Executive Summary

Appointment	Packaged Living have instructed Hexa to undertake a Phase 1 Preliminary Risk Assessment (PRA) of a roughly rectangular shaped parcel of land to the north of Vastern Road and to the south of River Thames. The approximate Grid Reference centre of the site is SU 71670 74050. The nearest post code for the site is RG1 8DA.
Current Site Status	The site comprises a commercial/ office building with associated car parking.
Proposed Development	Demolition of the existing office/commercial building and development of an up to 11 storey residential-led development comprising residential properties with some commercial use at the ground floor.
Site History	Historical Ordnance Survey maps obtained show various phases of development and a varied site usage including Iron Works, Timber Yard, Paint Works, Garage and unspecified Tanks.
Geology	Given the various development cycles, Made Ground is anticipated to be present on the site. Superficial deposits of Langley Silt Member, comprising clays and silt are mapped to be present across the site. Alluvium is shown immediately to the north. Bedrock is mapped to comprise Seaford and Newhaven Chalk Formation. Local BGS logs show a ground model comprising clays and silts to c. 3m followed by medium dense to dense sand and gravel to c. 7 to 10m overlaying the Chalk bedrock.
Hydrogeology and Hydrology	The site is not in a source protection zone. Langley Silt is designated as unproductive strata with alluvial deposits to the north listed as a Secondary A. The Chalk Bedrock is designated as a Principal Aquifer. The River Thames is to the immediate north of the site boundary. There are no known main watercourses on or near the site.
Initial Ground Contamination Assessment	The site history presents potential for gross contamination to be present on the site. The proposed change of use comprises large footprint building with limited proposed landscaping which will limit potential dermal contact and ingestion pathways. The presence of sheet piled retaining wall to the river bank may limit connectivity with the surface waters and impact local groundwater flows. At this stage the risk to Human Health and Controlled Waters Receptors is assessed to be Moderate.
Recommendations	Based on this assessment there is considered to be a requirement for further (intrusive) investigation to establish contamination potential at the site. A suitable intrusive investigation should be undertaken prior to development, to establish the current ground model and allow adequate recovery of soil, rock and groundwater samples to allow for Generic Quantitative Assessment (GQRA) to further investigate Potential Pollutant Linkages identified at the site.

1.0 Introduction

1.1 Appointment

Packaged Living have instructed Hexa to undertake a Phase 1 Preliminary Risk Assessment (PRA) of a roughly rectangular shaped parcel of land to the north of Vastern Road and to the south of River Thames. The approximate Grid Reference centre of the site is SU 71670 74050. The nearest post code for the site is RG1 8DA.

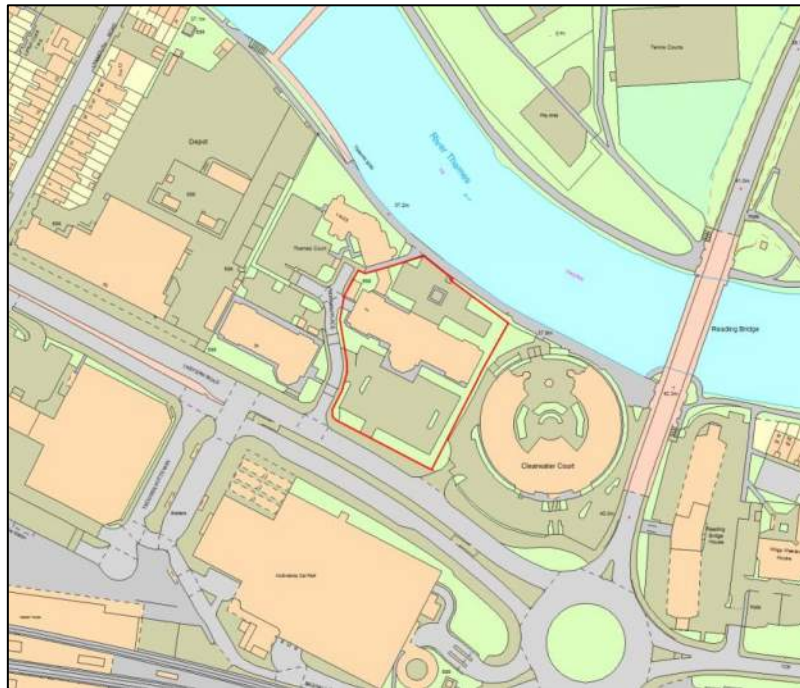

Figure 1.1 – Site Location Plan

1.2 Scope of Services

The Phase 1 PRA is intended to provide an overview of the geo-environmental and geotechnical setting of the site, prior to a change of use, at the site, comprising demolition of the existing office/commercial building and development of an up to 11 storey residential-led development comprising residential properties with some commercial use at the ground floor.

