

Fencing System

VMF VFence

50x200 V Mesh

DIMENSIONS

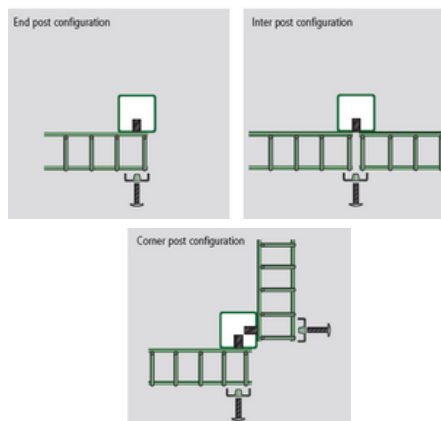

An ideal fencing solution to many perimeter security demarcation requirements. This wire mesh fencing panel system is fixed to RHS posts using metal fixing brackets, via VM's anti tamper security fixings.

Additional fixing points on the posts allow for the stepping of panels on undulating sites.

The profiled panels and posts are pre-galvanised and polyester powder coated.

Stocked in Green 6005 & Black 9005 with other colours possible on request

Height mm	Beams	Post c/c (nom)
1230	2	3.02
1730	3	3.02
1930	3	3.02
2030	4	3.02
2330	3	3.02
2430	4	3.02
2960	5	2.52

APPLICATIONS

- Schools
- Housing
- Public places
- Industry
- Sport fields
- General demarcation

Specification

5mm Horizontal & Vertical Wires
Width = 3.08m

Heights - see table

Mesh Aperture of 50 x 200mm
(50x100mm in profile)

***measurements are centre of wire to centre of wire**

Q40 available on request

Manufactured from Galvanised wire to BS EN 10244-2 Class D (minimum 40g/m²)

Panels are Pre-treated and provided with a conversion layer for a better anti-corrosive effect and better adhesion of the polyester powder coating.

Powder coatings meet the general requirements of BS EN 13438 : 2005 & BS 1722-16 : 2009
