919
Cyclists	0.017	0.021	0.130
Public transport users	0.455	0.485	3.898
Total People	0.639	0.683	6.366

- 5.4 Applying the trip rates described above to the 215 dwellings proposed, results in an estimate of trip generation as set out in Table 8.

Table 8: Multi-modal trip generation for 215 dwellings (two-way)

	Multi-Modal Trip Generation (215 dwellings)		
	AM Peak (08:00 – 09:00)	PM Peak (18:00 – 19:00)	Daily (00:00 – 24:00)
Vehicle occupants	8	6	90
Pedestrians	28	32	413
Cyclists	4	5	28
Public transport users	98	104	838
Total People	138	147	1,369

- 5.5 Application of the multi-modal trip rates to the proposed development results in an estimate of 1,369 person trips to/from the residential units each day, of which 93% would be trips on foot, by bicycle, or by public transport. Pedestrians would comprise 30% of the total, cyclists would comprise 2% of the total, and public transport users would comprise 61% of the total. The trip generation reflects the highly accessible location of the site and the car-free nature of the proposed development.

Transport Impact

- 5.6 Given the largely car-free nature of the scheme, the expected vehicle movements to and from the development will be very low during the morning and afternoon peaks as shown in Table 8. The number of pedestrian and cycling movements anticipated from the proposed development could be easily accommodated within the surrounding transport network.
- 5.7 According to Table 8, most of the trips (61%) are expected to be taken by public transport. It is estimated that 98 two-way trips will be taken during the AM peak and 104 two-way trips will be taken during the PM peak with 838 two-way trips expected over the course of a day. As described in Section 3, the site is served by several bus routes to Reading town centre northbound, University of Reading to the southeast and employment sites to the south. A minimum of 30 buses per hour serve the nearest bus stops, just 100m to the east of the site on London Street, on weekdays. Reading railway station provides access to approximately 50 services per hour connecting to a range of destinations including London. Considering the above, it is considered that the existing public transport services have enough capacity to serve this level of demand.
- 5.8 Overall, it is not expected that the proposed residential development will have any material impact on the existing and surrounding transport network.

Construction Traffic

- 5.9 As noted in Chapter 4, the planning application will be accompanied by a Construction Management Plan (CMP). The CMP considers the amount of construction traffic generated, the route construction vehicles will use, and any associated traffic management measures.

6.0 Summary & Conclusion

Summary

- 6.1 This Transport Assessment has been prepared by Glanville Consultants on behalf of John Lewis Partnership BTR Ltd to accompany a planning application to redevelop their site at Mill Lane, Reading, RG1 2HT.
- 6.2 The site forms a rectangular plot of land that is bounded to the north by Mill Lane and to the west by Letcombe Street with Crossland Road wrapping around the southern and eastern sides. The Oracle Shopping Centre is located opposite the site.
- 6.3 The site comprises a former John Lewis Depot, which was used for customer collection facilities, with ancillary car park and servicing area. The on-site car parking area is accessed from the southwest via Crossland Road. The service yard is located within the eastern portion of the site is accessed from the east via a turning head forming part of Crossland Road.
- 6.4 The proposals comprise the demolition of the disused warehouse building and redevelopment of the site comprising erection of a new building for up to 215 residential dwellings with flexible commercial/community space (Use Class E/F1/F2), and residents' facilities. These apartments will be purpose-built for rent and will be professionally managed by JLP. This development will operate as largely car-free, with the exception of three accessible spaces proposed on site and parking for up to 4 vehicles for essential users of the affordable housing on Crossland Road. A car club space is also proposed on Mill Lane.
- 6.5 It has been demonstrated that:
- The proposed development will not give rise to any road safety risks in the surrounding area.
 - The site is in a highly sustainable location with direct access to walking and cycling links to a wide range of local amenities and key destinations. It also benefits from several bus routes to the town centre as well as to educational facilities and employment sites in the wider area. Reading railway station is located within a 12-minute walk to the north of the site and provides frequent services to and from further employment destinations, including London.
 - 114 cycle parking spaces will be provided in a communal cycle store at the ground floor level and six cycle parking spaces for visitors will be provided in the form of three Sheffield stands located adjacent to the main building entrance, in excess of RBC parking standards.
 - Servicing and refuse collection will take place on street with sufficient space for large vehicles to manoeuvre in the vicinity of the site.
 - Emergency vehicle access complies with the Building Regulations 2010 Volume 1; the proposed residential units and commercial unit will be within a 45m buffer from the position of an emergency vehicle serving the site.
 - The proposed development is estimated to generate 1,369 person trips each day, of which only 7% would be by vehicles with the remaining 93% by sustainable modes (on foot, by bicycle, or by public transport). This reflects the highly accessible location of the site and the largely car-free nature of the development. It is considered that the expected level of movements can be well-accommodated within the existing and surrounding transport network.
- 6.6 A Construction Management Plan has been prepared to support this planning application.