These works are undertaken in general accordance with the Land Contamination Risk Management LCRM: Stage 1 Risk Assessment (Ref. 1).

Through this overview the Phase 1 aims to identify, through non-intrusive investigation, the site setting and history to establish an anticipated ground model and identify potential risks that could be presented to the site following change of use including its intended end users and the wider environment.

Consideration of detailed flood risk, ecology and archaeological issues are outside of the scope of this report.

2.0 Site Setting and History

2.1 Site Setting

The site as shown in Figure 1.1 is located approximately 750m to the north/ north east of Reading Town Centre, currently comprising a commercial/ office building with associated car parking. A recent aerial image of the site area is provided in Figure 2.1.

The site is bounded to the north by the River Thames and with commercial office buildings to the west and east. Beyond Vastern Road to the south is a multistorey car park associated with the train station which is approximately 300m to the south of the site.

The site area measures approximately 0.55Ha.

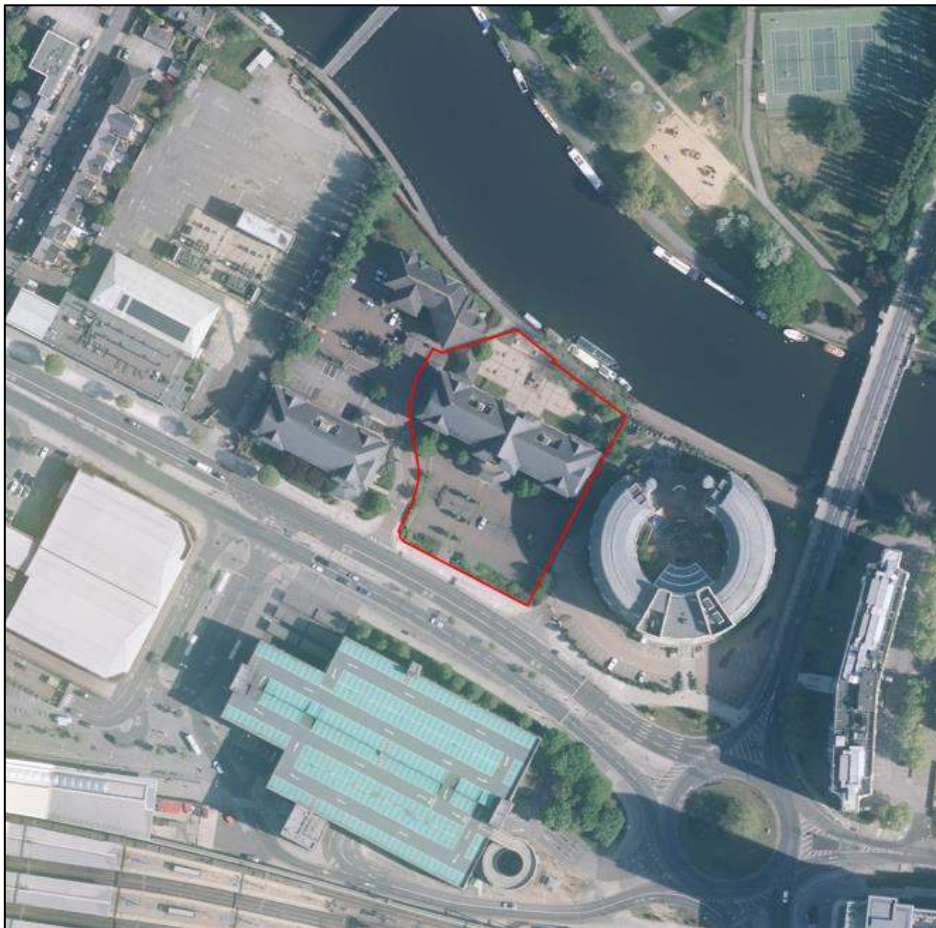

Figure 2.1 – 2024 Aerial Image

2.2 Site History

Available historical mapping show various phases of development and a varied site usage.

Earliest available historical Ordnance Survey (OS) maps obtained show the site to be an undeveloped parcel of land, with the first recorded development shown on Maps from the 1890s comprising the Thames Bank Iron Works.

