FAO Tom Berrington,
Sir Robert McAlpine Ltd,
Station Hill North,
Reading.
RG1 1NB

Dear Tom.

Thank you for providing the opportunity to inspect the site at Station Hill.

The sole purpose of this visit was to establish if physical protection elements of the structure were to agreed standards, to assist with discharge of a planning condition.

As the authorised representative for Police Crime Prevention Initiatives (of which Secured by Design is a part), I can confirm physical protection elements are as agreed and initial build stages comply with the requirements of the Secured by Design commercial guidance document of 2019 (the guide in circulation at the time of the application being submitted).

Whilst I am currently unable to provide a compliance certificate in respect of Secured by Design accreditation, I can confirm elements of the build specification attributable to SRM are sufficient to allow this 'in principle' letter of compliance to be issued.

Final visit and subsequent accreditation will occur as and when all electronic and mechanical elements of the structure have been assessed against minimum requirements.

Yours sincerely

K A Burrows - For, and on behalf of PCPI.
