

Sign Type F6

Flexface boxes

Philips LED light units mounted top and bottom of box

Box finished MATT white inside

Side cover plates to be slotted to slid over Hex-Head fixings where box is fitted in recess

Kestrel Springflex 140 sign case.

Inside of sign to be powder coated matt white to assist with LED illumination.

Sign to be illuminated by means of Tridonic Taleox Engine Image LED system.

For information regarding the quantity of units to be fitted in each sign type, please refer to Tridonic's specifications.

3M Scotchcal 3630-33 translucent graphic film (Santander Red) and 3M Panaflex 945 GFS flexible substrate.

All screw heads finished to match box colour.

If the box is fitted into a recess and the cover plate fixings are not visible then the return should be slotted and held in place with hex-head fixings (as shown in this section).

If cover plate is visible, then fix using pan head machine screws.