In the 1930s the site is marked as a Timber Yard with the western extent part of a Paint Works.

In the 1950s the site has been redeveloped with a number of unmarked buildings and the western portion of the site part of a larger building marked as 'Garage'. The site is first noted to be developed in the mid 1960s when a presumed car park and two residential properties are shown. The site remains relatively unchanged until the 1990s when the car park has expanded similar to the extent recorded today. Maps from the 1970s show the garage building to have extended further into the site with an unspecified Tank shown centrally on the site.

The site remains predominantly unchanged until maps dated 1999 where a single rectangular building is shown on the site, in the location of the current building.

Land to the east and west of the site shows a comparable development history to the subject site with varied industrial land uses highlighted including Engineering Works, foundries and electricity depots to the west. To the east, there are several unmarked buildings and cycles of commercial buildings to the west. Railway land is highlighted to the south beyond Vastern Road with railway sidings noted until the 1980s, when the multistorey car park is apparent.

Select maps have been presented in Figure 2.2

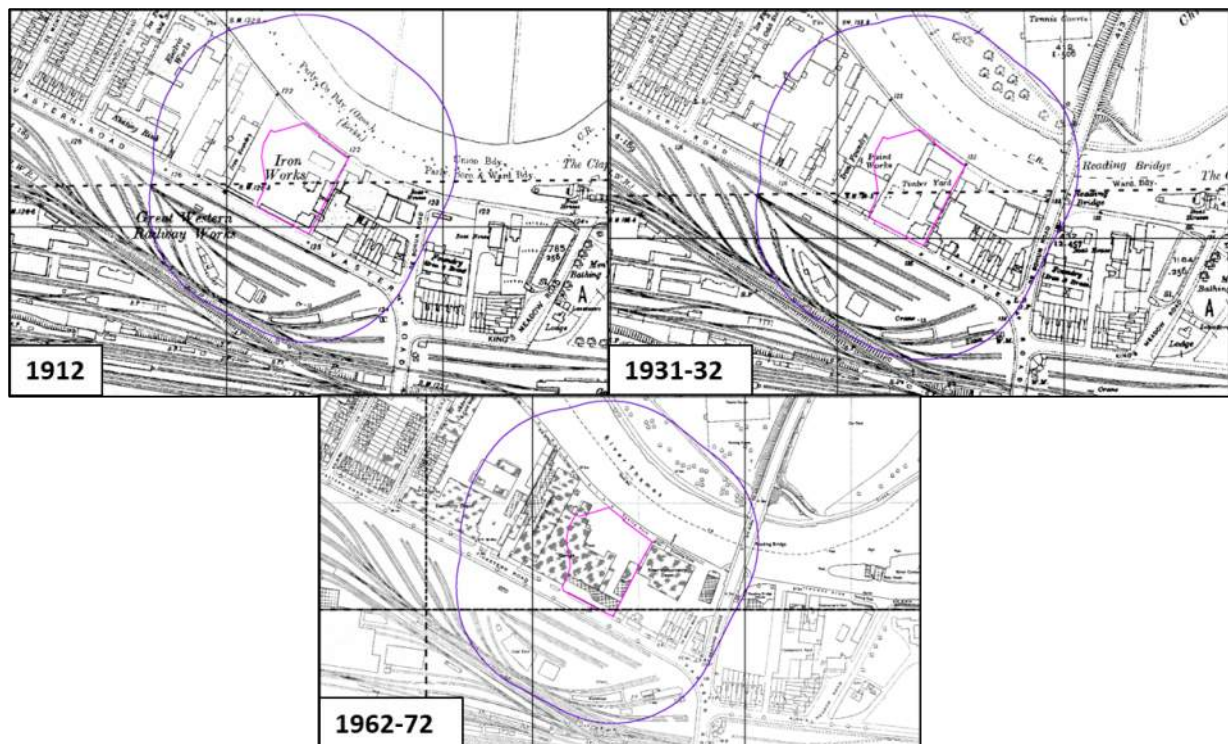

Figure 2.2 – Select Historical OS Map Extracts

3.0 Geology, Hydrogeology and Hydrology

3.1 Published Geology and Hydrogeology

Published Geology has been determined based on a review of the British Geological Society (BGS) (Sheet 268), solid and Drift 1,50,000 Scale, map, 2000.

3.1.1 Made Ground

Made Ground is not recorded on the published maps. However, given the various development cycles Made Ground is anticipated to be present on the site.

