9499 / Reading Library Relocation / Green Roof Clarification / 18.04.2024

Fao: Kevin Hendley. MorganSindall

Hi Kevin,

As discussed in our workshop yesterday, please find clarification below on the suitability of the Green Roof to be constructed atop the new extension:

During Stage 4 of the design process, CPMG, acting as the architect, has worked closely with Sika (the Specialist supplier for the green roof), the Structural Engineer (Glanville) and the MEP Engineer (Etch) to ensure that the design of the Green Roof is fully coordinated and feasible for construction.

The weight of the Green Roof has been provided by the specialist supplier and has been factored into the design of the structural frame to ensure its suitability for the load required. The drainage system for the roof, has been designed by Etch to be suited to the green roof. Also, all relevant construction details have been drawn according to roof manufacturer's typical details.

We hope that this is useful, if any further information is required, please do let us know.

Regards

Antonio Ortiz