- 6.7 A Framework Residential Travel Plan is also provided to further promote the use of non-car modes of transport against the private car use.

Conclusion

- 6.8 It is concluded that, in accordance with paragraph 114 of the National Planning Policy Framework (NPPF, December 2023), *"the development proposals would ensure that:*
- a) appropriate opportunities to promote sustainable transport modes can be – or have been – taken up, given the type of development and its location;*
 - b) safe and suitable access to the site can be achieved for all users;*
 - c) the design of streets, parking areas, other transport elements and the content of associated standards reflects current national guidance, including the National Design Guide and the National Model Design Guide; and*
 - d) any significant impacts from the development on the transport network (in terms of capacity and congestion), or on highway safety, can be cost effectively mitigated to an acceptable degree."*
- 6.9 The proposed development is also considered to comply with paragraph 115 of the NPPF which advises that *'Development should only be prevented or refused on highway grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe'*.
- 6.10 In light of the evidence presented in this report, it is concluded that the development will not have a detrimental impact on highway safety and transport impacts cannot be regarded as 'severe'. Therefore, the Highway Authorities should be able to recommend approval of the planning application.

Proposed Site Layout and General Arrangement Drawing

- NOTES**
1. All dimensions in millimetres unless otherwise shown.
 2. All levels in metres above Ordnance Datum (mAOD) unless otherwise shown.
 3. All dimensions to be checked on site and any discrepancies reported to Employer before pricing / work starts.
 4. Any ambiguities or discrepancies within this drawing and any other information given elsewhere must be reported to Camlins and the Employer for clarification before pricing work proceeds.
 5. All drawings to be read in conjunction with other Camlins drawings and specification information as appropriate.
 6. Refer to relevant Engineer's and Architect's information as appropriate for confirmation of all engineering and architectural details.
 7. All works to be carried out in accordance with the latest British Standards and appropriate codes of practice as a minimum.

- KEY**
- Planning application site boundary
 - Proposed Specimen Trees - refer to drawing SY743-000-0051 General Arrangement - Tree Planting Plan
 - Hedge - mixed native species, maintained at nom. 1100mm high
 - Hedge - overgreen, yew maintained at 700mm high
 - Planting beds - medium height shrubs and perennials
 - Planting beds - low height shrubs and perennials
 - Grassed area, generally mounded
 - Small set stone paving
 - Footway paving to Highway Authority adoptable standard
 - Footway paving to Highway Authority adoptable standard in contrasting colour
 - Concrete block paving to Highway Authority adoptable standard
 - Resin bound aggregate surfacing, with aluminium edging
 - Pre-cast concrete steps
 - Gabion wall retaining edge with timber seating, nom. 550 high
 - Gabion wall retaining edge, nom. 500 high
 - Concrete flag maintenance margin, nom. 300 wide
 - Kingpost / sleeper retaining wall to Crossland Road
 - Brick retaining wall with balustrade guarding where required.
 - Steel guardrail
 - Natural rocks as playable landscape
 - Timber playable landscape features
 - Indicative loose furnishings
 - Steel gates (Swing)
 - Steel gates (Sliding)
 - Raised timber planters for community vegetable and herb growing. Provided in both Neighbourhood and Residents garden
 - Indicative proposed lighting columns to lighting specialist's specification
 - Indicative proposed bollard lighting to lighting specialist's specification