3.1.2 Superficial Deposits

Based on published maps superficial deposits of Langley Silt Member comprising clay and silt, are recorded across the site. Alluvium is mapped to the immediate north and given the presence of the adjacent River Channel the presence of some alluvial deposits cannot be precluded.

The Langley Silt is listed as Unproductive Strata with regards Aquifer designation. The Alluvium is designated a Secondary A Aquifer.

3.1.3 Bedrock Deposits

Bedrock is mapped to comprise Seaford and Newhaven Chalk Formation.

The bedrock is designated as a Principal Aquifer.

3.2 Historical Borehole Records and Ground Investigation

There are no known contemporary ground investigation reports available for review relating to the subject site boundary.

There is one publicly available BGS borehole shown to be present on site to the south of the current building and several off-site immediately to the east and one immediately to the south of the site.

The borehole records show a generally consistent ground profile comprising soft to firm silty clays up to 3m depth underlain by medium dense to dense sand and gravel with flints.

Chalk Bedrock, described as 'Firm Chalk' or 'Hard Chalk' was encountered between 7 and 10 m depth. Flints are noted alongside the bedrock description with notes that chiselling of flint cobbles was required in select locations.

The descriptions of chalk in the BGS records do not provide sufficient detail to classify the chalk in line with CIRIA C574 guidance, however, given the recorded SPT results (where provided) and that the chalk was progressed with Shell and Auger techniques it is anticipated that the Chalk would be classified as Grade B or C.

3.3 Mining, Quarrying, Cavities

There are no known mines or quarries on or within influencing distance of the site.

There are no indications of natural cavities or evidence of dissolution of the underlying chalk highlighted in BGS records or indicated on local BGS logs. The Envirocheck Report lists cavities relating to solution of the chalk group with the nearest listed 600m to the south of the site and not considered likely to negatively impact the site.

3.4 Hydrology

The River Thames bounds the site to the north. This section of the River has been heavily engineered with a sheet piled retaining wall forming the river bank.

The Envirocheck Report lists River Quality testing data from 2000 from location to the north-east and south-east of the site with a classification River Quality Grade B (Good).

4.0 Environmental Setting

4.1 Landfill and Pollution

The Envirocheck Report does not record any currently operational or historic landfills on or within 250m of the site.

An area of infilled land is listed c. 200m to the east, thought to relate to a former outdoor swimming/ bathing pool. This feature is unlikely to impact the site.

A waste management facility is listed c. 50mn to the south east relating to Mobile Plant for land spreading sewage sludge , with a licence date of 2011. This feature is unlikely to impact land quality on the site.

There are no local authority pollution and prevention control permits within 500m of the site.

4.2 Environmental Data

The site exists in a historically greenfield setting. The Envirocheck Report details the below for the site and is presented in Appendix B, and the data is summarised in Table 4.1 below.

Table 4.1 – Summary of Environmental Data

Item	On the Site	In the Immediate Vicinity
Historical Tanks, PFS, Garages, Energy Facilities	Unmarked tanks noted centrally on the site on historical mapping with a cross boundary garage over the western boundary. Electricity depot noted to the west historically. Electricity power distribution infrastructure noted c. 70m to the west.	
IPPC Authorisations	None identified within the site boundary.	None recorded within 250m of the site.
Discharge Consents	None identified within the site boundary.	None relevant to the land quality on the site
List 1 and 2 Dangerous Substances Sites	None identified within the site boundary.	None recorded within 250m of the site.
Radioactive Substance Sites	None identified within the site boundary.	None recorded within 250m of the site.
Enforcements	None identified within the site boundary.	None recorded within 250m of the site.
Pollution Incidents	None identified within the site boundary.	None relevant to the land quality on the site

4.3 Environmental Designations

There are no known statutory environmental designations (e.g. Sites of Special Scientific Interest, historic woodland etc.) present on or adjacent to the site.

4.4 Radon

The Envirocheck Report highlights that the site is located in a 'Lower Probability Radon Area' (less than 1% of homes are estimated to be at or above the Action Level). Based on this no radon protective measures are necessary in the construction of new dwellings or extensions. Where proposed properties incorporate a basement, further assessment may be required.

4.5 Groundwater

The site is not located within a Source Protection Zone.

There are no licenced abstraction on or within influencing distance of the site.

4.6 Unexploded Ordnance Risk (UXO)

Review of the site history and publicly available risk mapping indicates that there is no evidence to suggest the site is at heightened risk of the presence of UXO with the site listed as being in an area designated as 'Low' where Low is defined as "Areas indicated as having a bombing density of less than 15 bombs per 1000 acre".

5.0 Conceptual Site Model Setting

The information summarised in Section 1 to 4 has been used to develop a Conceptual Site Model (CSM) and Qualitative Risk Assessment (QRA) for the site which is detailed in Table 5.1.

The CSM details the source-pathway-receptor linkages to identify Potential Pollutant Linkages (PPL) that may be present on the site currently or realised through the proposed change of use. The QRA details the associated level of risk relating to these potential pollutant linkages.

The CSM and QRA concern risk to human health and water environment (controlled waters).

The QRA follows the framework outlined within CIRIA C552. Unless specifically stated, it does not necessarily refer to an immediate risk and is intended to be used as a tool to assess the necessity for further assessment/investigation.

Under current health and safety legislation, employers are required to carry out their own appropriate risk assessments and mitigation to protect themselves and their employees, other human receptors, and the environment from potential contamination. Such risks must be adequately mitigated by law, specifically the Construction Design Management (CDM) Regulations (2015). It has been assumed that any future construction works on site will be undertaken in compliance with these requirements and therefore construction workers involved in the building works at the site have been discounted as a human receptor in the conceptual site model.

Table 5.1 Conceptual Site Model

Source	Pathway	Receptor	Risk Classification	Recommendation
Human Health				
Contamination relating to and originating from on-site and adjacent historical commercial and industrial land uses (iron works/foundry, timber yard, paint works, garage, tanks) Potential contaminants include: Heavy metals, polyaromatic hydrocarbons, petroleum hydrocarbons, volatile organic compounds, and asbestos.	Risk of chronic disease caused by: Dermal contact with and or ingestion of contaminants in soil and soil derived dust. Inhalation of soil derived dust and fibres (asbestos). Inhalation of vapours	Future site residents, visitors and trespassers. Off-site residents/ site users	Moderate The site history presents potential for gross contamination to be present on the site. Redevelopment of the site in the late 1990s may have removed some contamination however this cannot be confirmed. The proposed change of use comprises large footprint building with limited proposed landscaping which will limit potential dermal contact and ingestion pathways.	Ground Investigation will be required to established the shallow ground profile and Generic Quantitative Risk Assessment undertaken to assess risk to Human Health receptors.
Made Ground associated with former cycles of development.	Migration of ground borne gases leading to: Inhalation of hazardous gases (Carbon dioxide, methane). Build up of gases in enclosed areas causing an explosive atmosphere.	Future site users, visitors and trespassers. Off-site residents	Low In accordance with BS 8576:2013, Figure 6, the presence of Made Ground would represent a typically low gassing potential. The likelihood of significant putrescible (e.g. household waste) being present on site is considered very low.	

Source	Pathway	Receptor	Risk Classification	Recommendation
Controlled Waters				
Contamination relating to and originating from on-site and adjacent historical commercial and industrial land uses (iron works/foundry, timber yard, paint works, garage, tanks) Potential contaminants include: Heavy metals, polyaromatic hydrocarbons, petroleum hydrocarbons, volatile organic compounds	Vertical migration of contaminants through the unsaturated zone to underlying groundwater.	Groundwater Principal Aquifer in Chalk bedrock	Moderate The site history presents potential for gross contamination to be present on the site. Redevelopment of the site in the late 1990s may have removed some contamination however this cannot be confirmed. Granular soils indicated on BGS records indicates permeable strata facilitating migration of contaminants. The presence of sheet piled retaining to the river bank may limit connectivity with the surface waters and impact local groundwater flows.	Ground Investigation will be required to established the shallow ground profile and Generic Quantitative Risk Assessment undertaken to assess risk to Controlled Waters receptors.
	Horizontal migration over and through the superficial deposits (soils).	Surface Waters River Thames		

6.0 Preliminary Assessment of Development Abnormals

6.1 Contamination

The likelihood of a complete contaminant linkage being present at the site is assessed to be Moderate.

This assessment is based on the site history presenting plausible sources for gross contamination to be present.

The proposed change of use will comprise predominantly building footprint with limited soft landscaping. Although this will limit dermal contact and ingestion pathways to future site users. The potential for presence of volatile contamination cannot be precluded at desk study stage.

Given the relatively high sensitivity setting with regards to Controlled Waters, further assessment of the risk to underlying Principal Aquifer and River Thames is required.

Based on this desk top assessment further (intrusive) investigation with regards to contamination potential is required to assess the risk posed to Human Health and Controlled Water receptors.

6.2 Geotechnical

The following presents an initial appraisal of potential geotechnical risks at the site based on the developed preliminary ground model. Desk based assessment cannot provide detailed design information which must be established through intrusive investigative and direct in-situ and laboratory testing of the soils. The following should be considered informative only.

Based on the information reviewed to date it is likely that the moderate to high loads of the structure will require a piled foundation solution.

Pile design should take note of the underlying Chalk and should be designed in accordance with CIRIA 574 (2002) Engineering in Chalk.

The design must also take note of possible variable superficial deposits across the site and possible presence of alluvium which are generally encountered as a poor strength stratum.

7.0 Recommendations

The qualitative risk assessment (QRA) determined a Moderate risk associated with the proposed development.

It is recommended that intrusive ground investigation is undertaken to allow a Generic Quantitative Risk Assessments (GQRA) to be undertaken, to further assess the risk associated with the identified Potential Pollutant Linkages (PPLs).

Contaminants of concern comprise a broad range aliphatic and aromatic hydrocarbons present within any fuel oils; semi-volatile and volatile organic contamination, polycyclic aromatic hydrocarbons (PAHs); inorganic compounds including heavy metals; and asbestos.

In summary, the following recommendations are made:

- Undertake an intrusive ground investigation to collect chemical and geotechnical samples. Consideration should be given to the advancement of a series of shallow and deeper boreholes. The target depth for deeper boreholes should be designed to inform pile design as well as to inform the GQRA.
- Install a network of monitoring wells to establish groundwater levels and facilitate recovery of groundwater samples for Controlled Waters GQRA.
- Install monitoring wells targeting potential ground gas generation sources (if encountered) .
- Undertake a GQRA as part of the ground investigation to determine contaminated land risks.

It is further recommended that this work is completed in advance of any development works taking place, however the investigation could be undertaken post demolition of the existing building depending on programme. Where investigation is undertaken prior to demolition, additional post demolition investigation may be required (subject to identified ground conditions)

In addition to the above there may be subsurface obstructions, voids and relic foundations associated with previous development cycles.

The requirement for additional surveys, e.g. arboricultural, archaeological and ecological surveys, should be confirmed through advice from a suitably qualified and experienced professional.

Introduction

The Environment Act 1995 has made site sensitivity a key issue, as the legislation pays as much attention to the pathways by which contamination could spread, and to the vulnerable targets of contamination, as it does the potential sources of contamination. For this reason, Landmark's Site Sensitivity maps and Datasheet(s) place great emphasis on statutory data provided by the Environment Agency/Natural Resources Wales and the Scottish Environment Protection Agency; it also incorporates data from Natural England (and the Scottish and Welsh equivalents) and Local Authorities; and highlights hydrogeological features required by environmental and geotechnical consultants. It does not include any information concerning past uses of land. The datasheet is produced by querying the Landmark database to a distance defined by the client from a site boundary provided by the client. In this datasheet the National Grid References (NGRs) are rounded to the nearest 10m in accordance with Landmark's agreements with a number of Data Suppliers.

Natural England Copyright Notice

Site of Special Scientific Interest, National Nature Reserve, Ramsar, Special Protection Area, Special Conservation Area, Marine Nature Reserve data (derived from Ordnance Survey 1:10000 raster) is provided by, and used with the permission of, Natural England who retain the copyright and Intellectual Property Rights for the data.

Scottish Natural Heritage Copyright

Contains SNH information licensed under the Open Government Licence v3.0.

Ove Arup Copyright Notice

The Mining Instability data was obtained on licence from Ove Arup & Partners Limited (for further information, contact mining.review@arup.com). No reproduction or further use of such Data is to be made without the prior written consent of Ove Arup & Partners Limited. The supplied Mining Instability data is derived from publicly available records and other third party sources and neither Ove Arup & Partners nor Landmark warrant the accuracy or completeness of such information or data.

Stantec Copyright Notice

The cavity data presented has been extracted from the PBA (now Stantec UK Ltd) enhanced version of the original DEFRA national cavity databases. Stantec UK Ltd retain the copyright & intellectual property rights in the data. Whilst all reasonable efforts are made to check that the information contained in the cavity databases is accurate we do not warrant that the data is complete or error free. The information is based upon our own researches and those collated from a number of external sources and is continually being augmented and updated by Stantec UK Ltd. In no event shall Stantec UK Ltd or Landmark be liable for any loss or damage including, without limitation, indirect or consequential loss or damage arising from the use of this data.

Radon Potential dataset Copyright Notice

Information supplied from a joint dataset compiled by The British Geological Survey and Public Health England.

Natural Resources Wales Copyright Notice

Contains Natural Resources Wales information © Natural Resources Wales and Database Right. All rights Reserved. Contains Ordnance Survey Data. Ordnance Survey Licence number 100019741. Report Version v53.0

Data Type	Page Number	On Site	0 to 250m	251 to 500m	501 to 1000m (*up to 2000m)
Agency & Hydrological					
BGS Groundwater Flooding Susceptibility	pg 1	Yes		Yes	n/a
Contaminated Land Register Entries and Notices					
Discharge Consents	pg 1		6	3	26
Prosecutions Relating to Controlled Waters			n/a	n/a	n/a
Enforcement and Prohibition Notices					
Integrated Pollution Controls					
Integrated Pollution Prevention And Control					
Local Authority Integrated Pollution Prevention And Control					
Local Authority Pollution Prevention and Controls	pg 10			1	15
Local Authority Pollution Prevention and Control Enforcements					
Nearest Surface Water Feature	pg 12		Yes		
Pollution Incidents to Controlled Waters	pg 12		29	42	91
Prosecutions Relating to Authorised Processes					
Registered Radioactive Substances					
River Quality	pg 39		1	1	
River Quality Biology Sampling Points					
River Quality Chemistry Sampling Points	pg 40			1	
Substantiated Pollution Incident Register	pg 40			1	2
Water Abstractions	pg 41			10	9 (*18)
Water Industry Act Referrals					
Groundwater Vulnerability Map	pg 50	Yes	n/a	n/a	n/a
Groundwater Vulnerability - Soluble Rock Risk	pg 50	2	n/a	n/a	n/a
Groundwater Vulnerability - Local Information			n/a	n/a	n/a
Bedrock Aquifer Designations	pg 50	Yes	n/a	n/a	n/a
Superficial Aquifer Designations	pg 50	Yes	n/a	n/a	n/a
Source Protection Zones	pg 50				1
Extreme Flooding from Rivers or Sea without Defences	pg 50	Yes	Yes	n/a	n/a
Flooding from Rivers or Sea without Defences	pg 52	Yes		n/a	n/a
Areas Benefiting from Flood Defences				n/a	n/a
Flood Water Storage Areas				n/a	n/a
Flood Defences				n/a	n/a
OS Water Network Lines	pg 52		12	18	62

Data Type	Page Number	On Site	0 to 250m	251 to 500m	501 to 1000m (*up to 2000m)
Waste					
BGS Recorded Landfill Sites					
Historical Landfill Sites	pg 64				1
Integrated Pollution Control Registered Waste Sites					
Licensed Waste Management Facilities (Landfill Boundaries)					
Licensed Waste Management Facilities (Locations)	pg 64		1	1	
Local Authority Landfill Coverage	pg 64	1	n/a	n/a	n/a
Local Authority Recorded Landfill Sites					
Potentially Infilled Land (Non-Water)					
Potentially Infilled Land (Water)	pg 64		1	1	8
Registered Landfill Sites					
Registered Waste Transfer Sites					
Registered Waste Treatment or Disposal Sites					
Hazardous Substances					
Control of Major Accident Hazards Sites (COMAH)	pg 66				1
Explosive Sites					
Notification of Installations Handling Hazardous Substances (NIHHS)					
Planning Hazardous Substance Consents					
Planning Hazardous Substance Enforcements					

Data Type	Page Number	On Site	0 to 250m	251 to 500m	501 to 1000m (*up to 2000m)
Geological					
BGS 1:625,000 Solid Geology	pg 67	Yes	n/a	n/a	n/a
BGS Estimated Soil Chemistry	pg 67	Yes		Yes	Yes
BGS Recorded Mineral Sites	pg 68				1
BGS Urban Soil Chemistry					
BGS Urban Soil Chemistry Averages					
CBSCB Compensation District			n/a	n/a	n/a
Coal Mining Affected Areas			n/a	n/a	n/a
Mining Instability			n/a	n/a	n/a
Man-Made Mining Cavities					
Natural Cavities	pg 68				6
Non Coal Mining Areas of Great Britain				n/a	n/a
Potential for Collapsible Ground Stability Hazards	pg 69	Yes		n/a	n/a
Potential for Compressible Ground Stability Hazards	pg 69		Yes	n/a	n/a
Potential for Ground Dissolution Stability Hazards	pg 69	Yes		n/a	n/a
Potential for Landslide Ground Stability Hazards	pg 69	Yes		n/a	n/a
Potential for Running Sand Ground Stability Hazards	pg 69		Yes	n/a	n/a
Potential for Shrinking or Swelling Clay Ground Stability Hazards	pg 69	Yes		n/a	n/a
Radon Potential - Radon Affected Areas			n/a	n/a	n/a
Radon Potential - Radon Protection Measures			n/a	n/a	n/a
Industrial Land Use					
Contemporary Trade Directory Entries	pg 70		13	48	350
Fuel Station Entries	pg 104			1	4
Points of Interest - Commercial Services	pg 105		1	9	102
Points of Interest - Education and Health	pg 114				1
Points of Interest - Manufacturing and Production	pg 114		1	7	44
Points of Interest - Public Infrastructure	pg 118		4	15	28
Points of Interest - Recreational and Environmental	pg 122		3	3	13
Gas Pipelines					
Underground Electrical Cables					

Data Type	Page Number	On Site	0 to 250m	251 to 500m	501 to 1000m (*up to 2000m)
Sensitive Land Use					
Ancient Woodland					
Areas of Adopted Green Belt					
Areas of Unadopted Green Belt					
Areas of Outstanding Natural Beauty					
Environmentally Sensitive Areas					
Forest Parks					
Local Nature Reserves					
Marine Nature Reserves					
National Nature Reserves					
National Parks					
Nitrate Sensitive Areas					
Nitrate Vulnerable Zones	pg 125	1			
Ramsar Sites					
Sites of Special Scientific Interest					
Special Areas of Conservation					
Special Protection Areas					
World Heritage Sites

Published 1879

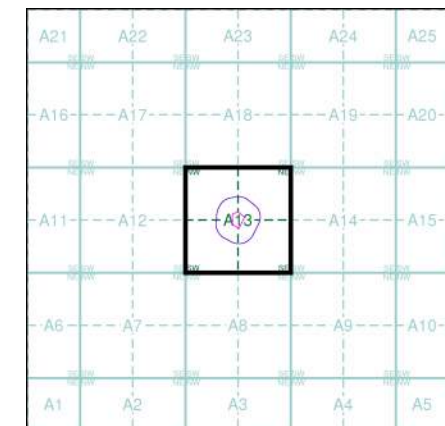

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas and by 1896 it covered the whole of what were considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Ordnance Survey Plan

Published 1957

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas and by 1896 it covered the whole of what were considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Supply of Unpublished Survey Information

Published 1974

Source map scale - 1:1,250

SUSI maps (Supply of Unpublished Survey Information) were produced between 1972 and 1977, mainly for internal use at Ordnance Survey. These were more of a 'work-in-progress' plan as they showed updates of individual areas on a map. These maps were unpublished, and they do not represent a single moment in time. They were produced at both 1:2,500 and 1:1,250 scales.

Large-Scale National Grid Data

Published 1993

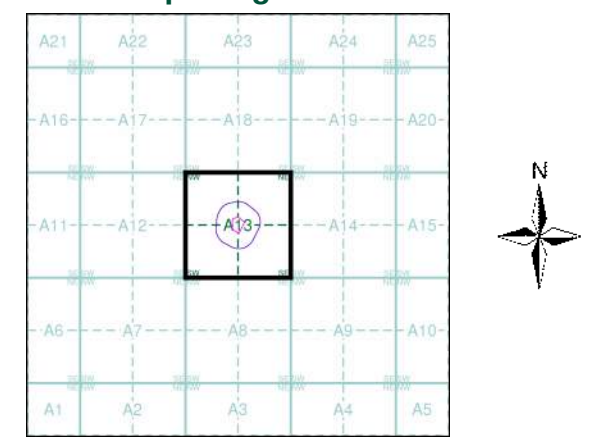

Source map scale - 1:1,250

'Large Scale National Grid Data' superseded SIM cards (Ordnance Survey's 'Survey of Information on Microfilm') in 1992, and continued to be produced until 1999. These maps were the fore-runners of digital mapping and so provide detailed information on houses and roads, but tend to show less topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.
